

## **City of Kenosha Restrictions Erosion and Sediment Control Best Management Practices**

The City of Kenosha recognizes and accepts Best Management Practices as defined by the Department of Natural Resources Chapters NR216 and NR151, with the following exceptions:

### **Storm Water/Catch Basin Inlet Protection:**

Filter fabric is not allowed as an acceptable means of inlet protection. All storm water and catch basin inlets shall be protected by means of Type "D" inlet protection baskets.

### **Ditch Checks:**

Straw or hay bales are not allowed as an accepted means of ditch check. Any other approved method of water-flow impedance is acceptable.
