Notwithstanding the above, where multiple referrals for recommendation have been made by the Common Council, the City Clerk may hold the entire matter in abeyance until all recommendations have been received, or until forty-five (45) days from the date of referral have passed, whichever is first, and then place the report on the next following agenda of the Common Council.

Notwithstanding the above, the presiding officer of any body or subunit to which a matter has been submitted for review and recommendation, may withhold any item from being placed on the following Common Council Agenda for purposes of referring said matter back to his/her body or subunit for further consideration at its next regular or special meeting dealing with such matter.

Any sponsor may withdraw proposed legislation prior to the item being placed upon an agenda of the Common Council for final action. In addition to a Principal Sponsor, each ordinance or resolution may have Co-sponsors or a Lead Co-sponsor, who was responsible for assisting in the drafting of the initial language; both who in conjunction with the Principal Sponsor, agrees to support the passage of the legislation. Additional co-sponsors should communicate as soon as practicable to the Principal Sponsor, City Attorney or City Clerk their desire to be added as a cosponsor. Only the Principal Sponsor may direct changes to the text of the proposed ordinance or resolution prior to adoption by the Common Council, which changes shall be communicated as soon as practicable by the City Attorney to the named Co-sponsors except the Common Council may, by majority vote, amend the proposed ordinance or resolution at the time it is considered for action in any manner except the addition or removal of Principal Sponsor, Lead Co-sponsor, or Co-sponsors unless said addition or removal is the Common Council. The Principal Sponsor, Lead Co-sponsor, and the Co-sponsors shall be separately designated on the ordinance proposal.

3. Before the adoption of any Ordinance the same shall be read at two separate meetings of the Council. Before the second reading the title of the Ordinance shall be published in full in the official
newspaper. On the second reading of the Ordinance a public hearing thereon shall be had. An aye and no vote of the Council shall be taken on an Ordinance only after such public hearing has been held.

4. No ordinance may be considered by the Common Council for final passage unless one of the following has occurred:
   (a) if the ordinance was directly referred for comment through the Common Council agenda by either the Mayor pursuant to paragraph 1.03 A. 6. or by the Common Council pursuant to paragraph 1.03 A. 11., to one or more committees of the Common Council, to one or more commissions, boards, or authorities of the City, or to a combination thereof, either:

   (b) if the ordinance was not directly referred for comment, a committee of the Common Council has nonetheless reported on it.

5. No ordinance or resolution that affects the rules or procedures of the Common Council, or that is directed specifically to alderpersons, including but not limited to rules respecting dress code at meetings, and respecting compensation or reimbursement of alderpersons, may be considered for adoption unless it has first been referred pursuant to provisions of subsection 1.03 A. to the following standing committees of the Common Council: the Committee on Finance, the Committee on Public Works, the Committee on Public Safety and Welfare, and the Committee on Licensing/Permits.

6. All proposed ordinances and resolutions must either be drafted by the City Attorney’s Office or if not drafted by the City Attorney, forwarded to the City Clerk and the City Attorney within twenty-four (24) hours of referral from Common Council or placement onto an agenda to be approved by the City Attorney’s Office as to format and reviewed for content and legality before they may be considered for adoption by the Common Council. The Principal Sponsor directs and has final approval for all proposed ordinance and resolution language.

F. Deliberations of Council. The deliberations of the Council shall be conducted in the following manner:

1. No alderman shall address the Council until he has been recognized by the presiding officer. He shall thereupon address himself to the chairman and confine his remarks to the question under discussion and avoid all personalities.

2. When two or more members simultaneously seek recognition the presiding officer shall name the member who is to speak first.

3. Only members of Council may address the Council, such address being limited to the matter on the floor or to the rules of parliamentary procedure as they may affect the matter on the floor except that:
   a. The presiding officer on his own initiative or upon the request of a Council member, may permit any department head, officer, employee or representative of the City, the library, the museum, the water utility or of any board, commission, or advisory group to address the Council on the matter pending on the floor.
   b. An Alderman, where a public hearing is not scheduled, may request a public hearing by unanimous consent, and said public hearing shall be held if no Alderman objects thereto. In the event of an objection, a public hearing may be authorized by a majority vote of the members present. All public comments shall be limited to the matter on the floor.
   c. Citizens comments at all public hearings shall be limited to 5 minutes unless the Council suspends this rule by a majority vote of the members present, and permits either certain designated citizens or all citizens in general to speak on the issue pending on the floor. Any comment on other than a matter pending on the floor shall be out of order. Any public hearing may be terminated after 30 minutes by a majority vote of the members present except that a person or party who has a direct personal financial interest over and above the general interest of a taxpayer, in the pending Council action shall be permitted to speak after said hearing would have otherwise come to a close.
4. No motion shall be discussed or acted upon unless and until it has been seconded, unless the rules permit one alderman to initiate action. No motion shall be withdrawn without the consent of the person making the same and the person seconding it.

5. When a question is under discussion no action shall be in order, except (1) point of order, (2) to adjourn, (3) to recess, (4) to lay on the table, (5) to move the previous question, (6) to postpone to a certain day, (7) to refer to a Committee, (8) to amend, (9) to postpone indefinitely. These motions shall have precedence in the order listed.

6. Any member wishing to terminate the debate may move the previous question, in which event the Mayor shall announce the question as, "Shall the main question now be put?" If two-thirds (2/3) of the members present vote in the affirmative, the main question shall be taken without further debate, its effect being to put an end to all debate and to bring the Council to a direct vote, first upon any pending amendment, and then upon the main question.

7. Any alderperson may demand an aye and nay vote shall be recorded in the minutes. A roll call vote by roll call on any matter, and such roll call aye and nay vote is required on (a) passage of any Ordinance, (b) Resolutions, (c) confirmation of appointments (d) adoption of any measure assessing or levying taxes, appropriating or disbursing money; or creating any liability or charge against the City, or any fund thereof.

Every alderperson shall vote when a question is put unless there exists a conflict of interest and the alderperson announces his or her decision to abstain due to the conflict of interest. Any alderperson, failing to vote when a question is put, and continuing to fail to vote two minutes after a request for a vote from the Chair, shall be barred from further debating, commenting or voting on the question, and from debating, commenting or voting on any subsequent question or business remaining on the Agenda during the remainder of the Council meeting. This restriction shall not preclude any action or penalty otherwise prescribed or allowed under the Code of Ethics set forth in Chapter XXX of the City of Kenosha Code of General Ordinances.

An alderperson may not change his vote or any question after the result has been announced.

8. A motion to adjourn shall always be in order, and a motion to adjourn, to recess to lay on the table, and a call for the previous question shall be decided without debate.

9. **Reconsideration of Vote.** A motion to reconsider the vote on a confirmation of the appointment of a City official or on the award of any contract shall never be entertained and shall be out of order; and in other matters no motion for reconsideration shall be entertained or be in order unless (a) such motion be made and voted upon at the same or next regular meeting as when the vote to be reconsidered was originally had, and (b) no motion for reconsideration shall be entertained or be in order unless it is made by one of the aldermen whose vote prevailed when the motion involved was first subjected to a vote of the Council.

A motion to reconsider meeting the above requirements may be seconded by any alderman regardless of his previous vote on the matter.

A motion to reconsider being put and lost shall not be renewed or entertained.

10. Except for the maker of a motion no member shall speak a second time on a question until all who wish to speak have been heard.

11. Whenever in the opinion of the presiding officer a confusion exists because of the complexity of motions to amend, lay on the table, refer, or defer, he may with the consent of the maker of the original motion and the alderman who seconded it, expunge from the minutes all motions and votes taken on the subject and entertain any new motion germane to the subject matter.

12. When any matter is laid on the table, it shall not have the effect of prohibiting at succeeding meetings consideration and action taken on the same subject matter in the form of a new Resolution or Ordinance.
13. The presiding officer may at any time ask unanimous consent to suspend the rules, (except those imposed by statute) in any particular matter, and unless objection is made by any alderman, the rules may be suspended on his order.

14. A motion to reconsider shall not be necessary to repeal or amend an existing Ordinance or Resolution that is otherwise repealable or amendable.

15. On any business before the Council upon which a Committee has reported, a member representing the majority report shall have the privilege to make the first motion. Upon rejection of the majority report by action of the Council, the member representing the minority report shall have priority to make the next motion on the subject matter. Upon rejection of the minority report any other alderman may make any motion germane to the subject matter. This rule shall not deprive any alderman to debate each of the motions as made.

16. The approval of a Committee report in which the adoption of a Resolution or other matter is recommended shall comprise final action on such Resolution or other matter.

17. A majority vote of all members of Council in favor of any proposed Ordinance, Resolution or appointment shall be necessary for passage or approval, unless a larger number is required by statute. Except as otherwise provided, a majority vote of those present shall prevail in other cases.

18. If the presiding officer of the Common Council, a committee of the Common Council, or an authority, board, or commission of the City wishes to participate in the debate, the presiding officer must vacate the chair and pass the gavel to a member of the body who shall temporarily preside in the place of the presiding officer during the pendancy of the time the presiding officer holds the floor. Provided that the presiding officer was not the maker of a motion on the matter while holding the floor, upon the presiding officer relinquishing the floor, he or she shall reassume the chair, retake the gavel and continue to preside. In the event that the presiding officer was the maker of a motion, he or she may reassume the chair on the ensuing matter. Nothing herein may be construed to prohibit the presiding officer from seconding motions without vacating the chair.

G. Minutes. Within not more than fifteen (15) days after each meeting of the Council, the Clerk shall supply to each alderman a printed copy of the proceedings thereof perforated for insertion in a ring binder.

H. Suspension of Rules. These rules or any part thereof may be temporarily suspended in connection with any matter under consideration by a recorded vote of two-thirds (2/3) of the members present.

The complainant shall have the option of conciliation through the City Administration prior to the complaint being submitted to the Enforcing Officer. Upon the refusal of such option, the complaint will be referred by the office in which filed to the Enforcing Officer.

If the complainant indicates that he/she does not agree with the action taken, the Enforcing Officer may request that the complainant provide suggestions in writing for possible consideration. Although suggestions submitted will be given full consideration, the City of Kenosha reserves the right to determine the final action taken based on the totality of findings from the investigation.

If the Enforcing Officer finds that Harassment has occurred, the Employee accused of Harassment will be subject to appropriate disciplinary procedures, as hereinafter set forth, in accordance with applicable procedures. The complainant will be informed of the disciplinary action taken.

If the Enforcing Officer determines that no Harassment has occurred, this finding will be communicated to the complainant in an appropriately sensitive manner.

The Enforcing Officer may, with the consent of the complainant and Employee accused of Harassment, attempt to resolve the complaint by conciliation. However, any proposed resolution of the complaint shall only have the force and effect of a recommendation to any Department Head, or to any person or body having appropriate jurisdiction to impose discipline upon the Employee who is deemed to have violated this Ordinance.

The Enforcing Officer, upon making a finding of a violation of this Ordinance, may, but is not obligated to, make a recommendation with respect to the nature of the discipline to be imposed.

An Employee found to have engaged in misconduct constituting Harassment will be disciplined, up to and including discharge. Appropriate sanctions will be determined by the Department Head, or by the person or body having appropriate jurisdiction in accordance with applicable procedures. Any person violating any provision of this Section shall be punished, upon conviction, by a forfeiture of not less than One Hundred ($100.00) Dollars, nor more than One Thousand ($1,000.00) Dollars, together with the costs of the prosecution, and in default of payment thereof shall be imprisoned until such forfeiture and cost are paid, but not to exceed sixty (60) days.

2. Any person violating any provision of this Section who has previously been convicted of violating any provision of this Section and such prior conviction has not been reversed, shall, upon conviction, be required to forfeit not less than One Hundred ($100.00) Dollars, nor more than One Thousand ($1,000.00) Dollars, together with the costs of the prosecution, for each offense, and in default of payment thereof shall be imprisoned until such forfeiture and cost are paid, but not to exceed ninety (90) days for each offense.

3.23 AUTOMATIC FIRE SPRINKLER SYSTEMS

A. Purpose. The purpose of this Section is to provide the means for the automatic extinguishment of fire in buildings or parts of buildings which, because of their size, construction or occupancy, or lack of suitable protective equipment, constitute a special fire hazard to life or property, or an excessive burden upon the fire extinguishing capabilities of the Fire Department.

B. Definitions. The following words, terms and phrases, when used in this Chapter, shall have the meanings ascribed to them in this Section, except where the context clearly indicates a different meaning.

1. "Area" means ground area of buildings or sections of buildings divided by an approved firewall, each section being considered a separate area.

2. "Automatic Fire Sprinkler Equipment" means an integrated system of underground and overhead piping designed in accordance with fire engineering standards. The system includes a suitable water supply, such as a gravity tank, fire pump, reservoir or pressure tank and/or connection by underground piping to a municipal water main. The portion of the sprinkler system aboveground is a network of specially sized or hydraulically designed piping installed in a building, structure or area, generally overhead, and to which sprinklers are connected in a systematic pattern. The system includes a controlling valve and a device for actuating an alarm when the system is in operation. The system is usually actuated by heat from a fire and discharges water over the fire area.

3. "Basement" means any story where less than half of the height between the floor and ceiling is above the average level of the street, sidewalk or finished grade.

4. "Fire Resitive" means that type of construction in which the structure members, including walls, partitions, columns, floors and roof construction are of noncombustible materials with a fire resistant rating of not less than those specified in Chapter 7 of the International Building Code.
5. "Story" means that part of a building comprised between a floor and the floor next above it, or if there is no floor above it, then the space between the floor and the ceiling above it.

C. Wisconsin Administrative Code. The provisions of the Wisconsin Administrative Code regulating Automatic Fire Sprinkler Systems and Fire Safety are hereby adopted and incorporated herein by reference as it now exists and as it may be amended in the future.

D. Installation and Maintenance Required.

1. Requirement. Every building constructed, structurally altered, or has a change of occupancy, where required, shall have an approved Automatic Fire Sprinkler System installed and maintained when occupied, in whole or in part, for the following purposes in the following building groups (which building groups are defined in the International Building Code):

a. Assembly Group A.
   (1) Assembly Group A buildings which accommodate less than one hundred (100) people shall have an approved sprinkler system installed and maintained if they meet any one (1) or more of the following:

h. Utility and Miscellaneous Group U. Group U covers all buildings and structures not covered in any other occupancy classification. Sprinkler system requirements for Group U buildings and structures will be reviewed by the Fire Chief on a case-by-case basis.

2. Exception to the Installation Requirement. Unless otherwise required by state law, any building that has a U.L. - approved smoke detection system that includes a monitored, central-station fire alarm panel, which system has been approved by the Fire Chief for the building in which it is installed, that completely satisfies any of the following is excepted from the installation requirement of paragraph D. 1.
   a. An existing building.
   b. A building that is constructed pursuant to a developer’s agreement approved by the Common Council before the effective date of this ordinance and is first occupied no later than July 1, 2013.

   The exception of this paragraph D.2 does not apply to the maintenance requirement for a sprinkler system that is already installed.

3. Automatic Fire Sprinkler Systems Plan Submittal Requirement. Plans and specifications shall accompany each submittal, including all applicable plan review and acceptance testing fees. Plans will be reviewed and conditionally approved by the Fire Prevention Bureau. All sprinkler systems require a permit issued by the Department of Community Development and Inspections prior to the start of any work. The Kenosha Fire Department shall witness all field and acceptance testing.

E. Exceptions. Provided that an alternate fire suppression system approved by the Bureau is in use, any portion of a building housing a process or material which would interact with water to create a greater fire hazard than without water, may be exempt from the requirement of Automatic Fire Sprinkler System.

F. Water Supply System. The water service line providing water to an Automatic Fire Sprinkler System may be connected to the general water service lateral, or may be a separate lateral, providing however, that if connected to the general water service lateral, the line must be separated and valved before the water meter which measures the domestic water supply.

   The size, location and metering of the required water supply line must be authorized and approved by the Kenosha Water Utility in accordance with the Rules and Regulations governing water service in the City of Kenosha.

   The owner of any premise requiring Automatic Fire Sprinkler Service is required to pay for the full cost of installing a new or separate fire service water supply line in addition to all necessary valves, fittings and meter settings required to provide such service; and shall further be required to sign a contract for a water supply line service connection with the City of Kenosha Water Utility.

G. Fire Department Connections.

1. Requirements. Every Automatic Fire Sprinkler System shall have the following:
   a. A Concrete Pumper Pad. The concrete pumper pad shall have the following minimum dimensions of concrete: length of twenty (20') feet; width of fifteen (15') feet; and depth of six (6") inches. The concrete pad must be designed and maintained to allow for the parking of at least a Fire Department pumper apparatus of sixty-five thousand (65,000 lbs.) pounds gross weight on it, without failure. Said pumper pad must have included within it or have within five (5') feet adjacent to it, a fire hydrant containing at least one four and one-half (4.5") inch outlet with Kenosha standard threads and at lease two (2) two and one-half (2.5") inch outlets having national standard threads; if the fire hydrant is located off the concrete pumper pad, the concrete pumper pad must be oriented such that an outlet having the Kenosha standard threads must face the concrete pumper pad, and there may not be any obstruction between the fire hydrant and the pumper pad that would impede a firefighter's access to the fire hydrant from the pumper pad, or that would inhibit the operation of a hose extending from the fire hydrant to the Fire Department pumper apparatus.

   b. A Fire Department Connection. The Fire Department Connection shall be operationally connected to the Automatic Fire Sprinkler System. The Fire Department Connection shall have a Siamese connection with two and one-half (2.5") inch national standard threads, and a five (5") inch Storz connection. The Fire Department Connection shall be located to comply with all of the following: no further than five (5') feet from the pumper pad; no further than five (5') feet from a fire hydrant; and no closer to the building it services than the height of the building that it services. There may not be any obstruction
between the fire hydrant and the Fire Department Connection that would impede a firefighter's access to the Fire Department Connection, or that would inhibit the operation of a hose extending from the fire hydrant to the Fire Department Connection. There may not be any obstruction between the pumper pad and the Fire Department Connection that would impede a firefighter’s access to the Fire Department Connection, or that would inhibit the operation of a hose extending from the pumper pad to the Fire Department Connection.

c. **Locking Cap Covers.** All Fire Department Connections, regardless of when installed, shall be occluded by a Locking Cap capable of being removed by appropriate Key Wrenches carried by the Fire Department. Due to the need for consistency and efficiency in emergency situations, and due to the proprietary nature of Key Wrenches, the Fire Department may specify a certain manufacturer or a limited number of manufacturers that provide Locking Caps removable by a particular Key Wrench configuration.

d. **Bollards.** Fire hydrants associated with the pumper pad shall be protected from vehicular traffic damage with bollards. The Bureau shall determine the number of bollards needed.

e. **Signage.** All Fire Department Connections will be labeled on the building or pumper pad; signage to be approved by the Bureau.

2. **Exceptions.** Any or all of the requirements of this Subsection 3.23 G. may be waived by the Fire Chief in the exercise of his/her discretion, subject to the considerations of public safety and welfare, if either of the following apply:

   a. The construction, alteration, or change requiring installation of an Automatic Fire Sprinkler System pursuant to Subsection D., herein, creates occupiable space of less than ten thousand (10,000) square feet; or,

   b. The construction, alteration, or change requiring installation of an Automatic Fire Sprinkler System pursuant to Subsection D., herein, is in sufficiently close proximity to a suitable paved surface, including, but not limited to, a street, and a hydrant to enable the Department to effectively charge an Automatic Fire Sprinkler System from a pumper located on the paved surface.

H. **Yard Fire Hydrants As A Part of Fire Loop.**

1. **Number of Required Yard Fire Hydrants.** Additional yard fire hydrants shall be provided around the perimeter of the building so that no yard fire hydrant is more than five hundred (500') feet from other approved yard fire hydrants measured by normal access routes.

2. **Setback Distances.** Yard fire hydrants shall be no more than five (5') feet from the curb or edge of the street or fire apparatus access. Alternative setback distances may be considered when site conditions conflict with the provisions of this Section.

3. **System Design.**
   a. **Valves.** Control valves shall be provided to limit the number of yard fire hydrants and/or Automatic Fire Sprinkler Systems affected by maintenance, repair or construction. Valves shall be located at street intersections and at no more than eight hundred (800) foot intervals, and sectional control valves shall be placed so that no more than a combination of yard fire hydrants and Automatic Fire Sprinkler Systems can be isolated between control valves. Valves shall be provided in each yard fire hydrant lead.

   b. **Outlet Position.** All yard fire hydrants shall be positioned so that the largest outlet faces the street or fire apparatus access route.

   c. **Yard Fire Hydrant Height Above Grade.** The center of the lowest outlet cap of the yard fire hydrants shall be at least eighteen (18") inches above grade and not more than twenty-three (23") inches above grade.

4. **Yard Fire Hydrant Specifications.** All yard fire hydrants shall meet the specifications of the Kenosha Water Utility.

5. **Bollards.** Yard fire hydrants shall be protected from vehicular traffic damage with bollards. The Bureau shall determine the number of bollards needed.

6. **Yard Fire Hydrant Colors.**
   a. Yard fire hydrants fed by municipal water shall be red in color.

   b. Yard fire hydrants fed by a fire pump shall be painted a solid yellow color, both barrel and caps.
c. No person shall alter the color or paint scheme of an approved private fire hydrant. That person or persons who alter the color of a fire hydrant identified above shall be in violation of this Chapter.

I. Installation Standards.

1. NFPA Standards. Approved Automatic Fire Sprinkler System equipment shall be installed in accordance with one (1) or more of the following NFPA standards as the Fire Chief may determine are applicable:
   a. NFPA #13, Standards for the Installation of Sprinkler Systems.
   b. NFPA #13D, Sprinkler Systems - One and Two-Family Dwellings.
   c. NFPA #13R, Sprinkler Systems in Residential Occupancies Up To and Including Four Stories in Height.
   d. NFPA #231, General Storage.
   e. Such other NFPA standards as the Fire Chief may determine are applicable.

2. Plans/Specifications Approval. No Automatic Fire Sprinkler System equipment shall be installed or altered in a building until plans have been submitted to and approved by the Chief of the Bureau of Fire Prevention. Three (3) copies of the plans and specifications shall be submitted for review. Approved plans shall be stamped "Approved By Bureau of Fire Prevention", together with the date of such approval.

3. Outdoor Rated Horn/Strobe Notifier. An outdoor rated horn/strobe notifier with an excess of 100 candle power shall be installed in lieu of the required bell. The normal placement is above the Fire Department connection, but shall be approved by the Fire Chief.

4. Water Flow Monitoring. All Automatic Fire Sprinkler Systems shall be monitored for water flow by a central or remote station pursuant to the current version of NFPA 72.

5. Underground Water Mains, Hydrants and Valves. Underground water mains, hydrants and valves shall conform to the current specifications of the City.

6. Testing. The Kenosha Water Utility will require such tests as may be required by applicable NFPA standards. Such tests shall be conducted under the supervision of a water utility representative who shall certify acceptance or rejection of the system.

   a. The Automatic Fire Sprinkler System shall have a hydrostatic test performed in the presence of a Fire Department Inspector.
   b. The Automatic Fire Sprinkler System shall be tested by flows of the main drain and Inspector's test. The installer, in the presence of a Fire Department Inspector, shall conduct the acceptance test.
   c. The installer shall provide a minimum of three (3) working days advanced notice to the Fire Department prior to performance of the final acceptance test.
   d. Any work or testing performed on sprinklers and underground supply shall be done by a duly licensed individual.

8. Maintenance. The owner or occupant of a building or structure containing a required Automatic Fire Sprinkler System shall maintain the system in an operative condition at all times. The owner or occupant of the building shall properly notify the Fire Chief, or designee thereof, in case such sprinkler protection becomes inoperative due to a breakdown. An Automatic Fire Sprinkler System may not be rendered inoperative, even for servicing, without the written permission of the Fire Chief, or designee, and then only for the duration of the time permitted. No such system, once installed for any reason shall be disconnected or shall cease to be maintained, should a building or structure cease to be occupied, in whole or in part, without first obtaining a permit to do so from the Fire Chief, or designee. Such permit shall not be issued if the building would become an unreasonable fire risk or burden upon the City's firefighting resources, if unprotected. All Automatic Fire Sprinkler Systems shall be tested annually to meet the requirement of NFPA 25. A person(s) or company holding a testers’ credential issued by the State of Wisconsin shall perform the tests.
J. Certification - Inspection/Occupancy. Every installer of an Automatic Fire Sprinkler System shall, upon completion, certify to the Fire Chief, or designee thereof, that installation was completed pursuant to the requirements of this Ordinance. Upon receipt thereof, the Fire Chief or designee, will inspect said installation and verify compliance or direct such appropriate action as required to secure compliance. No building or structure for which an Automatic Fire Sprinkler System is required shall be occupied or used for its intended purpose until compliance with this Ordinance is verified by the Fire Chief or designee. The Building Inspector shall not issue a Certificate of Occupancy for any building or structure until compliance with this Ordinance, where required, is verified.

K. Penalty. Any person or party violating any provision of this Ordinance shall, upon conviction, forfeit a sum not less than One Hundred ($100.00) Dollars nor more than One Thousand ($1,000.00) Dollars, plus costs and assessments required by law. Each day of violation shall be a separate offense.

3.24 FIRE DEPARTMENT STANDPIPES

A. Class Three Standpipe. A Class Three Standpipe will be installed in all buildings meeting one (1) or more of the following:

1. Any building of three (3) stories or more.
2. Any building having occupancy of one hundred (100) or more.
3. Any building with one floor of seven thousand five hundred (7,500) square feet or more in area.
4. Any building over one story in height and six thousand (6,000) square feet or more in area on a floor.

B. Approved Devices/Materials. All devices and materials used in standpipe systems shall be of approved type.

C. Other Standards and Specifications. All other standards and specifications will be taken from the current edition of NFPA Pamphlet #14, "Standards for the Installation of Standpipe and Hose Systems". The installation of a Automatic Fire Sprinkler System will not supersede the requirements for the installation of Fire Department standpipes.

D. Parking Structures. Any parking structure built whether aboveground or below ground will have a standpipe system approved by the Bureau prior to installation.

3.25 FIRE ALARMS

A. General. "Fire Alarm Systems" shall mean any device designed to sense or alert persons to the possible presence of fire. A Fire Alarm System may include, but is not limited to, smoke alarms, heat alarms, pullboxes, horns, and strobes and alarm panels. All Fire Alarm Systems shall be installed per NFPA 72. All required alarm systems (required per NFPA 101 or the orders of the Kenosha Fire Department) shall be monitored by an Underwriters’ Laboratory listed monitoring company. All Fire Alarm Systems require plan submittal. Plans and specifications shall accompany each submittal, including all applicable plan review and acceptance testing fees. Plans will be reviewed and conditionally approved by the Fire Prevention Bureau. All Fire Alarm Systems require a permit issued by the Department of Community Development and Inspections prior to the start of any work. The Kenosha Fire Department shall witness all field and acceptance testing.

B. Maintenance. The owner or occupant of a building or structure containing any Fire Alarm System shall maintain that system in an operative condition at all times, which shall include periods where the building may not be occupied. The occupant of the building shall notify the Fire Chief immediately in case the Fire Alarm System is rendered out of service for any reason. All Fire Alarm Systems shall be tested to meet the requirement of NFPA 72. A person(s) or company holding tester credentials issued by the State of Wisconsin shall perform the tests.

3.26 FIRE PROTECTION SYSTEMS

A. Application For Permit, Plans and Specifications.
1. General. No person may install, erect or construct any Fire Alarm System or Fire Suppression System, or add to, enlarge, move, improve, alter, convert, extend or demolish any existing Fire Alarm System or Fire Suppression System, or cause the same to be done, or commence any work covered by this Code on any Fire Alarm System or Fire Suppression System without first obtaining a Fire Alarm/Fire Suppression System Permit therefor from the Bureau. Such permit shall be issued in the name of the owner.

2. Applications For Fire Alarm/Fire Suppression System Permits. Applications for Fire Alarm/Fire Suppression System Permits shall be filed with the Bureau in writing on a form to be furnished for that purpose. Such application shall describe the property and/or structure upon which the proposed system is to be installed or work done, either by street number, lot, or similar general description which will readily identify and locate the site of the proposed installation or work, and shall show the use or occupancy of all parts of the building and such other pertinent information as may be required by the Bureau.

   The Bureau Chief or any Inspector of the Fire Department shall, as a condition of granting a Fire Alarm/Fire Suppression System Permit, have the right to enter the premises for which said permit was issued, at any reasonable time during and throughout the course of such work and until final approval thereof has been granted, for the purpose of inspecting said premises and the installation, modification, construction, repair, use and location of Fire Alarm/Fire Suppression Systems.

3. Plans and Specifications. Working plans and specifications showing the location of each component element of the proposed Fire Alarm System and/or Fire Suppression System, all drawings, manufacturers’ cut sheets for devices, calculations, material approvals, manufacturers’ listed installation and design manuals, pre-engineered design specifications, design specifications, and the manufacturer, model and type of each component element of such systems, shall accompany every application for a permit, and shall be filed in triplicate with the Bureau; provided, however, that the Bureau may authorize the issuance of a permit without plans or specifications for minor or inconsequential work.

   a. Plans submitted shall be drawn to scale on substantial paper. The submitted plans shall be working plans of sufficient clarity to indicate the nature and character of the work proposed and to show compliance with applicable regulations. Plans shall be prepared in accordance with the provisions of this Code, and shall bear the name of the architect, professional engineer, contractor or other person who prepared them.

   b. Specifications shall be in detail. Any specifications in which general expressions are used to the effect that "work shall be done in accordance with the Fire Code" or "to the satisfaction of the Bureau" shall be deemed incomplete. Every reference to the Fire Code shall be to the section or subsection applicable to the material to be used or to the method of construction proposed.

   c. Alterations to and/or modifications of an existing Fire Alarm System and/or Fire Suppression System may not, at the discretion of the Bureau, require a complete set of plans as set forth above; however, each such application for a permit shall include appropriate supporting documentation establishing that the proposed alterations/modifications comply with all appropriate Codes, Ordinances and standards.

B. Fire Alarm/Suppression System Permit.

1. Definition. The term "approved" as used in this Chapter shall mean approval granted by the Chief of the Fire Department or the Bureau under the regulations of this Chapter.

2. Plan Submission and Approval. When plans are required for approval, they shall be submitted in triplicate and work shall not be started until plans are approved, except by special permission to start work as issued by the Bureau. The plans submitted shall be working plans that are clear, legible and permanent. If the application, plans and specifications are in conformity with the requirements of this Code and all other laws or Ordinances applicable thereto, the Bureau shall, upon receipt of the required fee, grant a Fire Alarm/Suppression System Permit for said work and shall sign, date and endorse in writing or by rubber stamp all sets of submitted plans as "approved"; or, if approval is conditioned upon changes to the plan or compliance with other conditions, the plans may be stamped as "conditionally approved". In all such cases where plans are "conditionally approved", the Bureau shall return, with the approved plans, written notification of the conditions that must be satisfied. Whenever a submitted application is incomplete, the Bureau may suspend any action on such application and shall notify the applicant of the information needed to process such application.
3. **Modification/Alteration of Approved Plans.** Approved plans shall not be changed, and the work shall be installed as shown on the plans. There shall be no modifications or alterations made to approved plans without first obtaining written permission from the Bureau.

4. **Permit Term.** Fire Alarm/Suppression System Permits shall lapse and become void unless the work authorized thereby is commenced within one (1) year from the date thereof and completed or resumed within one (1) year from the date that construction begins. In the event of further construction after either of the latter of these time periods, a new permit must be obtained pursuant to all the requirements of the Code then in effect. The fees for such new permit shall be based upon the area (square footage of protected area) remaining to be done.

5. **Revocation.** If the Bureau shall find at any time that any provisions of this Code, the City of Kenosha Code of General Ordinances, laws, orders, plans and/or specifications are not being complied with, it may revoke the Fire Alarm/Fire Suppression System Permit by written notice stating the error or violation which has occurred. Said notice shall be served on the owner and the general contractor or his/her representative on the job; or, if there is no general contractor, on the person in charge of the work. Service of the notice shall be by either personal service or by mailing a copy of said notice to the address of said person as known to the Bureau. When any such permit is revoked, it shall be unlawful to do any further work until a new permit is issued, except such work as the Bureau shall order to be done as a condition precedent to issuance of a new permit, or which the Bureau may authorize as reasonably necessary to protect work already done on the job, existing property, adjoining property and the public. Additionally, the Bureau may pursue any other remedies for noncompliance with this Code as such remedies are set forth in the City of Kenosha Code of General Ordinances and/or the Wisconsin State Statutes.

6. **Correction of Errors.** The issuance or granting of a permit or approval of plans or specifications shall not be deemed or construed to be a permit for, or approval of, any violation of any of the provisions of this Code. If, subsequent to the issuance of a permit, errors are discovered in the application, plans, specifications or execution of the work, the Bureau may require the correction of said errors in said application, plans, specifications or construction. The Bureau may rescind the permit and prevent installation/work operations from continuing when in violation of this Code or any Ordinance of the City of Kenosha.

C. **Fee Schedule.**

1. **Scope.** The fees fixed in this Ordinance shall be assessed and collected by the Bureau for examination and approval of Fire Alarm System Plans and Fire Suppression System Plans. These fees also include the inspection of newly installed/remodeled Fire Alarm Systems and Fire Suppression Systems. These fees are collected in advance from the owner or agent. This fee schedule applies to plan review and inspections of buildings and premises within the City of Kenosha.

2. **Plan Examinations.**
   a. Plans showing design and construction details, design computations, and specifications submitted for examination and approval as herein required shall be accompanied by a fee in the amount determined in accordance with this Code.
   b. For the purpose of determining the fee on the basis of square footage, gross floor area measurements shall be taken from outside of building at each floor level, including basement and other areas affected or serviced by the proposed Fire Alarm System and/or Fire Suppression System. Except as otherwise specified in this Code, the appropriate fee for remodeling or adding to an existing system shall be determined by calculating the square footage of the area to be serviced.

3. **Fee Schedule.** Failure to obtain a permit before starting work shall result in the fee being doubled. This shall be in addition to any other penalties provided elsewhere in the Code of General Ordinances. Additionally, a penalty of One Hundred ($100.00) Dollars shall be assessed for each day any work requiring a permit occurs without first obtaining a permit, calculated from the date notice of violation is delivered to either the property owner or contractor performing the work, until such date the owner or contractor submits the proper plans in an approved format to the Bureau.
4. **New Systems.** Plan Review Fees for new systems shall be determined from time to time by Resolution of the Common Council upon the basis of the total square footage of each building or affected area.

D. **Plan Resubmittal.** A resubmittal fee of One Hundred Twenty-five ($125.00) Dollars shall be assessed for review of Fire Alarm System Plans and Fire Suppression System Plans that have been submitted following initial denial of plan approval, if the resubmission is within eight (8) months of the original denial.

A resubmittal fee of Fifty ($50.00) Dollars shall be assessed for revisions to previously approved plans, and plans that have been previously reviewed, but not denied.

E. **Alteration/Modifications To Existing Systems.** The fee for review of plans to existing systems shall be Fifty ($50.00) Dollars. Submittals with alterations of less than twenty-one (21) sprinklers shall have a Fifty ($50.00) Dollar fee. For these alterations, the descriptions of the type and scope of work, along with cut-sheets for any new sprinklers, shall be provided.

F. **Shell Buildings.** When an application is submitted for a property where the shell of the building has been completed, the fee will be calculated at fifty (50%) percent of the total fee for that particular fee group. When an application is submitted for construction of the interior of a building where the shell of the building has been previously granted a permit, the fees shall be based on the square footage of that space as a percentage of the entire square footage of the subject building and that fee shall be calculated at fifty (50%) percent of the total fee for that particular fee group.

G. **Multiple Identical Buildings.** Plans submitted for multiple buildings may be subject to a Multiple Identical Building Fee, which is less than the fee associated with the sum of the individual fees. In order to qualify for the Multiple Identical Building Fee, plans for all buildings shall be submitted at the same time. The fees for the submittal of plans for the first building shall be determined in accordance with the fee schedule established by the Common Council on the basis of the total gross floor area of one building. The fee for each of the remaining identical buildings shall be the higher of either One Hundred Twenty-five ($125.00) Dollars or twenty-five (25%) percent of the appropriate fee set forth by the Common Council.

H. **Certain Devices Subject To A Single Flat Fee.** The fee for review of plans for the installation of Fire Protection Systems such as Digital Alarm Communicator Transmitters (DACT), Fire Alarm System Dialers, kitchen hood extinguishing systems, dry chemical extinguishing systems, deluge sprinkler systems which protect openings in fire rate construction, fire detection devices that actuate fire doors/fire shutters, which are not part of any Fire Alarm System, and standpipe systems (not to include combined standpipe systems) shall be One Hundred Twenty-five ($125.00) Dollars for each type of system submitted. However, no additional fee shall be due if such devices are included as a component in a Fire Alarm or Fire Suppression Systems Plan which has been submitted to the Bureau.

3.27 **EXIT SIGNS IN PROXIMITY OF FLOOR**

Floor proximity exit signs as required in Paragraph 14.14.1.6 of NFPA 1, shall also be required in all habitable spaces in buildings of Groups A, B, M, E, and L, and in Subgroup R-1, R-2, and R-3. For good cause shown that compliance with this rule would be unduly burdensome for any existing building, upon petition to the Fire Chief by the responsible person, the Fire Chief may relieve the responsible person from compliance of this rule for all or particular spaces of an existing building.

3.28 **PERMANENT ROOF ANCHORAGE REQUIRED**

Responsible parties for any building which is over three (3) stories shall install and maintain anchorages on the roof of each such building in a number and manner to provide firefighting connection to allow for access to each point of potential emergency rescue, including, but not limited to, all windows, platforms, and all other points of emergency egress, which points of potential emergency rescue are located above the second story above a location that a ladder fire truck could reasonably be positioned. Anchorages required herein shall be of a type used for attachment of personal fall arrest equipment and capable of supporting at least five thousand (5,000 lbs.) Pounds (22.2 kN), and shall be approved by the Fire Department in advance of installation. Anchorages shall be inspected annually and after each use.

The taxpayers of the City bear the financial burden for the upkeep of the rights-of-way and a primary cause for the early and excess deterioration of the public rights-of-way is the frequent excavation by Person who place facilities therein.

The City finds that there has been an increase in the use of the public rights-of-way and, as a result, increased costs to the taxpayers of the City and that these costs are likely to continue into the foreseeable future.

This ordinances imposes reasonable regulations on the placement and maintenance of facilities currently within in rights-of-way or to be placed therein at some future time. It is intended to complement the regulatory roles of state and federal agencies.

This ordinance provides for the health, safety and welfare of the residents of the City as they use the rights-of-way of the City, as well as to ensure the structural integrity of the public rights-of-way.

repairing such opening. Such bond shall be further conditioned that he will observe the provisions of all
State Laws, Ordinances, Rules and Regulations governing the issuance of permits under this Section.
Such bonds may be filed individually for each excavation, or an annual bond may be given covering all
excavation work done by the principal for one year, beginning January 1st.

g. The Department shall not deny a registrant an excavation permit because of a dispute between
the City and the registrant, related to Section 5.04 H.1.c.(2) and/or Section 5.04 H.1.c.(3) if
(1) the dispute has been adjudicated in favor of the registrant;

I. Excavation Permit Fee.

1. Fee Calculation. The excavation permit fee shall be established by the Department and shall
be made payable to the City of Kenosha prior to the issuance of the permit. The Common Council will, from
time to time, by resolution, establish the permit fee in an amount sufficient to recover the costs incurred by
the City. This fee shall recover costs incurred by the City for each of the following categories as provided
herein:

a. Administrative: The general formula for computing the administrative fee shall be the average
per-permit costs for labor plus indirect and other costs.

b. Repair: No repair fee shall be collected by the City. However, the permittee shall be required to
repair the public right-of-way to Department specifications, subject to inspection and acceptance by the
Department, pursuant to Section 5.04 J. below, and to pay a degradation fee.

c. Degradation: The general formula for computing the degradation fee shall be the cost per
square yard for street, overlay and seal coat multiplied by the appropriate depreciation rate for that street
multiplied by the area of the patch.

The area of the patch shall generally be square and calculated by adding two feet to each side of
the anticipated street cut and then, at the option of the Department, extending to the full pavement lane
width. Depreciation schedules shall be provided by type of street.

The total excavation permit fee shall be calculated as follows: Total Excavation Permit Fee =
Administrative Cost + Degradation Fee.

2. **Exemption.** The City, the Kenosha Water Utility and their contractors shall not pay administrative and degradation fees. County shall not be required to pay administrative and degradation fees so long as such work is performed pursuant to a contract between the City and County.

3. **Payment of Permit Fees.** No excavation permit shall be issued without payment of applicable fees.

4. **Fee Computation.** The Department may recalculate and establish a new fee structure each year.

5. **Non-refundable.** Permit fees paid for a permit that the Department has revoked pursuant to Section 5.04 P. below are not refundable. If the excavation defined in the excavation permit does not proceed, upon return of the permit to the Department the degradation fee may be refunded upon approval of the Department. However, the Administrative Cost is not refundable.

J. **Right-of-way Repair.**

1. The work to be done under the excavation permit, and the repair of the right-of-way as required herein, must be completed within the dates specified in the permit, increased by as many days as work could not be done because of circumstances beyond the control of the Permittee or when work was prohibited as unseasonable or unreasonable under Section 5.04 P. below.

2. In addition to repairing its own work, the Permittee must repair the general area of the work, and the surrounding areas, including the paving and its foundations, to the specifications of the Department. The Department shall inspect the area of the work and accept the work when it determines that proper repair has been made, per specifications of the Department.

3. **Standards.** The Permittee shall perform repairs according to the specifications of the Department and/or in accordance with the conditions specified in the permit. The Department shall have the authority to prescribe the manner and extent of the repair and may do so in written procedures of general application or on a case-by-case basis.

4. **Guarantees.** The Permittee guarantees its work and shall maintain it for thirty-six (36) months following its completion, except for organic material, which shall be maintained for twelve (12) months. During either period, the Permittee shall, upon notification from the Department, correct all repair work to the extent necessary, using the method required by the Department. Said work shall be completed within ten (10) calendar days of the receipt of the notice from the Department, not including days during which work cannot be done because of circumstances constituting force majeure or days when work is prohibited as unseasonable or unreasonable under Sec. 16-119.

5. **Failure To Repair.** If the Permittee fails to repair the right-of-way in the manner and to the condition required by the Department, or fails to satisfactorily and timely complete all repair required by the Department, the Department at its option may do such work. In that event the Permittee shall pay to the City, within thirty (30) days of billing, the cost of repairing the right-of-way. If the Permittee fails to pay as required, the City may exercise its rights under the repair bond.

K. **Inspection.**

1. **Notice of Completion.** When the work under any permit issued hereunder is completed, the Permittee shall notify the Department.

2. **Site Inspection.** The Permittee shall make the work site available to the Department and to all others as authorized by law for inspection at all reasonable times during the execution of and upon completion of the work.

3. **Authority of Department.** At the time of inspection, the City may order the immediate cessation of any work that poses a threat to the life, health, safety, or well-being of the public. The City
may issue an order to the registrant for any work that does not conform to the applicable standards, conditions, or codes. The order shall state that failure to correct the violation will be cause for revocation of the permit. Within ten (10) days after issuance of the order, the registrant shall present proof to the Department that the violation has been corrected. If such proof has not been presented within the required time, the Department may revoke the permit pursuant to Section 5.04 P. below.

**L. Fall Radius/Breakaway Requirements.**

1. Poles and other utility structures over 60 feet in height shall be located so that all residential, commercial, retail, manufacturing or other occupied buildings are outside the fall radius of the structure.

2. Rigid non-breakaway poles and other utility structures shall be located a minimum of 2’ clear from face of roadway curbs, 2’ clear from edge of sidewalk, 10’ clear from edge of traveled way behind shoulders and behind existing or future sidewalks.

**M. Joint Applications.**

1. **Joint Application.** Registrants may jointly apply for permits to excavate the right-of-way at the same place and time.

2. **With City Projects.** Registrants who join in a scheduled excavation performed by the City, whether or not it is a joint application by two or more registrants or a single application, are not required to pay the degradation portion of the excavation permit fee.

3. **Shared Fees.** Registrants who apply for permits for the same excavation, which the Department does not perform, may share in the payment of the excavation permit fee. Registrants must agree among themselves as to the portion each will pay and indicate the same on their applications.

**N. Supplementary Applications.**

1. **Limitations on Area.** An excavation permit is valid only for the area of the right-of-way specified in the permit. No Permittee may perform any work or excavate outside the area specified in the permit, except as provided herein. Any Permittee which determines that an area greater than that specified in the permit must be excavated shall, before working in that greater area (1) make application for a permit extension and pay any additional fees required thereby and (2) be granted a new permit or permit extension.

2. **Limitation on Dates.** An excavation permit is valid only for the dates specified in the permit. No Permittee may begin its work before the permit start date or, except as provided herein, continue working after the end date. If a Permittee does not finish the work by the permit end date, it must apply for a new permit for the additional time it needs and receive the new permit or an extension of the old permit before working after the end date of the previous permit.

3. **Fees for Supplementary Applications.** A Permittee shall pay administration costs for any additional permits. A Permittee is not required to pay an additional degradation fee for the same excavation, if such fee has already been paid on the original permit.

**O. Other Obligations.**

1. **Compliance with Other Laws.** Obtaining a permit to excavate and/or occupy the right-of-way does not relieve a Permittee of its duty to obtain all other necessary permits, licenses, and authority and to pay all fees required by any other City, county, State, or Federal rules, laws or regulations. A Permittee shall comply with all requirements of local, state, and federal laws. A Permittee shall perform all work in conformance with all applicable codes and established rules and regulations, and is responsible for all work done in the right-of-way pursuant to its permit, regardless of who does the work.

2. **Prohibited Work.** Except in an emergency, or with the approval of the Department, no right-of-way excavation may be done when seasonally prohibited or when conditions are unreasonable for such work.
3. **Barriers and Warnings.** Any person opening, excavating, or occupying any street, sidewalk or alley, shall place proper and sufficient barriers and guards about the same as outlined in the "Manual of Traffic Controls for Street Construction and Maintenance Operations" on file in the office of the Director of Public Works. Said manual is intended to be as much a part of the Ordinance as if it were printed in total. During the hours of dusk and darkness, adequate and sufficient warning lights shall be placed and maintained about the same. No person shall interfere with or remove such barriers, guards, or lights.

4. **Placement of Spoil Material.** In opening any street or other public way, all paving or base material shall be removed with the least possible loss of or injury to surfacing material and, together with the excavated material from trenches, shall be placed so as to cause the least practicable inconvenience to the public and permit free flow of water along gutters.

5. **Contractors Equipment and Operations.** All machinery and equipment shall be locked or otherwise effectively safeguarded from unauthorized use when not being used by the permittee, his agents or employees. Except by special permission of the Director of Public Works, no trench shall be excavated more than 100 feet in advance of pipe laying, nor left unfilled more than 200 feet where pipe has been laid. When the side of the trench will not stand perpendicular, sheathing and bracing must be used to prevent caving. No timber, bracing, lagging sheathing, or other lumber shall be left in any trench. All necessary precautions shall be taken to guard the public effectively from accidents or damage to persons or property through the period of the work. Each person making such opening shall be held liable for all damages including costs incurred by the City in defending any action brought against it for damages, as well as cost of any appeal, that may result from the neglect by such persons or his employees of any necessary precaution against injury or damage to persons, vehicles, or property of any kind.

6. **Backfill and Surfacing.** All openings or excavations in a street shall be backfilled with sand or gravel, meeting specifications on file in the office of the City Engineer. In refilling the opening, backfill material shall be placed in layers not exceeding 6 inches in depth and each layer rammed, or tamped, or flushed to prevent after-settling. The permittee shall notify the Department of Public Works prior to commencing backfilling, and shall only backfill while a City Inspector is present.

When a pavement opening is made in an arterial or major street, a temporary asphalt patch shall be placed by the permittee upon completion of the backfill.

All permanent pavement repairs shall be made by the City of Kenosha, unless authorized by the Director of Public Works, and all costs of maintenance and reconstruction work shall be charged to the applicant. All spoil material and rubbish shall be immediately removed, leaving the street or way in perfect repair.

No permit for pavement or sidewalk opening shall be issued to any person if any such charge for maintenance and reconstruction work remains due and unpaid.

7. **Excavations in New Streets Limited.** The Common Council shall approve the permanent improvement or repaving of streets not less than 30 days before the work of permanent improvement or paving shall begin. Following such approval by the Common Council, the City Engineer shall notify in writing each person, utility, City department, or other agency owning or controlling any sewer, water main, conduit, or other utility in or under said street, of the intent of the City of Kenosha to permanently improve or repave said street, and that all excavation work in said street shall be coordinated with and scheduled by the City Engineer to obtain a reasonable completion of the work. After such permanent improvement or repaving no permit shall be issued to open, cut or excavate said street for a period of 5 years after the date of improvement, or repaving unless in the opinion of the City Engineer an emergency exists which makes it necessary that the permit be issued or the permit is necessary to facilitate a city approved development agreement. Notwithstanding the foregoing prohibition and subject to the approval of the City Engineer, upon request a portion of the curb and gutter may be temporarily removed from existing joint to existing joint to provide driveway access to any adjacent parcels of property to facilitate development of the adjacent property. Restoration of the curb and gutter shall be a condition of approval.

8. **Special Conditions.** Permits for street openings in "through" streets as outlined in Section 7.03 of the Code of General Ordinances on street openings lying within 500 feet of any school, hospital
nursing home, or similar institution, will be issued conditionally upon the presence of a City Inspector at the job site during the performance of any and all work. The permittee shall pay all costs of such inspection.

P. Revocations, Suspensions, Refusals To Issue or Extend Permits.

1. Grounds. The Department may refuse to issue a permit or may revoke, suspend or refuse to extend an existing permit if it finds any of the following grounds:

   a. The applicant or Permittee is required by Section 5.04 D. to be registered and has not done so or the permit application is otherwise incomplete;

   b. The applicant or Permittee is seeking to perform work not included in its construction and major maintenance plan; which work was reasonably foreseeable by the applicant or Permittee at the time said plan was filed;

   c. Issuance of a permit for the requested date would or interfere with an exhibition, celebration, festival, or other event;

   d. Misrepresentation of any fact by the applicant or Permittee;

   e. Failure of the applicant or Permittee to maintain required bonds and/or insurance;

   f. Failure of the applicant or Permittee to complete work in a timely manner;

   g. The proposed activity is contrary to the public health, safety or welfare;

   h. The extent to which space is available in the right-of-way for which the permit is sought;

   i. The competing demands for the particular space in the right-of-way;

   j. The availability of other locations in the right-of-way or in other rights-of-way for the facilities of the Permittee or applicant;

   k. If the Permittee or applicant proposes to install a new pole or tower in the right-of-way, the availability of other existing poles or towers owned by the Permittee or applicant or by a third party;

   l. The applicability of ordinances or other regulations of the right-of-way that affect location of facilities in the right-of-way;

   m. The condition and age of the right-of-way, and whether and when it is scheduled for total or partial reconstruction; or

   n. The applicant or Permittee is otherwise not in full compliance with the requirements of this chapter or state or federal law.

2. Discretionary Issuance. Notwithstanding Sub. (a)(2), the Department may issue a permit where issuance is necessary (a) to prevent substantial economic hardship to a customer of the Permittee or applicant, or (b) to allow such customer to materially improve its Public Utility service, or (c) to allow the Permittee or applicant to comply with state or federal law or City ordinance or an order of a court or administrative agency.

3. Appeals. Any person aggrieved by a decision of the Department revoking, suspending, refusing to issue or refusing to extend a permit may, within ten (10) days of the Department's decision being issued, file a written request with the Department seeking a review of the decision by the Municipal Services Committee. Following a hearing the Municipal Services Committee may affirm, reverse or modify the decision of the Department. The decision of the Municipal Services Committee is final.
4. Time Limit to Act And Written Denial. The City shall approve or deny a permit application no later than sixty (60) days after receipt of the application. If the City fails to act on the application within that sixty (60) day period, the application shall be deemed granted and the City shall issue the permit to Applicant. If the City denies a permit application, the City shall provide Applicant with a written explanation of the reason for the denial at the time the City denies the application. See Wis. Stat. § 182.017(9).

Q. Work Done Without a Permit.

1. Emergency Situations. In the event of an emergency, any person owning or controlling any sewer, water main, conduit or other utility in or under any street, and his agents or employees may take immediate proper emergency measures to remedy dangerous conditions for the protection of property, life, health or safety without obtaining an Excavation Permit, provided that such person shall apply for an excavation permit not later than the end of the next succeeding business day, and shall not make any permanent repairs without first obtaining an Excavation Permit hereunder. If the City becomes aware of an emergency regarding a registrant's facilities, the Department may attempt to contact the local representative of each registrant affected. The City may take whatever action it deems necessary to protect the public safety as a result of the emergency, the cost of which shall be borne by the registrant whose facilities occasioned the emergency.

2. Non-Emergency Situations. Except in an emergency, any person who, without first having obtained the necessary permit, excavates a right-of-way must subsequently register and apply for an excavation permit, and shall in addition to any penalties prescribed by ordinance, pay five times the normal fee established by the Common Council by Resolution for said permit, pay all other fees required by this chapter or other chapters of the City Code, deposit with the Department the fees necessary to correct any damage to the right-of-way and comply with all of the requirements of this chapter. If a subsequent permit is denied or is not approved, the registrant shall discontinue and abandon its facilities and the Department may cause any offending conditions to be removed or corrected and the expense thereof charged to the person responsible.

R. Supplementary Notification. If the excavation of the right-of-way begins later or ends sooner than the date given on the permit, the Permittee shall notify the Department of the accurate information as soon as this information is known.

S. Location of Facilities.

1. Undergrounding. Unless in conflict with state or federal law, except when existing aboveground facilities are used, the installation of new facilities and replacement of old existing facilities shall be done underground or contained within buildings or other structures in conformity with applicable codes.

2. Corridors. The Department may assign specific corridors within the right-of-way, or any particular segment thereof as may be necessary, for each type of facility that is or, pursuant to current technology, the City expects will someday be located within the right-of-way. All excavation, obstruction, or other permits issued by the City involving the installation or replacement of facilities shall designate the proper corridor for the facilities at issue consistent with the Department’s assignment.

Any registrant who has facilities in the right-of-way in a position at variance with the corridors established by the City shall, no later than at the time of the next reconstruction or excavation of the area where the facilities are located, move the facilities to the assigned position within the right-of-way, unless this requirement is waived by the City for good cause shown, upon consideration of such factors as the remaining economic life of the facilities, public safety, customer service needs and hardship to the registrant.

3. Limitation of Space. To protect health, safety, and welfare, or when necessary to protect the right-of-way and its current use, the Department may prohibit or limit the placement of new, replacement or additional facilities within the right-of-way if there is insufficient space to accommodate all of the requests of Persons to occupy and use the right-of-way. In making such decisions, the Department/City shall strive to the extent possible to accommodate all existing and potential users of the right-of-way, but shall be guided primarily by considerations of the public interest, the public’s needs for the particular utility service, the
condition of the right-of-way, the time of year with respect to essential utilities, the protection of existing facilities in the right-of-way, and future City plans for public improvements and development projects which have been determined to be in the public interest.

T. Relocation of Facilities. Except as prohibited by State or Federal law, a registrant must promptly and at its own expense, with due regard for seasonal working conditions, permanently remove and relocate its facilities in the right-of-way whenever the Department requests such removal and relocation, and shall restore the right-of-way to the same condition it was in prior to said removal or relocation. The Department may make such request to prevent interference by the Company’s facilities with (i) a present or future City use of the right-of-way, (ii) a public improvement undertaken by the City, (iii) an economic development project in which the City has an interest or investment, (iv) when the public health, safety and welfare require it, (v) when necessary to prevent interference with the safety and convenience of ordinary travel over the right-of-way, (vi) future development resulting in building(s) located within fall zones, (vii) when necessary to prevent interference with other existing communication service providers, or (viii) existence of stray voltage.

Notwithstanding the foregoing, a person shall not be required to remove or relocate its facilities from any right-of-way which has been vacated in favor of a non-governmental entity unless and until the reasonable costs thereof are first paid to the person therefor.

U. Interference with Other Facilities During Municipal Construction. When the City performs work in the right-of-way and finds it necessary to maintain, support, shore, or move a registrant’s facilities, the City shall notify the local representative. The registrant shall meet with the City’s representative within 24-hours and coordinate the protection, maintenance, supporting, and/or shoring of the registrant’s facilities. The registrant shall accomplish the needed work within 72 hours, unless the City agrees to a longer period. In the event that the registrant does not proceed to maintain, support, shore, or move its facilities, the City may arrange to do the work and bill the registrant for costs it incurs as well as damages of $100 per day beyond the registrant’s 72 hour deadline to accomplish the needed work, said bill to be paid within thirty (30) days.

V. Indemnification. By registering with the City, or by accepting a permit under this chapter, a registrant or Permittee, as the case may be, agrees to indemnify, defend, and hold harmless the City, its officers, boards, committees, commissions, elected officials, employees and agents (collective, "Indemnified Parties"), from and against all loss or expense (including liability costs and attorney’s fees) by reason of any claim or suit, or of liability imposed by law upon an Indemnified Party for damages because of bodily injury, including death at any time resulting therefrom, sustained by any person or persons or on account of damages to property, including loss of use thereof, arising from, in connection with, caused by or resulting from the permittee’s acts or omissions in the exercise of its rights under this permit, whether caused by or contributed to by the City or its agents or employees except in such cases where caused by the sole negligence or willful misconduct of the City.

W. Abandoned Facilities.

1. Discontinued Operations. A registrant who discontinues its operations in the City must either:

   a. Provide information satisfactory to the Department that the registrant’s obligations for its facilities under this chapter have been lawfully assumed by another registrant; or

   b. Submit to the Department a proposal and instruments for dedication of its facilities to the City. If a registrant proceeds under this clause, the City may, at its option:

      (1) accept the dedication for all or a portion of the facilities; or

      (2) require the registrant, at its own expense, to remove the facilities in the right-of-way at ground or aboveground; or

      (3) require the registrant to post a bond or provide payment sufficient to reimburse the City for reasonably anticipated costs to be incurred in removing the facilities.
However, any registrant who has unusable and abandoned facilities in any right-of-way shall remove it from the right-of-way within two years, unless the Department waives this requirement.

2. Abandoned Facilities. Facilities of a registrant who fails to comply with Section 5.04 W.1., and which, for two (2) years, remains unused shall be deemed to be abandoned. Abandoned facilities are deemed to be a nuisance. In addition to any remedies or rights it has at law or in equity, the City may, at its option (i) abate the nuisance, (ii) take possession of the facilities, and/or (iii) require removal of the facilities by the registrant, or the registrant’s successor in interest.

3. Public Utilities. This section shall not apply to a Public Utility that is required to follow the provisions of Wis. Stat. § 196.81.

X. Reservation of Regulatory and Police Powers. The City, by granting of a permit to excavate, obstruct and/or occupy the right-of-way, or by registering a person under this chapter does not surrender or to any extent lose, waive, impair, or the lawful powers and rights, which it has now or maybe hereafter granted to the City under the Constitution and statutes of the State of Wisconsin to regulate the use of the right-of-way by the Permittee; and the Permittee by its acceptance of a permit to excavate, obstruct and/or occupy the right-of-way or of registration under this chapter agrees that all lawful powers an rights, regulatory power, or police power, or otherwise as are or the same may be from time to time vested in or reserved to the City, shall be in full force and effect and subject to the exercise thereof by the City at any time. A Permittee or registrant is deemed to acknowledge that its rights are subject to the regulatory and police powers of the City to adopt and enforce general ordinances necessary to the safety and welfare of the public and is deemed to agree to comply with all applicable general law, and ordinances enacted by the City pursuant to such powers.

Y. Obstructions and Encroachments.

It shall be unlawful to hold a Street Party under circumstances where barricades do not completely block off vehicular traffic from the portion of the Street being closed by authority of said permit. If the street is barricaded during hours which require vehicles to use their headlights, warning lights or reflectors must be clearly and visibly placed and maintained on said barricades by the permit applicant, and it shall be unlawful to neglect to have operating lights or reflectors on said barricades. Amplified music is herein defined as music electrically or mechanically enhanced by an external source of power or amplifier and played or reproduced through a speaker or speaker system. Street Parties may be prematurely terminated by order of a police officer following an investigation which indicates that the Street Party has become loud, disorderly, is creating a public nuisance, disturbing the peace, endangering the public health, safety or welfare, or otherwise being conducted contrary to the terms of this Ordinance or other City or State ordinances, laws, rules or regulations. It shall be unlawful for anyone to participate in a Street Party contrary to an above provided for order of a police officer or contrary to the terms of this Ordinance.

If the construction becomes unsafe in the opinion of the Department, he or she may order the same removed or repaired within 10 days. If the condition remains unremedied after that time, the City may do what is necessary and place the cost thereof on the tax roll against the owner of the abutting property.

5. Temporary Street Closures. The Department may temporarily close any portion of any City controlled public thoroughfare for public safety or welfare purposes upon such conditions as the Department deems necessary in the exercise of his or her discretion. The temporary closure may not exceed thirty continuous days, unless the Department deems that there are extraordinary circumstances warranting additional closure beyond the thirty days.

6. Construction Site. A General Contractor may not allow or permit any vehicle to drop, deposit or track mud or dirt from a construction site onto the public street. The General Contractor shall be responsible for seeing that the public street is cleaned immediately of all mud or dirt deposited on such street. A six (6) month extension of said time may be procured for good cause if an application therefor is applied for before the expiration of the six (6) month period of time heretofore specified.

C. Design Criteria for Parking Facilities. The following shall be the Design Criteria for Parking Facilities, including multilevel parking lots:

1. Conformance with requirements of the City Zoning Ordinance, City General Ordinances and State laws, rules and regulations. Where applicable, Conditional Use Permits must be obtained and screening in conformance with the Zoning Ordinance must be provided.

2. Parking spaces must be reserved for the physically handicapped and disabled in accordance with State and City laws, rules and regulations and appropriately marked as such.

3. The standard dimensions for a parking space shall be nine (9') feet in width and eighteen (18') feet in length. Dimensions for other space widths are given in Tables 1 and 2 where appropriate. The space width(s) used is subject to the approval of the City Traffic Engineer. A maximum of twenty-five (25%) percent of the parking spaces required may be marked for small vehicles, provided that these spaces are designed in accordance with Table 2, are conveniently located, and are clearly identified and properly controlled for use only by small vehicles. "Small vehicle" is defined to mean any automobile or truck sixteen (16') feet or less in length. The location and control of small vehicle parking spaces is subject to the approval of the City Traffic Engineer.

4. The design of all parking facilities shall conform to the minimum dimensions specified in Tables 1 and 2. For any given parking angle between twenty (20°) degrees and ninety (90°) degrees not specifically listed in the Tables, use a table angle nearest the given angle. When two (2) rows of stalls use the same drive aisle for access requiring two-way traffic because of space layout, the drive aisle shall be either eighteen (18') feet in width or that which is called for in Tables 1 and 2, whichever is greater.

5. The location of parking spaces, direction of traffic and notation of two-way and one-way traffic shall be clearly marked in a highly visible manner.

6. Driveway entrances and exits shall be in accordance with the requirements of Tables 1 and 2 and shall be at the location specified in a Driveway Approach Permit.

7. Surface water must not be permitted to drain upon any abutting property without the written consent of such landowner.

8. The surface of the Parking Facility shall be permanently improved with Portland Cement concrete, paving brick or with bituminous concrete pavement and must be maintained in a dust free
condition to the extent possible.

9. No parking space shall extend closer than two (2') feet to any abutting property line or to the line
of any right-of-way and a substantial and permanent bumper shall be placed so as to separate motor
vehicles from abutting property lines or from the line of any street right-of-way so as to prevent the motor
vehicle from crossing said lines.

10. No parking stall shall be located so as to require a vehicle, upon exiting, to back into any
public right-of-way, except alleys may be used for ingress and egress into the Parking Facility provided the
setbacks as established in Tables 1 and 2 are complied with.

11. The internal traffic circulation of a Parking Facility shall be such that vehicles are not required
to back up, except for exiting a parking stall.

12. Illumination of a Parking Facility shall be such as not to cast light rays directly onto any public
right-of-way or adjacent property. Illumination shall be in accordance with specifications on file in the Office
of the City Department of Public Works.

13. Conformance with specifications therefor on file in the Office of the City Department of Public
Works.

14. Any other design requirement imposed by the Director of Public Works.

(See Appendix - Table 1)
(See Appendix - Table 2)

D. Penalty. Any person, party, firm or corporation who shall violate this Ordinance, shall upon
conviction thereof, forfeit not more than Five Hundred ($500) Dollars, plus the cost of prosecution. If such
forfeiture and costs are not promptly paid, the violator shall be imprisoned in the County Jail for a period not
to exceed ten (10) days. Each day of violation shall be a separate offense.

residential structure of one or two dwelling units having fewer than five (5) off-street parking spaces.

12. **Type "B" Site** shall mean all property, whether one or more contiguous lots or parts of lots, which does not meet the definition of a Type "A" site.

### B. Driveway Approach Permits.

1. **Permit Requirement.** No person, party, firm or corporation may construct, modify, destroy or remove a driveway approach within the City or cut into any curb within the City for the purpose of constructing a driveway approach, without first having obtained a Driveway Approach Permit from the Director of Public Works. A Driveway Approach Permit shall only authorize such work to be done at a specified location, during a specified period of time, and it shall not be a substitute for a license under §5.05 B., Ordinances, where one is required.

2. **Permit Application.** Applications for a Driveway Approach Permit shall be made on City authorized forms and filed with the Director of Public Works. Application forms shall be signed by the owner(s) of the land to be served by a driveway approach. Where land was sold under a land contract, only the buyer need sign the application form. Attached to an application form for a Class II or Class III Driveway Approach Permit shall be a plan on a single sheet of paper drawn to a scale of one (1") inch equals twenty (20') feet, indicating the proposed driveway approach, including the flare thereof, any existing driveway approach, the property lines of applicant's property and any building or structures thereon, any private designated traffic lanes on applicant's property with markings showing the direction of traffic flow, the width of the abutting public right-of-way and the width of any portion thereof reserved for motor vehicle traffic, the location of any intersecting streets or alleys within three hundred (300') feet of the driveway approach, the location of driveway approaches on abutting property, the surface treatment of the driveway approach, the rate of slope or grade of the driveway approach, the location of utility poles, fire hydrants, trees and other structures or obstructions within the portion of the public right-of-way abutting applicant's property which is not used or to be used for motor vehicle traffic.

3. **Permit Fee.** The Common Council will, from time to time, by Resolution, establish the Permit Fees for new Driveway Approaches and the repair or widening of existing Driveway Approaches, which shall be payable upon application and nonrefundable. Should any such work be commenced prior to the issuance of a permit, the fee shall increase to five (5) times the amount of the fee established by the Common Council by Resolution.

4. **Permit Duration.** Permits granted shall be in effect for six (6) months, during which time all proposed work must be completed. A three (3) month extension of said time may be procured for good cause if an application for an extension therefor is applied for before the original permit expires.

### C. Permit Conditions and Criteria.

1. Discontinued driveway approaches must be removed and curb and gutter installed in place thereof.

2. A driveway approach serving a Type "B" site will be approved only if the driveway approach can be used as such without motor vehicles being necessitated to be backed into any arterial or collector street.

3. The Director of Public Works must be notified of the completion of the construction of any driveway approach within two (2) working days thereafter, for the purpose of the inspection thereof.

4. The number of driveway approaches shall be limited as follows:
   a. A maximum of two (2) driveway approaches shall be permitted to a Type "A" site.
   b. A maximum of two (2) driveway approaches from each of any one or two abutting streets shall be permitted to a Type "B" site or to a Type "A" site where more than two (2) separate buildings containing dwelling units are located on the same site.
   c. However, the Director of Public Works may, when there is no adverse effect upon traffic on abutting streets as determined by the Traffic Engineer, authorize additional driveway approaches, subject to the following guidelines:
      (1) One (1) additional driveway approach along a continuous site frontage in excess of six hundred
(600) feet or two (2) additional driveway approaches along a continuous site frontage in excess of
twelve hundred (1,200) feet.

(2) One (1) additional driveway approach from each of not more than two (2) abutting streets where
continuous frontage is less than six hundred (600) feet; provided that such additional
approach(es) be used exclusively as a service drive for the purpose of loading or unloading
materials or merchandise, and which drive is physically separate from other off street vehicle
facilities and not available to customers thereof through the use of a six (6") inch high raised
rolled asphalt, or poured in place concrete, curb or a guardrail erected eighteen (18) inches in
height to the center measured from the paved parking surface.

(3) One (1) or two (2) driveway approaches per additional abutting streets.

5. The location of driveway approaches shall be subject to the following:
   a. No entrance shall be closer than fifteen (15') feet to the right-of-way line of an intersecting street,
      provided that no part of any driveway approach shall encroach on any intersection turning area (curb
      radius). Alleys shall be exempt from this provision and may be defined as "approaches," provided that the
      total maximum dimensions shall not exceed those permitted for other "approaches" in the same class.
      Where the alley is not included, the entrance must be a minimum of five (5') feet from the nearest boundary
      line of the alley.
   b. No entrance shall be closer than one-half (1/2) foot to an abutting property line. This requirement
      shall not apply when adjacent property owners sign a joint application for a Driveway Approach Permit to
      service abutting driveways.
   c. Any two (2) entrances to the same lot shall be at least ten (10') feet apart.
   d. All driveway approaches shall be so located as to provide adequate sight distance in both
      directions along the street for safe access to the street without interfering with vehicular and pedestrian
      traffic on the street or sidewalk.

6. The maximum and minimum specifications for driveway approaches shall be as follows:
   a. Class I
      Maximum permitted width of entrance ................................................. 20 feet
      Minimum permitted width of entrance ................................................. 8 feet
      Maximum permitted curb cut ............................................................... 25 feet
      Minimum permitted curb cut ............................................................... 13 feet
      Maximum flare ................................................................. 25 feet

   b. Class II*
      Maximum permitted width of entrance ................................................. 30 feet
      Minimum permitted width of entrance ................................................. 18 feet
      Or two entrances of 10 feet minimum under one-way operation.
      Maximum permitted curb cut ............................................................... 40 feet
      Minimum permitted curb cut ............................................................... 28 feet
      Maximum flare ................................................................. 5 feet

   c. Class III
      Maximum permitted width of entrance ................................................. 40 feet
      Minimum permitted width of entrance ................................................. 35 feet
      Maximum permitted curb cut ............................................................... 70 feet
      Minimum permitted curb cut ............................................................... 65 feet
      Maximum flare ................................................................. 15 feet

*Minimum permitted entrance width is ten (10) feet when serving twelve (12) or fewer vehicle
parking spaces at a multiple-dwelling unit facility.

7. An application for a Class III driveway approach may be approved only if plans are submitted by
   the applicant showing that the requested driveway approach will be used nearly exclusively by semitrailers
   and/or buses serving the site, and that other driveway approaches intended for the exclusive use by
   smaller vehicles will not be used by semi-trailers and/or buses, and, further, that the use of the property is
   for business, industrial or manufacturing purposes.

8. The following special design features may be permitted at high-volume driveway approaches, if
approved by the Director of Engineering Services/City Engineer and City Traffic Engineer:

**a.** One (1) or more driveway approaches may be replaced by a street-type entrance. The cost of additional drainage structures necessitated by such entrance(s) shall be borne by the permittee.

**b.** One (1) or more driveways to a major traffic generator may be replaced with special geometrically designed approaches and entrances where such generated traffic volumes and turning movements are in such numbers as to significantly reduce the capacity of the adjacent street and/or pose a hazard to through traffic on the adjacent street. These special geometrically designed approaches and entrances include, but are not limited to, speed change lanes, median crossovers, traffic islands and special driveway approach design treatments. The owner of the traffic generator shall be financially responsible for the cost of the special geometrically designed approaches, street lighting, traffic signals, and conduit necessitated at such approaches and entrances.

**c.** Right-of-way areas adjacent to driveway approaches shall be left undisturbed. A drawing accompanying the application shall show exactly how encroachment on such adjacent areas is to be prevented. If encroachment develops a need for additional protection, it shall be provided promptly by the permittee.

**9.** Permittee shall have the obligation to maintain any driveway approach constructed and shall assume all liability arising out of the construction and maintenance thereof and shall indemnify and hold harmless the City and its officers, employees and agents from and against any liability, loss, damages, claims, judgments, court costs or attorneys fees which they may sustain or incur should any person or party suffer or sustain death, personal injury, or property damage therefrom.

**10.** The construction of the driveway approach shall not interfere with or obstruct any public right-of-way without a Street Encroachment Permit first having been obtained to do so as provided by Ordinance.

**11.** All work done relative to any driveway approach shall be at permittee's expense.

**12.** The permit may specify drainage requirements.

**13.** Driveway approaches must be paved, prior to use or occupancy of the property served, in accordance with specifications therefor on file in the Office of the City Department of Public Works. If the abutting portion of the right-of-way reserved for use by motor vehicles is not permanently improved, then this requirement is deferred until such time as such permanent improvements are completed.

**14.** The permit may be conditioned upon the Permittee, at his expense, placing conduit for traffic control or street lights under the driveway approach, pursuant to the specifications on file in the Office of the City Department of Public Works.

**15.** Driveway approaches shall be a sufficient distance from a controlled intersection so that the use thereof will not interfere with vehicular traffic within or approaching such intersection. Driveway approaches for parking facilities where large volumes of traffic enter or exit at one time shall be a minimum distance of one hundred twenty-five (125) feet from the crosswalk of any intersection.

**16.** No driveway approach for a Type "B" site shall be located within the right-of-way lines extended at the top of a "T-Intersection".

**17.** No driveway approach shall be located at the terminal end of a marked or unmarked crosswalk.

**D. Denial of Application.** An application for a Driveway Approach Permit may be denied where street access is prohibited to and from a parcel of land through a Subdivision Plat, Certified Survey Map, Condominium Plat, Development Agreement, Master Plan or deed restriction.

**E. Special Assessments Where Street Access Denied.** Where all access to and from a parcel of land is denied or prohibited to a certain street ("street" includes highway), the property abutting such street shall not be specially assessed for street grading and paving due to lack of benefit. Notwithstanding the above, sidewalk special assessments are permitted. Sanitary sewer, storm sewer and water services are
not governed by this Section.

The Director of Public Works shall keep a record of the amount of the special assessment which would have been levied against the abutting property had the property benefitted from the street by having access thereto. Should the property later obtain street access, a Driveway Approach Permit shall be conditioned upon payment of the amount of the unlevied special assessment.

F. Penalties. Any person, party, firm or corporation, who violates any provision of this Ordinance shall be subject to, upon conviction, a maximum forfeiture of Five Hundred ($500) Dollars, plus the costs of prosecution. If such forfeiture and costs are not promptly paid, the violator shall be imprisoned in the County Jail for a period not to exceed ten (10) days. Each day of violation shall be deemed a separate offense.

2. Main thoroughfares for the rapid movement of traffic.
3. Newly widened or repaved main thoroughfares
4. Lighting districts as established under §5.09 F. shall include other streets, areas, sections, or districts of the City of Kenosha not included in 1., 2. and 3. above.

C. Thoroughfares running through F Commercial areas are designated as the following lighting districts:

   6th Avenue from 55th to 59th Street.
   6th Avenue "A" from 59th Street to 59th Place.

to parking on one side only.

2. Subsection 7.06 A. shall not apply to those streets that have any parking restrictions between 1:00
A.M. and 8:00 A.M. on one side of the street. On a street that has any parking restrictions between 1:00
A.M. and 8:00 A.M. on one side of the street, no owner or operator of any motor vehicle, motor vehicle
trailer, semitrailer or mobile home, except an emergency vehicle engaged in emergency services, may
park, suffer, allow or permit the same to be parked on that side of the street having such parking
restrictions, from December First (1st) through March Thirty-first (31st) between the hours of 1:00 AM. and
6:00 A.M.

3. In this subsection 7.06 B, "street" means a portion of a highway, as that term is defined in Chapter
346 of the Wisconsin Statutes, bounded by highway intersections at both end of the portion.

4. For the purpose of cleaning or plowing the same, however, the Department of Public Works is
hereby authorized and empowered to order vehicles to be removed from the street at particular times
provided that signs to that effect are posted on such street to give reasonable notice of such orders.

C. Notice of this Ordinance shall be given by signs as required by §349.13, Wisconsin Statutes.

7.07 PARKING METERS

A. Installation and Use. The Transit Commission is authorized to establish on any street in which
parking is by Ordinance or resolution prohibited for more than a limited period of time, parking meter areas
and to install in such areas parking meters, including curb or street marking lines, and to have charge of
the regulation and operation thereof. The Transit Commission shall maintain such meters in good and
workable condition, and collect or cause to be collected monies deposited in the meters by personnel of
the City government.

The meters shall be placed upon the curb, next to the individual parking places, and they shall be so
constructed as to display a signal showing legal parking upon deposit therein of proper coins, indicated by
instructions on the meters.

The charge for parking in parking meter areas shall be as follows: For one or two hour parking
zones, one cent for twelve minutes, five cents for one hour and ten cents for two hours.

B. Regulations.

1. Whenever any vehicle shall be parked next to a parking meter, the operator of the vehicle shall
park within the area designated by the curb of street marking lines as indicated for parallel or diagonal
parking and upon entering the parking space shall immediately deposit in the meter either a one cent coin
or a five cent coin. It shall be unlawful for such person to fail or neglect to deposit such coin or to fail to
park within the limits designated. Such parking space may then be used by such vehicle during the time
limited herein, according to the sum thus deposited, and such vehicle shall be unlawfully parked if it shall
remain in such space beyond the period of time for which the operator shall have deposited such coin in
the meter.

Where an hourly parking restriction is posted in an area regulated by parking meters, it shall be
unlawful to continuously park said vehicle beyond the hourly limitation and the depositing of coins in said
meter once the lawful hourly limit is exceeded shall not abate the hourly violation.

2. It shall be unlawful for any person not authorized so to do to tamper with, open, break, injure or
destroy any parking meter.

3. It shall be the duty of the Police Department to take the parking meter number and State vehicle
number of all vehicles whose operators violate the provisions of §7.07 and to cause notice thereof to be
written in triplicate, leaving one copy thereof with the operator or his vehicle, and another with the Police
Department.

C. Parking Lots. Wherever any vehicle shall be parked on an off street parking lot operated by the
City, the operator shall park within a space designated for parking and upon entering such space shall
immediately deposit in the meter such amount as indicated by the meter for the time he intends to use
such space. The deposit shall be made in such coins as indicated by the meter. It shall be unlawful for any
person to fail or neglect to deposit such coin or coins. Such parking space may then be used by such
vehicle during the time limited as indicated in the meter and according to the sum deposited, and such
vehicle shall be unlawfully parked if it shall remain in such space beyond the period of time for which the
operator shall have deposited such coin or coins in the meter.

No operator of any vehicle in driving into a stall on any off street parking lot shall do so in any manner
except so as to position the front wheels of the vehicle as closely as allowable to the parking meter to be
used for the occupancy of the stall.

In parking lots equipped with gates which will open to permit the exit of motor vehicles from the lot
only by the insertion of the required coin in a slot provided for that purpose, no operator shall operate his
vehicle in physical contact with another vehicle, or in any other manner so as to avoid the payment of the
parking fee required.

D. Traffic Violators Permitted to Pay Fine Without Appearing.

1. Any person violating §B.1. or C. above, may pay a penalty of One ($1.00) Dollar by mailing to, or
leaving such amount with the Kenosha Police Department together with a signed stipulation of guilt or No
Contest and a waiver of trial, provided the penalty and stipulation are received within 240 hours after the
time of delivery of the violation notice by the Police official. The above penalty of One ($1.00) Dollar shall
increase to Ten ($10.00) Dollars if this paragraph is not complied with. Said penalties shall be transmitted
from the Police Department to the Clerk/Treasurer.

2. All persons who wish to deny their guilt and have received notice of their alleged violation of §B.1.
and C. above should deliver their violation notice in person to the Kenosha Police Department at the Police

7.126 MOTOR VEHICLES - NUISANCES - REPAIR WORK

A. Purpose. The purpose of this Ordinance is to prevent blight, to secure healthy and humane living conditions, to protect the integrity of investments in real property, to prevent the decline of real estate values, to improve aesthetics and to protect the public health, safety and welfare. In order to secure this goal, activities contrary to this Ordinance are deemed to constitute a matter of public concern which must be regulated or prescribed through the exercise of the City's police powers.

B. Definitions.

1. “Motor Vehicle(s)” shall include mobile home, moped, motor bicycle, motor bus, motorcycle, motor-driven cycle, motor home, motor truck and motor vehicle as defined in Chapter 340, Wisconsin Statutes.
2. "Nuisance Motor Vehicle(s)" shall include any inoperable, unlicensed, unroadworthy, disassembled or wrecked motor vehicle. A vehicle for which a license has been applied for shall be herein deemed a licensed vehicle if proof of application is prominently displayed on the front windshield.

3. "Repair Work" shall include mechanical, electrical and body work, maintenance, construction, reconstruction, assembly, disassembly, restoration, painting, upholstering or any similar or related work performed on any motor vehicle.

4. "Street Repairs" shall mean "temporary repair work" performed on a motor vehicle in a manner and place which will not create a danger or hazard to vehicular or pedestrian traffic.

5. "Temporary Repair Work" shall mean repair work which is performed within twenty-four (24) hours of a motor vehicle becoming unexpectedly unroadworthy on a street, highway or thoroughfare, which work will make or attempts to make said motor vehicle roadworthy.

6. "Owner" shall mean a person who holds the legal title of a vehicle, except that if the legal title is held by a secured party with the immediate right of possession of the vehicle vested in the debtor, the debtor is the Owner. Notwithstanding the foregoing with respect to a vehicle that is leased for a period of one year or more, the lessee of the vehicle.

C. Prohibition. It shall be unlawful for the "owner" of a nuisance motor vehicle to keep, place or store any "nuisance motor vehicle" or for any person to perform "repair work" or "street repairs" upon any public thoroughfare, street or highway or upon any private or public property within the City in a manner inconsistent with this Ordinance.

D. Repair Work - Limitations. "Repair work" may be performed upon observance of the following conditions and restrictions:

1. "Repair work" upon residentially zoned private property cannot be performed for financial gain or profit obtained through fees, barter, charges or appreciation in the value of a motor vehicle purchased for the purpose of resale. "Repair work" upon other than residentially zoned property shall be in accordance with the City Zoning Ordinances and in compliance with applicable State and City laws, rules and regulations, licenses and permits.

2. Except for authorized street repairs, "repair work" which renders a motor vehicle inoperable for a period of more than three (3) working days, must be performed in a garage or enclosed structure or fenced in area which screens repair work from the view of the owners, users and occupiers of abutting and neighboring properties and from the view of passersby using public thoroughfares, streets and highways.

3. "Street repairs" may be performed only within the scope of the definition thereof.

E. Nuisance Motor Vehicles - Limitations. "Nuisance motor vehicles" may be kept, placed or stored outside of a garage or enclosed structure only in conjunction with a duly authorized and licensed auto sales, repair or salvage business lawfully operating within a properly zoned area and in compliance with all State and local laws, rules, regulations, licenses and permits.

F. Nuisance Motor Vehicles - Removal.

1. Authority To Tow. Subject to the procedures hereinafter set forth, Nuisance Motor Vehicles may be towed and stored by the Police Department, at the cost and expense of the owner thereof, pursuant to §13.12 of the Code of General Ordinances. Unclaimed towed vehicles may be disposed of by towers through means and procedures authorized by law.
2. Notice Of Intent To Tow - Private Property. The owner of a Nuisance Motor Vehicle which is upon private property shall be notified of a violation of this Ordinance, and provided with ten (10) full calendar days to repair, assemble, make the vehicle operable and roadworthy and license any vehicle which may not be licensed or, in the alternative, place such vehicle in a garage or enclosed structure or place such vehicle within a duly authorized and licensed sales, repair or salvage business lawfully operating within a properly zoned area and in compliance with all State and local laws, rules, regulations, licenses and permits.

3. Notice of Intent To Tow - Public Property And Right-Of-Ways. The owner of a Nuisance Motor Vehicle which is upon public property or right-of-ways shall be notified of a violation of this Ordinance and provided with twenty-four (24) hours to repair, assemble, make the vehicle operable and roadworthy and license any vehicle which may not be licensed or, in the alternative, place such vehicle in a garage or enclosed structure or place such vehicle within a duly authorized and licensed sales, repair or salvage business lawfully operating within a properly zoned area and in compliance with all State and local laws, rules, regulations, licenses and permits.

4. Service Of Notice Of Intent To Tow - Computation Of Time - Private Property. A notice of intent to tow a nuisance motor vehicle which is upon private property shall be served upon the owner of the vehicle by posting, on the front windshield, a sticker which shall advise the nature of the violation, the time for compliance, and a phone number to call should the owner of the nuisance motor vehicle desire to be heard prior to the expiration of the ten (10) days. The ten (10) day time limit provided to procure voluntary compliance with this Ordinance shall commence to run the day after the nuisance motor vehicle is posted. In addition to the sticker, where the vehicle is currently registered, a courtesy notice of the intent to tow shall be mailed by first class mail to the owner of record of the nuisance motor vehicle.

5. Service Of Notice Of Intent To Tow - Computation Of Time - Public Property, Streets, Alleys And Right-Of-Ways. If the owner of a Nuisance Motor Vehicle which vehicle is upon any public property, street, alley or right-of-way can be reasonable determined, said owner shall be given oral and/or written notice of intent to tow and in addition thereto, a stick-on or otherwise waterproofed and fastened notice of intent to tow shall be posted on the Nuisance Motor Vehicle, which notice shall be deemed adequate in the event that there is no oral and/or written notice of intent to tow provided to the Nuisance Motor Vehicle owner. The twenty-four (24) hour time limit provided to procure voluntary compliance with this Ordinance shall commence to run at such time as the Nuisance Motor Vehicle is posted.

6. Extensions Of Time. The Police Department, for good cause, upon the Nuisance Motor Vehicle owner's request, may grant a reasonable extension of any time limit imposed herein to enable a Nuisance Motor Vehicle owner to voluntarily comply with this Ordinance.

7. Other Ordinances And Laws. A Nuisance Motor Vehicle may be towed under authority of any other Ordinance or law pursuant to procedures therein specified, where a tow is authorized by another Ordinance or law for reason other than a violation of this Ordinance.

8. Non-Tolling Of Period Of Time Provided To Comply With This Ordinance. The period of time with which an owner of a Nuisance Motor Vehicle is provided hereunder to comply with this Ordinance in order to avoid a tow, shall not be tolled by the fact of a temporary removal of said vehicle from the place whereupon the violation of this Ordinance was noticed to occur under circumstances where the vehicle continues to be a Nuisance Motor Vehicle.

9. Sanction For Noncompliance. The owner of a Nuisance Motor Vehicle who fails, in a timely manner, to comply with this Ordinance shall be subject to have their Nuisance Motor Vehicle towed and stored at their expense and shall, as hereinafter provided, be subject to a money forfeiture and to potential imprisonment in the County Jail as provided for in the Penalty Section of this Chapter of the Code of General Ordinances should a court imposed forfeiture not be paid in a timely manner. Each day of violation of this Ordinance shall be deemed a separate offense. A citation for a violation of this Ordinance is not a precondition to a Nuisance Motor Vehicle being towed under authority of this Ordinance.
10. **Hearing.** The notice of intent to tow shall provide the owner of a Nuisance Motor vehicle with an opportunity to request a hearing before a designee of the Police Chief to enforce this Ordinance. Where a hearing is requested within the time provided for Ordinance compliance in the notice, no action shall be taken to tow the vehicle or issue a citation hereunder until the hearing is held. However, said owner may be required to appear for a hearing to be scheduled within twenty-four (24) hours of the request. The failure of the owner to appear at a scheduled hearing shall constitute a waiver of said right to a hearing. Hearings may be conducted over the telephone at the request of or with the consent of the Nuisance Motor Vehicle owner. The purpose of a hearing hereunder is to permit the Nuisance Motor Vehicle owner to show that the Nuisance Motor Vehicle sought to be towed is not, in fact, a Nuisance Motor Vehicle which is subject to tow hereunder. The person conducting said hearing, which shall be informal, shall note in writing the facts presented and position of the Nuisance Motor Vehicle owner, shall mark and retain exhibits and shall determine, in writing, whether or not this Ordinance has been violated. If this Ordinance has been determined by said person to have been violated, the Nuisance Motor Vehicle owner shall be notified of a compliance date, which shall be reasonable under all of the circumstances.

11. **Appeal.** Appeal shall be as hereinafter provided, the City electing not to be governed by Chapter 68, Wisconsin Statutes.

An aggrieved party desiring to appeal from a hearing determination under Subsection 10., may file a written Notice of Appeal which must be received by the Police Department prior to the expiration of the time for compliance with this Ordinance provided for in the Notice of Intent to Tow. The Notice of Appeal shall state the error alleged in the initial decision and shall provide the address and phone number of appellant. The appeal shall be heard by a designee of the Director of Public Works. The review shall be upon the record and a written determination affirming or denying the initial decision maker shall be made. No vehicles shall be towed until the appeal process is completed, and then only where the decision of the initial decision maker finding a violation of this Ordinance is upheld, and only after the appellant has been notified of the appeal decision and given at least twenty-four (24) hours to comply with this Ordinance. Further appeal would be by Writ of Certiorari to the Circuit Court.

12. **Notice of Towing.** Where a Nuisance Motor Vehicle is towed hereunder and where the owner and owner's address of the towed vehicle is known or reasonably ascertainable to the person who authorized the tow, said owner shall be provided notice, either personally or by regular mail, that the vehicle has been towed by a certain tower to a certain location. The owner shall be provided with tower's phone number and advised that the vehicle should be claimed therefrom, upon payment of the appropriate towing and storage charges, as soon as possible, for daily storage charges are accumulating. The notice shall also indicate that the vehicle may be disposed of by the tower, to recoup such charges in a manner and through a procedure authorized by law.

13. **Agreement to Defend, Indemnify and Hold Harmless.** The City will defend or pay for the defense of any tower towing under this Ordinance and will indemnify and hold harmless any tower towing under this Ordinance from any loss, damages, costs or expenses which they may sustain, incur or be required to pay should any person or party make claim or commence a lawsuit against any such tower where the basis for the claim or lawsuit is an allegation that this Ordinance is unconstitutional on its face or in its application. A prerequisite for the above City obligation is written notice by a tower of a claim or lawsuit to the City Clerk, within five (5) days of the receipt thereof, and a tender of the defense thereof to the City.

7.127 DISTRIBUTION OF LITERATURE PROHIBITED

The distribution of written literature is prohibited, whether or not a charge or donation is requested therefor, within the street right-of-way to a distance of 50 feet from the following intersections:

- 35th Street and 22nd Avenue
- 52nd Street and 22nd Avenue
- 60th Street and Sheridan Road
- 75th Street and 22nd Avenue
75th Street and 39th Avenue and Roosevelt Road
85th Street and 22nd Avenue
during the hours of 7:30 A.M. to 8:15 A.M.; 11:00 A.M. to 12:30 P.M.; and 2:30 P.M. to 4:00 P.M. on
school days of Unified School District No. 1. The street right-of-way shall include the portion of the street
used for vehicular traffic, the lawn park area and the City sidewalk.

7.128 TOWING OF ILLEGALLY PARKED VEHICLES

A. Towing. Vehicles illegally parked on a highway having any of the following:

1. Two (2) or more open warrants of any kind and/or commitments;
2. Two (2) or more open parking citations more than thirty (30) days old;
3. No plates and the VIN number identifies the vehicle owner as having two (2) or more open parking
citations more than thirty (30) days old;
4. One (1) open warrant/commitment and one (1) open parking citation more than thirty (30) days
old; shall, following the issuance of a parking citation, be towed by a City licensed tower at the request of
the City Police Department.

B. Towing Fees and Storage Charges. As a condition of reclaiming a towed vehicle, towing fees
and storage charges, if any, shall be paid by the owner of the towed vehicle in accordance with the
schedule of towing fees and storage charges provided for in §13.12 of the Code of General Ordinances.
Towers shall have mechanic's lien rights on towed vehicles for towing fees and storage charges, if any. In
the event of the nonpayment of towing fees and/or storage charges, towers may, in accordance with
procedures prescribed by law, dispose of towed vehicles.

C. Claiming Towed Vehicle. To claim a towed vehicle, claimant must show evidence of proof of
ownership to the tower. In the event the tower is not satisfied that the evidence shown clearly
demonstrates ownership, the tower may require the claimant to obtain an authorization for the release of
the vehicle from the City Police Department. A towed vehicle must be released to the owner if the towing
fee and storage charges, if any, are paid. The owner need not pay for any citation or respond to any
citation, warrant or commitment as a condition of reclaiming the towed vehicle.

D. Notice of Tow. The City Police Department shall, within twenty-four (24) hours after the tow of an
illegally parked vehicle, send by first class mail written notice to the last known registered owner of the
towed vehicle at the last known address of said registered owner, as shown by records of the State
Department of Transportation, informing said registered owner of the fact of the tow, of the citation issued
for illegal parking and of the owner's right to a hearing as herein provided.

E. Hearing. Citation recipients wishing to contest the legality of the citation and of the tow resulting
therefrom may obtain a "review" of same by an attorney within the City Attorney's Office within one (1)
business day of the receipt of a written request therefor by the City Attorney's Office. At this review, the
citation recipient may challenge the basis for the tow and/or citation and may bring witnesses to support
their position. If an attorney within the City Attorney's Office determines, following review, that there was
probable cause to issue the citation and tow the vehicle, the vehicle may be retained by the tower, unless
towing fees and storage charges, if any, are paid and the citation will be processed through the Municipal
Court where the citation recipient will be entitled to a full hearing on the merits thereof. In the event that an
attorney within the City Attorney's Office determines that there was no probable cause, the citation shall be
voided and the towed vehicle, if still in the custody of the tower, will be released immediately without
payment of any towing fees or storage charges to the citation recipient. In the event that the citation
recipient has previously claimed the towed vehicle and paid the relevant fees and charges therefor, the
citation recipient shall be reimbursed for said payment by the City. In the event that the towed vehicle is
still in the custody of the tower, the City will reimburse the tower for the relevant fees and charges.

F. Policy and Procedure. Prior to towing vehicles under this Ordinance, the Police Department shall
put into effect a policy and procedure which has been approved by the City Attorney which outlines the
administration and enforcement of this Ordinance. Said policy and procedure will be incorporated into this
Ordinance by reference and shall be considered a part hereof as if fully set forth herein. A copy thereof
shall be filed with the Municipal Court.

EXTERIOR OF ANY RESIDENTIAL PROPERTY AND ON ANY PUBLIC STREET, HIGHWAY, ALLEY,
THOROUGHFARE OR RIGHT-OF-WAY IN ANY RESIDENTIAL ZONING DISTRICT OF THE CITY

C. Annual Review of Credit. The Director shall review the credit and the basis therefor each year, and may terminate the credit if grounds are found. If such credit is terminated, the property owner will be notified in writing of the grounds for denial by first class mail, and may appeal such determination pursuant to Section 8.09 of this Chapter; or, may, if possible, correct the deficiencies that caused the termination and reapply for the credit.

8.09 APPEALS PROCESS

The City Clerk/Treasurer shall provide written notice no later than five (5) business days to the address listed within the appeal of the time and place of the Common Council’s consideration of the appeal. In considering an appeal, the Common Council shall determine whether the stormwater charge is fair and equitable. The Common Council shall base its decision upon the information presented at its meeting. The City Clerk/Treasurer shall notify the appellant in writing of the Common Council’s determination by first class mail addressed to the individual at the address listed within the appeal. Service is conclusive upon mailing.

E. As a condition precedent to any adjustment or credit request, or any appeal, a property owner must have paid in full all Stormwater Utility service charges to the City.

F. If an adjustment request is granted, Stormwater Utility service charges shall be adjusted on a prospective basis, and the application fees shall be refunded.

8.10 PAYMENTS

A. Stormwater Utility Charges. Stormwater Utility charges will be billed as a line item on the City of Kenosha Water Utility bill to the utility property owner and shall be payable at the same time and in the same manner as Water Utility charges. A stormwater utility bill will be established for those properties that do not receive a Water Utility bill.

B. Property Owner Responsibility. The property owner shall be responsible for all Stormwater Utility charges.

C. Delinquent Payments. Delinquent stormwater charges may be placed as a lien upon the property as provided in Sections 66.0821(4)(d) and 66.0809, Wisconsin Statutes.

D. Tenant Payments. The owner of any property which is occupied by tenants shall have the right to examine, during normal business hours, the appropriate records of the City to determine whether such fees and charges have been paid by such tenants.

E. Parcel Number Changes. When properties are divided, or when two (2) or more contiguous properties with separate parcel numbers are combined, new parcel number(s) are assigned to the new lot(s) and the previous parcel number is deleted. F. Alternative Method To Collect Stormwater Charges. In addition to any other method for collection of the charges established under this Section, or subsequent Resolution, such charges may be and are hereby authorized to be levied and imposed as a special charge pursuant to Section 66.0627, Wisconsin Statutes. The mailing of the bill for Stormwater Utility service charges to a property owner shall serve as notice to the property owner that failure to pay the charges when due may result in the charges being imposed pursuant to the authority of Section 66.0627, Wisconsin Statutes. The procedures contained in Section 66.0627, Wisconsin Statutes, shall govern such notice and further collection procedures.

8.11 SEVERABILITY

Should any section, paragraph, sentence, clause or phrase of this Section be declared unconstitutional or invalid, or be repealed, it shall not affect the validity of this Ordinance as a whole or any part thereof other than the part so declared to be invalid or repealed.
1. **Base Charges.** The Base Charge shall be a uniform charge on each bill. The Base Charge shall be established by dividing the total value of the base services determined by the City of Kenosha by the total number of property owners.

2. **EHU Charges.**
   a. The basis of the Stormwater Utility Service Charge shall be the Equivalent Hydrologic Unit (EHU).
   b. The estimated number of EHUs shall be based on either the average peak runoff rate for a property owner classification, or the estimated peak runoff for the individual parcel, as described herein.
   c. The EHU Charge shall be established by dividing the total number of EHUs estimated to be within the City of Kenosha by the cost of the stormwater services not included in the base charge.

3. **Calculation of EHU.** The Director shall be responsible for determining the impervious area and other required information necessary to compute the EHU for each property in the City of Kenosha based on the best available information, including, but not limited to, data supplied by the City Assessor, aerial photography, the property owner, developer or other method as may be required.
   a. **Rational Method To Estimate Peak Runoff Rates.** The Rational Method described in the City of Kenosha Stormwater Management Criteria shall be used to estimate peak runoff rates. That methodology assumes:
      (1) **Runoff C Factor.** The Runoff C Factor for all impervious surface areas shall be assumed to be 0.95 and 0.2 for all pervious surface areas.
      (2) **Time of Concentration - Residential Property Owners.** The Time of Concentration for all residential property owners shall be assumed to be fifteen (15) minutes.
      (3) **Time of Concentration - Other Developed Property Owners/Impervious Surface Areas.** The Time of Concentration for all impervious surface areas for all Other Developed Property Owners shall assume a time of concentration based upon the total pervious surface areas.
      (4) **Time of Concentration - Other Developed Property Owners/Pervious Surface Areas.** The Time of Concentration for all pervious surface areas for all Other Developed Property owners shall assume a time of concentration based upon the total pervious surface areas.
   b. **Average Peak Runoff Rate.** The EHU shall be based on the average peak runoff rate computed for typical residential property. The average peak runoff rate for a typical residential EHU has been estimated to be 0.35 cfs.
      (1) **Residential Property Owners.** Residential property owners shall be further grouped by the Director into one of four subclassifications. Each subclassification shall be charged a uniform number of EHUs based on the average peak runoff rate for that subclassification, computed as follows:
         (a) **Small Residential** with an estimated peak runoff rate of less than 0.30 cfs shall be charged at a rate equal to 0.7 EHUs.
         (b) **Typical Residential** with an estimated peak runoff rate greater than or equal to 0.30 cubic feet per second (cfs) and less than or equal to 0.41 cfs shall be charged at a rate equal to 1.0 EHU.
         (c) **Large Residential** with an estimated peak runoff rate greater than 0.41 cfs and less than or equal to 0.59 cfs shall be charged at a rate equal to 1.4 EHU.
(d) Very Large Residential with an estimated peak runoff rate greater than 0.59 cfs shall be charged at a rate equal to 2.4 EHU.

c. Other Development.
(1) Other Development shall be subject to a charge based upon the sum of EHUs computed for impervious surface and pervious surface areas.

(a) Impervious Surface Area EHUs shall be determined by dividing the total impervious surface area by the equivalent impervious surface area of 2,477 square feet, that has been estimated to generate 0.35 cfs.

(b) Pervious Surface Area EHUs shall be determined by dividing the total pervious surface area by the equivalent pervious surface area that would be estimated to 0.35 cfs. The equivalent pervious surface area increases with increasing time of concentrations according to the Table below.

(2) Responsibility For EHU.
(a) EHU for Other Development other than condominiums shall be the EHU determined in c.(1), above.

(b) EHU for Other Development which consists of condominiums shall be the proportionate share of the EHU determined in c.(1) above, that the condominium unit has with respect to the total number of the other condominium units that are on the real property lot.

H. Exemptions.

The following buildings are exempt from the requirements of this ordinance:

1. A building containing a wired communication system in accordance with Subsection B that has been permitted by the Code Official to be installed or maintained in lieu of a radio coverage system for buildings. The communications control equipment and portable handsets shall be located inside the building at the main building entrance, or other location approved by the Code Official.

The classes of licenses and fees therefor shall be as follows and it shall be unlawful for any person, party, firm or corporation to engage in said licensed activity without first having obtained the appropriate license therefor:

A. Intoxicating Liquor.

1. "Class A" License. The annual fee for a "Class A" License is Five Hundred ($500.00) Dollars. Licenses may be granted which shall expire on the 30th day of June each year upon payment of such proportion of the annual license fee as the number of months, or fraction of a month, remaining until June 30th of each year bears to twelve. No application for such license shall be accepted unless accompanied by the appropriate fee in cash or certified check.

2. "Class B" License. The annual fee for a "Class B" License is Five Hundred ($500.00) Dollars, and must be paid on or before the June 15th preceding the commencement of the license year. The holder may sell, deal and traffic in intoxicating liquors to be consumed by the glass only on the premises so licensed, and in the original package or containers, in multiples not to exceed four (4) liters at any one time, and to be consumed off the premises so licensed, except that wine may be sold in the original package or otherwise in any quantity to be consumed off the premises.

Licenses may be granted which shall expire on the 30th day of June of each year upon payment of such proportion of the annual license fee as the number of months, or fraction of a month, remaining until June 30 of each year bears to twelve.

3. Reserve "Class B" License. In addition to any fees prescribed in A.2., the Clerk shall charge an additional Ten Thousand ($10,000.00) Dollars prior to the issuance of a reserve "Class B" License.

   a. The City finds that the ten thousand dollar ($10,000.00) fee mandated by the laws of the state exceeds the actual cost of licensing the activity, thereby generating additional revenue for the city and it is in the interests of the public welfare to use part of this additional revenue to increase the property tax base, to improve the interior or exterior of the licensed premise, provide employment opportunities, attract tourists and generally enhance the economic and cultural climate of the community by providing additional economic incentives for new businesses with liquor licenses.

   b. After the granting of any new Reserve "Class B" License and payment of the ten thousand dollar ($10,000.00) initial issuance fee, whether paid before or after the effective date of this section, the reserve "Class B" Licensee who can document that permanent improvements to the licensed premises have been made to the licensed premises within the preceding twelve (12) months in an amount equal to or in excess of $30,000.00, may file an application for an economic development grant in an amount not to exceed nine thousand dollars ($9,000.00) with the city clerk at anytime after twelve (12) months and before eighteen (18) months of the date of issuance of the Reserve "Class B" License. The Licensee shall complete an Application for Economic Development Grant for Reserve "Class B" Liquor Licenses, available from the city clerk, and shall attach complete, legible copies of paid invoices or receipts evidencing or documenting improvements made to the licensed premises in an amount equal to or greater than $30,000.00 at the time the economic development grant application is filed. When available, photographs which document the premises before and after the improvements should be included with the grant application. The City of Kenosha shall retain one thousand dollars ($1,000.00) to cover administrative costs associated with the administration of the license and grant review. The Committee on Licenses/Permits shall determine whether the Licensee is operating in compliance with the approved license. The Committee on Licenses/Permits may require the assistance of any other city department in making said determination. If the Committee on Licenses/Permits determines that the Licensee is so
operating, the Committee on Licenses/Permits shall authorize the approval of up to a nine thousand dollar ($9,000.00) economic development grant and direct the finance department to issue payment of said grant. If the Committee on Licenses/Permits determines that the Licensee is not in compliance with the approved license, no economic development grant may be authorized and the Committee on Licenses/Permits shall make such finding in writing and cause to be delivered a copy of the findings to the Licensee. If the Licensee disagrees with the Committee on Licenses/Permits' determination, the Licensee may file a written notice of appeal with the clerk within ten (10) calendar days of the delivery of the written notice of the findings. Upon receiving such notice from the Licensee, the clerk shall relay the notice to the Common Council which shall hold a hearing and review the determination. The Common Council may affirm or reverse the Committee on Licenses/Permits' determination. If the Committee on Licenses/Permits' determination is upheld, appeal may be taken to circuit court pursuant to Section 753.04, Wisconsin Statutes. However, where a suspension is imposed, the minimums specified in Subsections D. or E.3. are applicable.

Further, mitigating circumstances may be introduced with respect to any judgment of conviction.

L. Application For Determination of Demerit Points. Any Licensee or party entitled to initiate a request for an investigation under Subsection B. hereof, may, at any time, request the Common Council to determine whether or not conduct which has occurred constitutes a basis for demerit points, and, if so, how many demerit points. The Common Council, in making this determination, shall have before it the recommendation of the Committee and of the City Attorney's Office.

M. Commencement Of Penalties. Penalties shall commence the day after they have been imposed by the Common Council. Days of suspension shall run consecutively.

N. Periodic Reports By Police Chief. The Police Chief shall file periodic reports with the City Attorney advising said City Attorney of conduct by any Licensee, or employees thereof, which may constitute a basis for disciplinary action. The City Attorney, at License renewal time, or at any earlier time deemed appropriate, shall bring such matters to the attention of the Committee and make a recommendation on disciplinary action.

10.064 OFF LICENSED PREMISES CONDUCT OF PATRONS AND PERSONS AS A BASIS FOR DISCIPLINARY ACTIONS

A. Purpose. The purpose of this Ordinance is to protect the peace, tranquility and property values of the neighborhood in which a Class "A", "Class A", Class "B", "Class B", or "Class C" (if available) premise licensed under this Ordinance is located.

B. Responsibility of Licensee. Over and above the other provisions of this Chapter and Chapter 125, Wisconsin Statutes, every Class "A", "Class A", Class "B", "Class B", or "Class C" (if available) licensee licensed under this Chapter shall, during hours of operation of the licensed premises, be responsible for the conduct of patrons and persons who are not on the licensed premises, but are present on the following described off-licensed premises’ property:

- Parking lot owned or operated by licensee which serves the licensed premises;
• The lot upon which the building being the subject of the license or parking lot serving the licensed premises is situated;

Examples of conduct which could form the basis for an order hereunder include, but are not limited to:

• Loitering where accompanied by loud noise, threats, fighting, open intoxicants, consumption of intoxicants, weapons use or display, illegal drug use or sale, urination, or otherwise disturbing, disorderly, or illegal conduct;
• Loitering of persons under the influence of alcohol beverage or drugs;

hereinafter "loitering". The licensee shall be responsible to monitor off-licensed premises property for compliance with this Ordinance. The licensee shall have a duty to direct patrons or persons engaged in loitering to immediately leave property. The licensee is not to use physical force to remove any such person or patron. Should notified persons and patrons fail to comply, licensee shall have an obligation to call the City Police Department for assistance. The licensee may elect to first call the Police Department if the licensee has concern for their safety. "Licensee" shall mean and include any person having control of the operation of the licensed premises.

C. Complaints. Complaints may be made by:
The Mayor;
The Common Council;
The Committee;
The State of Wisconsin;
An Alderperson;
The Police Chief;

Any Resident of the City of Kenosha.

Complaints shall be made in writing and filed with the City Clerk. The City Clerk shall direct the complaint to the Chair of the Committee. With respect to complaints of illegal drug use or sale, the City Clerk shall not direct the complaint to the Committee until first consulting with the Police Department and receiving a determination that the review of the complaint by the Committee will not interfere with a law enforcement investigation. The Chair shall review the complaint and any other documentation available to the Chair, including, but not limited to, police reports and statements of the complainant, licensee, or others, to determine whether the complaint has sufficient merit to be placed on the Committee agenda.

D. Committee Action on Complaint. The Committee shall order the licensee to appear before it to discuss the complaint and potential remedies. After hearing from the complainant, licensee and all interested parties, and reviewing all applicable reports, statements and documentation, the Committee shall have four (4) options:

1. No Action Taken. No action shall be taken on the complaint if it is unfounded, without merit, or if the alleged conduct is outside of the effective control of the licensee.
2. Oral Recommendations. Oral recommendations may be given from the Committee to the licensee on how the licensee could address the issues raised in the complaint.
3. Written Recommendations. If the Committee finds that the complaint has merit and that a reasonable remedy exists, the Committee may cause a written recommendation be sent to licensee through the U.S. mail, first class, postage prepaid. The written recommendation shall include the Committee’s finding on the complaint, the remedies, the timetable and/or deadlines for compliance, and an order to appear back before the Committee on a specific date or dates to determine compliance with
directives. The only portion of the written recommendation which would subject the licensee to discipline for noncompliance is that portion ordering the licensee to appear before the Committee.

4. Orders. If the Committee finds the complaint has merit, and that a reasonable remedy exists, and that written recommendations are inappropriate or ineffective, the Committee may recommend to the Common Council that formal orders be issued by the Common Council. Unless otherwise stated, orders are permanent, unless rescinded, as long as the licensee maintains the same type of license at the location being the subject of the complaint. Orders may include, but are not limited to, the following remedial actions.

- Reduction in hours of operation of licensed premise
- Prohibition of the sale of carryout alcohol beverages;
- Establishment of specified security measures;
- Prohibition of loitering.

E. Common Council Action on Complaint. Upon recommendation by the Committee for written orders as provided herein, the Common Council shall order the licensee to appear before the Common Council. After meaningful opportunity for the licensee to be heard, the Common Council shall issue the order that it deems appropriate. Orders from the Common Council will be sent to the licensee at the address of the licensed premises by first class mail, postage prepaid.

F. Committee Review. After orders issued by the Common Council, the Committee shall conduct such reviews as it deems necessary and sufficient in order to monitor compliance by licensee with the orders. If at any review it appears to the Committee that the licensee is materially noncompliant, it may require the City Attorney to commence formal disciplinary proceedings for violation of the orders.

11.033 SEXUAL OFFENDER RESIDENCY RESTRICTIONS

A. Findings and Intent.

1. Findings. Repeat sexual offenders, sexual offenders who use physical violence, and sexual offenders who prey on children are sexual predators who present an extreme threat to the public safety. Sexual offenders are extremely likely to use physical violence and to repeat their offenses; and, most sexual offenders commit many offenses, have many more victims that are never reported, and are prosecuted for only a fraction of their crimes. This makes the cost of sexual offender victimization to society at large, while incalculable, clearly exorbitant. Therefore, the City being concerned about public safety and, in particular, the safety of children finds:

   a. Regulation of sex offender residency is not an issue unique to the City of Kenosha; to the contrary, virtually all, if not literally all, of the municipalities in the greater Milwaukee area regulate sex offender residency, and this is consistent with comparable regulations that, while not universally adopted, are very common throughout the State of Wisconsin and nationwide.

   b. The City now intends to revisit its regulation of sex offender residency, in light of assertions which challenge the City's regulation of sex offender residency.

   c. In revisiting the matter the City hereby intends to, and does, reconsider the whole issue, from its most basic premises, to ensure that the regulations are tailored to the circumstances of the City, while
preserving the intent to promote public safety particularly to protect children from potential recidivism of convicted child sex offenders.

d. In revisiting the matter, the City again observes the risks posed by sex offenders against children, which risks are nationally recognized in such landmark legislation as the 1994 Jacob Wetterling Crimes Against Children and Sexually Violent Offender Registration Act; 1996 Megan’s Laws; and the 2006 Adam Walsh Child Protection and Safety Act; and these risks are also recognized by legislation in every State in the United States of America including Wisconsin.

e. The City finds that the data concerning child sex offenders demonstrates the need for action, including the following:

- "sex crimes are unfortunately fairly common in the United States."
- "It is estimated that one in every five girls and one in every seven boys are sexually abused by the time they reach adulthood."
- "Children are particularly vulnerable. Approximately 67% of all victims of reported sexual assaults are under the age of 18, and more than half of these victims are under the age of 12."
- "Most sexual offenses are committed by someone the victim knows ... or acquaintance."
- "No single factor or combination of factors can fully explain why someone offends sexually, though some factors may combine to increase people's tendency to offend. These factors are ...[physiological, sociocultural, developmental] and situational/circumstantial (e .g. having easy access to victims...)."
- "About 12% to 24% of sex offenders will reoffend."

f. The City also finds these statistics of the U.S. Department of Justice to be disturbing and a call to action.

- "Approximately 1.8 million adolescents in the United States have been victims of sexual assault."
- "An estimated 60% of perpetrators of sexual abuse are known to the child but are not family members, e .g. family friends, babysitters, child care providers, neighbors."

g. The City is not inclined to sit idly by and do nothing to protect children within the City when these most vulnerable members of our community face these documented threats from offenders who are highly prone to re-offend if given the opportunity to do so.

h. The City is aware of many studies and reports concerning recidivism of sex offenders and the effectiveness of sex offender residency restrictions.

i. The City acknowledges that literature on the subject includes studies that support the practice of imposing sex offender residency restrictions and others that are critical of the practice.

j. The City finds it significant that some key studies concluding sex offender residency restrictions have limited effectiveness have added significant qualifications to that conclusion; e.g. in “An Evaluation of Sex Offender Residency Restrictions In Michigan and Missouri,” (Huebner, et al., 2013), the authors generally do not support sex offender residency restrictions, but nevertheless find that following adoption of sex offender residency restrictions “the rate of recidivism for technical violations significantly decreased for Missouri sex offenders ... “ (id. at 9) and “the number of sex offense convictions did decline ... “ in Missouri (id. at 10).

k. The City recognizes the merits, mentioned in some studies, of individualized consideration of the risks and benefits of residency restrictions on an offender by- offender basis, therefore the City intends to allow for individualized consideration through an exemption process.

l. The City acknowledges that many communities have an “original domicile restricts own sex offenders to its community; such burdens including neighborhood and citizen concerns and responses, risks of recidivism, and potential property value impacts.

m. The City believes that absent an original domicile restriction, the City would have open doors for non-resident sex offender residency when other communities have closed doors, inviting a substantial increase in child sex offender placements, with the related adverse impacts on the health, safety and welfare of the City and its residents.

n. The City finds that is necessary and appropriate to distinguish between offenders who were residents at the time of their offense and those who were not, for numerous reasons including the following:

- Offenders who were residents of the City at the time of the offense are known to City law enforcement which allows for improved community relations, monitoring and enforcement;
• Offenders who were residents of the City at the time of their offense are familiar with the City and therefore are better able to know the locations within the City where children and youth are likely to congregate, to better avoid those locations and reduce the opportunities for re-offense;

• Offenders who were residents of the City at the time of their offense have paid property taxes either directly or indirectly, and are a part of the community, and have some level of investment backed expectations of continued participation in the community; and

• Offenders who were residents of the City at the time of their offense have a pre-established connection with the community, which provides a stronger social network reducing the risks of social isolation and making it more likely for such residents to reintegrate and become productive members of the community.

o. The City is unaware of any circumstance where a Designated Offender who having prior to the Effective Date of this Ordinance, established a Permanent Residence or Temporary Residence that was reported and registered pursuant to Section 301.45, Wisconsin Statutes, has reoffended.

p. The City believes that for all but the most severe offenders, this risk of adverse impact declines as time passes following the date of a Designated Offender's offense, as the offender matures, recovers and reintegrates with society over time; and if this results in the offender being removed from the State registration list, the offender is thereby automatically removed from the City residency restrictions; but even if State registration is required, once ten years has passed from the date of the most recent offense giving rise to the Designated Offender designation, provided it is not a Class A felony against a child, the City finds it is appropriate to remove the original domicile restriction and allow such reformed citizen to move into the City in compliance with this ordinance; and by opening this door the City hopes that it is establishing a precedent for its surrounding communities to open their doors as well.

q. The City recognizes that it cannot eliminate all risk of child sex offender re-offense, and it must balance all of the competing public policies, but intends by these regulations to strike the legislative balance that is appropriate for the circumstances of the City of Kenosha.

r. It is not the intent of this ordinance to banish sex offenders from residing within the City, and careful attention has been given to ensure that there are ample locations for sex offenders to reside within the City in compliance with the requirements of this ordinance.

s. In reconsidering the matter, having given the matter due consideration, and having based its determination on the effect of the amendments on the health, safety and welfare of the community and the immediate neighborhoods affected and the current and future City residents who are child sex offenders, and having given due consideration to the municipal problems involved, it is determined that the amendments to the Ordinance will appropriately support the public health, safety and general welfare of the City and will not be hazardous, harmful, noxious, offensive or for any other reason cause a substantial adverse effect on the property values and general desirability of City neighborhoods.

2. Intent. It is the intent of this Ordinance not to impose a criminal penalty, but rather to service the City of Kenosha’s compelling interest to promote, protect and improve the health, safety and welfare of the citizens of the City of Kenosha by creating areas around locations where children regularly congregate in concentrated numbers wherein certain sexual offenders and sexual predators are prohibited from establishing temporary or permanent residency.

11.052 THEFT OF CABLE SERVICE

A. Definitions.

1. "Cable Service(s)" has the meaning given in Section 26.02 A.3. of the Code of General Ordinances. "Cable Service" does not include signals received by privately owned antennas that are not connected to a cable system, whether or not the same signals are provided by a cable television company.

2. "Private Financial Gain" does not include the gain resulting to any individual from the private use in that individual’s dwelling unit of any programming for which the individual has not obtained authorization.

B. Prohibitions. No person may intentionally do any of the following:

1. Obtain or attempt to obtain Cable Service from a company by trick, artifice, deception, use of an illegal device or illegal decoder or other fraudulent means with the intent to deprive that company of any or all lawful compensation for rendering each type of service obtained. The intent required for a violation of this Section may be inferred from the presence on the property and in the actual possession of the defendant of a device not authorized by the cable television company, the major purpose of which is to permit reception of Cable Service without payment. This inference is rebutted if the defendant demonstrates the he or she purchased that device for a legitimate use.

2. Give technical assistance or instruction to any person in obtaining or attempting to obtain any Cable Service without payment of all lawful compensation to the company providing that service. This Section does not apply if the defendant demonstrates that the technical assistance or instruction was given or the installation of the connection, descrambler or receiving device was for a legitimate use.

3. Make or maintain a connection, whether physical, electrical, mechanical, acoustical or by other means, with any cables, wires, components or other devices used for the distribution of Cable Services for the purpose of distributing Cable Service to any other dwelling unit without authority from a cable television company.

4. Make or maintain a connection, whether physical, electrical, mechanical, acoustical or by other means, with any cables, wires, components or other devices used for the distribution of Cable Services for the purpose of obtaining Cable Service without payment of all lawful compensation to the company providing that service. The intent required for a violation of this Section may be inferred from proof that the Cable Service to the defendant’s residence or business was connected under a service agreement with the defendant and has been disconnected by the cable television company, and that thereafter, there exists in fact a connection to the cable system at the defendant’s residence or business.

5. Make or maintain any modification or alteration to any device installed with the authorization of a cable television company for the purpose of intercepting or receiving any program or other service carried by that company which that person is not authorized by that company to receive. The intent required for a violation of this Section may be inferred from proof that, as a matter of standard procedure, the cable television company places written warning labels on its converters or decoders explaining that tampering with the device is a violation of law and the converter or decoder is found to have been tampered with, altered or modified so as to allow the reception or interception of programming carried by the cable television company without authority to do so. The trier of fact may also infer that a converter or decoder has been altered or modified from proof that the cable television company, as a matter of standard procedure, seals the converters or decoders with a label or mechanical device, that the seal was shown to the customer upon delivery of the decoder, and that the seal has been removed or broken. The inferences under this Section are rebutted if the cable television company cannot demonstrate that the intact seal was shown to the customer.

6. Possess without authority any device or printed circuit board designed to received from a Cable System any Cable System, whether or not the programming or services are encoded, filtered, scrambled or...
otherwise made unintelligible, or perform or facilitate the performance of any of the acts under Sections 11.052 A. 1. to 5. with the intent that such device or printed circuit be used to receive that cable television company’s services without payment. Intent to violate this Section for direct or indirect commercial advantage or private financial gain may be inferred from proof of the existence on the property and in the actual possession of the defendant of a device if the totality of circumstances, including quantities or volumes, indicates possession for resale.

7. Manufacture, import into this State, distribute, publish, advertise, sell, lease or offer for sale or lease any device, printed circuit board or any plan or kit for a device or for a printed circuit designed to receive the cable television programming or services offered for sale over a Cable System from a Cable System, whether or not the programming or services are encoded, filtered, scrambled or otherwise made unintelligible, with the intent that the device, printed circuit, plan or kit be used for the reception of that company's services without payment. The intent required for a violation of this Section may be inferred from proof that the defendant has sold, leased or offered for sale or lease any device, printed circuit board, plan or kit for a device or for a printed circuit board in violation of this Section and during the course of the transaction for sale or lease, the defendant expressly states or implies to the buyer that the product will enable the buyer to obtain Cable Service without charge.

C. Penalties. The following penalties apply for violations of this Section:

1. Residential. Except as provided in Section C.2. below, any person convicted of violating any provision of this Section is subject to a forfeiture of not less than One Hundred ($100.00) Dollars, nor more than Five Hundred ($500.00) Dollars for each offense, together with the costs of prosecution; and, if in default thereof, shall be committed to the County Jail for a period not to exceed thirty (30) days. Each day such violation continues shall be considered a separate offense.

The intentional concealment of unpurchased merchandise which continues from one floor to another or beyond the last station for receiving payments in a merchant's store is evidence of intent to deprive the merchant permanently of possession of such merchandise without paying the purchase price thereof. The discovery of unpurchased merchandise concealed upon the person or among the belongings of such person or concealed by a person upon the person or among the belongings of another is evidence of intentional concealment on the part of the person so concealing such goods.

11.144 REGULATION OF E-CIGARETTES

A. Purpose

1. The purpose of this section is to protect the public health, safety, and welfare of the property and persons in the City by prohibiting persons under eighteen years of age from possessing e-cigarette products, and prohibiting the sale of e-cigarette products to persons under eighteen years of age.

2. Persons under eighteen years of age or prohibited by law from purchasing or possessing cigarettes and other tobacco products, and retailers are prohibited from selling them to minors. There are new tobacco-less products, however, commonly referred to as "electronic cigarettes," "e-cigarettes," "e-cigars," "e-cigarillos," "e-pipes," "e-hookahs," or "electronic nicotine delivery systems," which allow the user to simulate cigarette smoking. These products may be purchased by minors and are being marketed without age restrictions or health warnings and come in different flavors that appeal to young people.

3. E-cigarettes, and similar devices, are relatively new nicotine delivery systems. While devices vary in
their appearance and specific methods of operation, they have a few basic elements in common. A solution (which frequently includes nicotine, and can contain lobelia, and/or flavorings, in addition to other additives) is heated with the heating element (which is usually battery-powered) until it is vaporized. The resultant vapor passes into a mouthpiece and is inhaled in a manner similar to cigarette smoking. Often, glycerol or propylene glycol is added to the solution to give the appearance of smoke when the solution is vaporized. The concentration of nicotine contained in the solution can be customized by the retailer to the buyer’s specifications.

4. The production and distribution of e-cigarettes is not currently regulated by federal or state authorities, and U.S. Food and Drug Administration has not completed testing of these products. Initial studies by the FDA have determined that e-cigarettes can increase nicotine addiction among young people and that they contain chemical ingredients known to be harmful, which may expose users and the public to potential health risks.

5. The use of e-cigarettes and similar devices has increased significantly in recent years.

6. Existing studies on electronic smoking devices’ vapor emissions and cartridge contents found a number of dangerous substances irrespective of the nicotine, including:
   a. Chemicals known to cause cancer such as formaldehyde, acetaldehyde, lead, nickel, and chromium;
   b. PM 2.5, acrolein, tin, toluene, and aluminum, which are associated with a range of negative health effects such as skin, eye, and respiratory irritation, neurological effects, damaged reproductive systems, and premature death from heart attacks and strokes.

7. Some electronic smoking devices use cartridges to contain the solution during vaporization. While these cartridges may initially be sold without nicotine, the may be refilled by the user with a liquid nicotine solution, creating the potential for exposure to dangerous concentrations of nicotine.

8. Clinical studies about the safety and efficacy of these products have not been submitted to the FDA for the over 400 brands of electronic smoking devices that are on the market, and for this reason, consumers have no way of knowing whether electronic smoking devices are safe, what types of potentially harmful chemicals the products contain, and what dose of nicotine the products deliver.

9. Electronic smoking devices often mimic conventional tobacco products in shape, size, and color, with the user exhaling a smoke-like vapor similar in appearance to the exhaled smoke from cigarettes and other conventional tobacco products.

10. Is the intent of the Common Council, and in enacting the ordinance codified in this section, to provide the public’s health, safety, and welfare by reducing the potential for children to associate with use of electronic smoking devices with the normative or healthy lifestyle and by prohibiting the sale or distribution of electronic smoking devices to minors.

11. The Common Council determines that prohibiting the sale, giving, or furnishing of e-cigarettes to minors and prohibiting the purchase, possession, or use of e-cigarettes by minors is in the City’s best interest and will promote public health, safety, and welfare.

B. Definition. “Electronic Smoking Device” has the same meaning as the same term in Paragraph 4.05 B.1. of the Code of General Ordinances.

C. Sales of Electronic Smoking Devices to Persons Under the Age of 18. No person may sell or offer for sale any Electronic Smoking Device to a person under 18 years of age.

D. Possession of Electronic Smoking Devices by Persons Under the Age of 18. No person under the age of 18 years of age may possess an Electronic Smoking Device.

No person may use, or possess with the primary intent to use, drug paraphernalia to plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test analyze, pack, repack, store, contain, conceal, inject, ingest, inhale or otherwise introduce into the human body a controlled substance in violation of this subsection.

Such prohibited mechanized processes include, but are not limited to, crushers or shredders.

8. There shall be strict compliance with Chapter XXII of the Code of General Ordinances, "Noise Control".

The unreasonable failure to permit inspections shall be grounds for permit denial, suspension or revocation.
I. Summary Suspension.

If in the opinion of the Code Official, the public is subject to imminent danger due to the violation by the permittee of any one or combination of more than one of the General Operating Requirements, the Code Official shall issue an order to the permittee requiring immediate cessation of those operations implicating the imminent danger. Pursuant to such order, the permittee shall cause such operations to cease as directed by the Code Official. The Public Safety and Welfare Committee shall provide the Code Official and the permittee with a copy of the report. Either the Code Official or permittee may make an objection, orally or in writing, to the report and shall have the opportunity to present arguments supporting the objection to the Common Council. The Common Council shall determine whether the arguments shall be presented orally or in writing, or both. If the Common Council, after considering the Committee's report and any arguments presented by the Code Official and permittee, finds the complaint to be true, or if there is no objection to a report recommending a suspension, revocation or nonrenewal, the permittee shall be suspended, revoked or not renewed as provided by law. If the Common Council finds the complaint untrue, the proceedings shall be dismissed without cost to the accused. The City Clerk shall give notice of each suspension, revocation or nonrenewal to the party whose Permit is affected.

13.12 TOWING SERVICE

A. Purpose. Motor vehicles must, of necessity, be removed from public or private property at the request of the City Police Department without the owner's permission, where said vehicles: are disabled, are abandoned, constitute a public or private nuisance, are illegally parked, are evidence, are stolen, or are or were in the ownership or control of a prisoner or dead or disabled person who is unable to personally arrange for towing. The above service shall be known as "Class I Tows". Other motor vehicles which become disabled may
be operated by parties who need to have their vehicle towed but who have no preference for a tower. In such cases, the public convenience requires the Police Department to arrange for towing services. Such service shall be known as "Class II Tows". Further, the convenience of the City requires that disabled City vehicles be towed promptly upon request for a reasonable fee. Such service shall be known as "Class III Tows".

In order to effectuate the above, it is necessary for towers who tow at the request of the City Police Department to be licensed by the City to insure that all tows will be made by adequately insured towers, who operate safe and efficient tow trucks, and who possess sufficient equipment to be able to respond to the vast majority of all Police Department calls for towing service, irrespective of the degree of difficulty of the call. Licensing will insure that towers have a sufficient amount of equipment as will enable City licensed towers to service City interest concurrently with the service of private sector customers. Licensing will also insure that towers are in a position to and will accept all calls for service in order to provide efficient services and in order to prohibit any tower from skimming off only the most desirable business and that towers have adequate and reasonably safe storage areas which are conveniently accessible to City residents. Licensing will insure tower responsiveness to the needs of the City and of City residents.

B. Definitions. The following words, as used herein, shall mean:

1. "Person" shall be any party, person, firm, corporation, partnership, association or other legal entity.

2. "Preference Tow" shall mean any motor vehicle accident or disablement where a motor vehicle operator, requiring towing service, expresses a preference as to a named wrecker.

3. "No Preference Tow" shall mean any motor vehicle accident or disablement where a motor vehicle operator, requiring towing service, expresses no preference as to a named wrecker.

4. "Wrecker" shall mean one engaged in the business of or offering the services of a motor vehicle tower.

5. "Licensee" shall be one who has been issued a license by the Common Council under this Ordinance to perform towing services for or at the request of the City of Kenosha or its Police Department.

6. "Tow" shall mean to remove a motor vehicle from a given place, whether temporarily or permanently disabled, by use of a vehicle designed or customarily used for that purpose, to a place of storage pending the repair, salvage, recovery, sale or disposal of said vehicle.

7. "Assignment" shall mean a call or referral by or from the City or its Police Department to a wrecker requesting towing services hereunder licensed.

8. "Storage lot" shall mean premises which are subject to use, in accordance with local and state laws, rules and regulations, as a place to temporarily keep towed vehicles pending the final disposition thereof. Storage lots must be completely enclosed with a six (6) foot high fence which is of such a nature as will offer reasonable protection for vehicles and their contents against theft and or vandalism. Any side of the enclosing fence which is viewable from a public thoroughfare must be constructed in such a manner as will screen from view the vehicles stored within the fenced enclosure. The storage lot shall provide outside storage for a minimum of thirty (30) vehicles and inside storage for a minimum of two (2) vehicles. The storage lot shall be located at the wrecker's (licensee's) principal place of business.

9. "Principal place of business" shall mean the address which is listed in the telephone book or with the telephone company as the location at which business telephones are located, and it shall mean the place at which tow trucks are routinely kept when not in operation, and the location of the central business office.
C. License Required. No person or wrecker shall engage in Class I, II and III tows within the City or at the request of the City, or its Police Department, without first having obtained a license therefor from the Common Council. Further, no person shall be assigned no preference tows without first being licensed hereunder. The acceptance of a license shall constitute a declaration and agreement of the licensee to perform licensed activities subject to the terms and conditions of this Ordinance. The acceptance of a license constitutes a commitment of the licensee to perform towing services hereunder and shall not be deemed a means of or authorize the business or practice of a designated licensee referring assignments to another license. A licensed tower may not relocate his principal place of business or storage lot without first obtaining the permission of the Common Council following review thereof by the Public Safety & Welfare Committee. City towing licenses may not be transferred or assigned without prior approval of the Common Council following review thereof by the Public Safety & Welfare and Finance Committees.

D. Application. Application for such license shall be made, in writing, to the City Clerk upon such forms as shall be prescribed by the City Clerk. The City Clerk, when the application is completed as herein specified, shall refer said application to the Finance Committee for recommendation, as soon as such referral is practicable. The applicant must provide the following information as a condition of said application being considered for approval: Name, legal existence if other than an individual; names of partners or associates, if a partnership or association; names of officers if a corporation; place of incorporation if a corporation; address of principal place of business and business phone number; distance from City limits proper of principal place of business if address is outside of the City limits; description of security for storage lot; number of vehicles which can be kept on storage lot; number of towing vehicles in service at time of application with their description, including gross vehicle weight, winch capacity and equipment, vehicle identification number and state motor vehicle license number of all towing vehicles. The application shall also contain a copy of any leases or agreements applicant may have for the use of a storage lot where applicant does not own such a lot and a copy of any leases for tow trucks. Own or exclusively lease for the license period two (2) tow trucks - one (1) of which shall have a minimum four (4) ton winch capacity and one (1) of which shall have a minimum GVW of 12,000 pounds and a minimum eight (8) ton winch. As an alternative for the tow truck with a minimum GVW of 12,000 pounds and a minimum eight (8) ton winch a flat bed truck with a minimum GVW of 20,000 pounds and a minimum four (4) ton winch, with a compatible hydraulic combination of eight (8) tons, may be substituted. Each truck shall be equipped with a two-way commercial radio, lights and such other safety devices as will comply with Chapter 347, Wisconsin Statutes, a rubber tow sling, a dolly, 100 feet of tow cable, and equipment for cleaning up glass and debris at an accident scene.    a. Towing services are being adequately performed in the City by the City licensed wreckers.

   c. The licensing of wreckers over and above need will create problems in the administration and enforcement of this Ordinance, creating unnecessary expense for the City and providing a potential for a deterioration of towing services in the City.

2. Additional Licenses. No towing license applications will be accepted or processed under this Ordinance unless the Common Council first finds and determines that the then licensed towers are unable or unwilling to provide for the quantity and quality of towing service which is required to serve the needs of the City. Any wrecker who is otherwise able to comply with this Ordinance may request the Common Council to hold a hearing on the requirement of "need". However, such a hearing will not be held unless the wrecker requesting such a hearing alleges that the factors dictating need on the effective date of this Ordinance have materially and substantially changed thereafter.

This Ordinance shall become effective upon passage and publication. Existing licensees need not be relicensed prior to July 1, 1983. A. Maximum Number of Signs and Maximum Area of Sign Faces. The total number and maximum area of Sign Faces shall not exceed the parameters contained in Table 1, except as provided below:

Normal grade shall be construed to be the higher of the existing grade prior to construction, or the newly established grade after construction, exclusive of any filling, berming, molding, or excavating solely for the purpose of locating the Sign. Where the normal grade cannot reasonably be determined, Sign height shall be calculated on the basis that the elevation of the grade at the base of the Sign is equal to the elevation of the nearest point of the crown of a street or the grade of the land at the principal entrance to the Principal Building on the Premise, whichever is lower.

This Section is intended to protect the public health, safety and welfare by regulating the construction, materials, placement/location, size, height, spacing and maintenance of Off-Premise Commercial Signs. This Section is designed to ensure that Off-Premise Commercial Signs are compatible with other Signs and land uses, and are not detrimental to the aesthetic quality of the community.

Off premise commercial signs are subject to City approval pursuant to the following procedures:

1. Sign Replacement (same size sign in the same location): off premise sign permit.

2. New Sign Location or Relocation where the Proposed Sign is 300 Square Feet or Less: site plan review in conformance with Section 14.0 of the Zoning Ordinance.

3. New Sign Location or Relocation where the Proposed Sign is Greater than 300 Square Feet: site plan review in conformance with Section 14.0 of the Zoning Ordinance.

6. Digital Display: conditional use permit in conformance with Section 4.0 of the Zoning Ordinance.

All Off-Premise Commercial Signs existing in the City shall be maintained in accordance with the following conditions and restrictions.

B. Illumination.

1. The light rays from any Off-Premise Commercial Sign which is externally illuminated shall be cast directly upon the Sign Face surface and shall not be visible to motor vehicle operators, except as may be reflected from the Sign Face. The illumination of Off-Premise Commercial Signs will not be permitted between 12:00 A.M. and 5:00 A.M. No Off-Premise Commercial Sign shall contain flashing elements or video displays.

2. Digital Display Illumination. Digital Display Off-Premise Signs shall be subject to the following regulations:
   a. Each change of message shall be accomplished in one second or less.
   b. Each message shall remain in a fixed position for at least 6 seconds.
   c. The use of traveling messages or segmented messages is prohibited.
   d. No variable message sign lamp may be illuminated to a degree of brightness that is greater than necessary for adequate visibility. Signs found to be brighter than necessary for adequate visibility shall be adjusted by the person owning or controlling the sign in accordance with the instructions of the Common Council.
   e. The Common Council by rule, may prohibit or establish restrictions on the illumination of messages to a degree of brightness that is greater than necessary for adequate visibility.
   f. The illumination of Off-Premise Commercial Signs with Digital Display Illumination has no restriction of hours of operation.

C. Wind Load Requirement. Off-Premise Commercial Signs shall be maintained so as to withstand a wind load/pressure of not less than thirty (30) pounds to the square foot.

D. Nonconforming Off-Premise Commercial Signs. Any existing Off-Premise Commercial Sign
constructed, erected and installed in accordance with applicable State and local laws, rules and regulations established on the effective date of this Ordinance and which Sign becomes Nonconforming by the provisions herein, shall be a Nonconforming use and any Sign which, as a result of subsequent amendments hereto becomes Nonconforming, shall also be a Nonconforming use and is to be subject to Section 7.0 of the Zoning Ordinance.

No Nonconforming Off-Premise Commercial Sign structure shall be altered or reconstructed, unless the alteration or reconstruction is in compliance with the provisions of Section 7.0 of the Zoning Ordinance. For the purpose of this Section only, the term "altered or reconstructed" shall not include painting, rustproofing, changing of advertising message or the installation of cable and bracket components necessary to ratchetafully anchor a flex billboard of the type having a fully recyclable polyethylene substrate. For inspection purposes, an approved building permit must be obtained prior to the commencement of any work associated with the installation of cable and bracket components.

Nonconforming Off-Premise Commercial Signs may continue in use only when in compliance with the following:

1. The Sign must have been actually in existence as of the effective date of this Ordinance.

2. The Sign may be sold, leased, or otherwise transferred without affecting its Nonconforming status, but its location may not be changed. An off-premise commercial sign removed as a result of a street Right-of-Way taking or for any other reason may be relocated.

3. The Sign must have been constructed, erected, and installed in accordance with applicable State and local laws, rules and regulations that were in effect at the time this Ordinance was enacted, and must continue to be maintained in accordance with this Ordinance. Failure to adhere to rules and regulations associated with construction, erection and installation of Off-Premise Signs, including failure to obtain permit approvals, shall render the Sign illegal.

4. In accordance with Section 62.23(7)(h), Wisconsin Statutes, Signs which are a nonconforming use must remain the same as they were on the effective date of this Ordinance and may not be enlarged or expanded. Any extension, enlargement, rebuilding, changing the materials of the Sign structure, changing the size of the Sign structure materials, adding catwalks, adding guys or struts for stabilization of the Sign or structure, adding lights to a nonilluminated Sign, changing the height of the Sign aboveground, structural alteration to prolong the life of the sign or re-erection of the Sign shall not during the sign's life exceed 50 percent of the assessed value of the sign unless permanently changed to a conforming use.

5. The Sign may continue in use as long as it is not abandoned or discontinued. A Sign is deemed destroyed when it is rendered any or all of the following descriptions: dismantled, removed or modified from it original state. A Sign is deemed abandoned or discontinued if for a period of twelve (12) months or longer, it is composed of obsolete advertising matter, or is without advertising matter, or is in need of substantial repair provided that any period of involuntary discontinuance which occurs during the period a street is closed shall not be considered. A Sign is deemed abandoned or discontinued if the name of the owner does not appear thereon and if the name and address of the current owner is not readily ascertainable from records on file with the Department of Community Development and Inspections.

An unsafe to abandoned Sign is declared a public nuisance, which shall be abated by the owner within sixty (60) days of receiving notice from the Department. After sixty (60) days, the Sign may be removed by the Department, and the cost thereof shall be placed on the tax roll as a special assessment and become a lien against the benefited property, unless paid sooner.

E. Identification of Sign Erector. On every Off-Premise Sign erected, the erector shall, in a permanent manner, state the name and address of the Sign erector that erected the Sign, the permit number, and the date of its erection. Such information must be readable from a distance of at least one (1) foot.
F. Off-Premise Sign License.

1. License Required. An annual Off-Premise Sign License for each Off-Premise Sign Face.

2. Fees. The fee for such License shall be calculated for each Sign Face. License fees are not proratable. License fees shall be deposited in a special revenue fund, which shall be used to offset the City’s cost associated with the annual inspection and licensing of each Sign Face. The Common Council shall, from time to time, establish the License Fees.

3. Term. Every License issued hereunder shall expire on the first (1st) day of July of the year following the date of issuance.

G. Replacement Sign Credit. The owner of an existing Off-Premise Sign may receive a Replacement Sign Credit upon removal of an existing Off-Premise Sign. The owners or operators of Off-Premise Signs which are ordered to be removed by the Administrator to protect the public’s welfare and safety, or Signs which are damaged or destroyed beyond twenty-five (25%) percent of its then current value, may also receive a Replacement Sign Credit.

The Replacement Sign Credit shall be subject to the following conditions:

1. The Replacement Sign Credit shall not expire.

2. Replacement Sign Credits are transferable.

3. The holder of the Replacement Sign Credit shall locate and construct, install and erect an Off-Premise Sign in accordance with this Ordinance as it exists at the time of construction, erection and installation.

4. A Replacement Sign Credit shall be awarded for each sign face removed.

H. Replacement Sign Credits. Off-Premise Signs constructed as a result of Replacement Sign Credits shall be subject to the following Ordinance standards.

1. Permitted Zoning Districts. Off-Premise Signs are permitted only in the B-2, M-1, M-2 Zoning Districts and are subject to the regulations of those districts.

2. Size Requirements. Off-Premise Signs shall not exceed six hundred seventy-two (672) square feet of Sign Face area per Sign Face, not including any trim, supporting frame work, uprights or decorative fencing/apron, for a total Sign Face area of one thousand three hundred forty-four (1,344) square feet to include both sides and faces. The Sign Face area per Sign Face shall be calculated on the basis of adding together the area of the Off-Premise Sign Face(s) that can be read from one (1) direction at one (1) time. Where two identical Off-Premise Signs are placed back-to-back on the same Sign supports, the Signs shall not be separated by more than four (4’) feet so that both Sign Faces cannot be read from one direction simultaneously. A Sign extension comprising no more than ten (10%) percent of the allowable Sign Face area may be added providing the extension does not extend more than five (5’) feet beyond the perimeter of the Sign Face.

3. Setback Requirements. Off-Premise Signs shall be set back fifteen (15’) from the Street Right-Of-Way and shall be located so as to avoid any contact with communication and/or electrical lines. The distance will be measured from the area of the Sign structure closest to the Street Right-Of-Way. Off-Premise Signs shall also comply with setback and other requirements of State law when located abutting Federal or State highways, or interchanges.

4. Spacing Between Off-Premise Signs. Off-Premise Signs shall comply with the spacing requirements of State laws, rules, and regulations, and in no case shall Off-Premise Signs be permitted to be constructed, erected or installed within five hundred (500) feet of another Off-Premise Sign on the same side of the street.

5. Height. The maximum height to the top of any Off-Premise Sign shall be thirty-five (35’) feet. The height of a such Sign shall be computed as the distance from the base of the Sign at normal grade to the top
of the highest attached component of the Sign. Normal grade shall be construed to be the higher of: the
existing grade prior to construction; or the newly established grade after construction exclusive of any filling,
berming or excavating solely for the purpose of locating the Sign. In cases in which the normal grade cannot
reasonably be determined, height shall be computed on the assumption that the elevation of the normal grade
at the base of the Sign is equal to the elevation of the nearest point of the crown of a public street.
Off-Premise Signs located on a premise adjacent to frontage roads, on interstates, expressways, or State
highways where pavement grade may be higher due to bridges entrance/exit ramps may be allowed to
achieve a maximum height of thirty-five (35') feet above the highest point of that pavement grade. Signs
within one thousand (1,000') feet of the Interstate Highway Right-of-Way shall have a maximum height of forty
(40') feet above the center line of the roadway from which it is intended to be viewed, or grade at the sign
structure, whichever is greater. If adjacent to an Interstate Highway bridge or viaduct shall have a maximum
height of fifty (50') feet above the center line of the roadway from which it is intended to be viewed or grade at
the sign structure, whichever is greater.

6. Off-Premise Signs are prohibited in any Historic District, on any bridge crossing, and shall not be
located on or over the roof of a building.

7. Off-Premise Signs shall not be constructed, erected or installed within seventy-five (75') feet of the B-3
Central Business District.

Off-Premise Signs shall not be constructed, erected or installed one hundred fifty (150') feet of any
Residential or IP Institutional Park District. This restriction shall not be applicable to any Residential or IP
Institutional Park District Zoned property located on State Highways.

Off-Premise Signs shall not be constructed, erected or installed within two hundred (200') feet of any
Historic Site or Historic District, or any school, church, public park, Recreation Area or public playground. This
distance shall be measured from the outermost portion of the Off-Premise Sign structure.

8. No Off-Premise Sign shall be erected in a location prohibited by this Ordinance.

9. No Off-Premise Sign shall be erected so as to prevent ingress or egress from any door or window, or
any other exitway required by the Building or Fire Codes of the City.

10. No Off-Premise Sign shall be located in such a manner as to obscure, or otherwise interfere with the
effectiveness of a traffic Sign, signal or device, obstruct or physically interfere with a motor vehicle operator's
view of approaching, merging or intersecting traffic.

11. No Off-Premise Sign shall be attached to a standpipe, gutter drain or fire escape.

12. No Off-Premise Sign shall be erected so to impair access to a roof.

1. Off-Premises Signs in City Parks or Recreation Areas. This section does not apply to off-premise
signs placed in City parks or recreational areas pursuant to authorization for non-permanent placement, from
the Parks Commission.

J. Off-Premise Sign Cap. The number of Off-Premise Signs in the City is limited to 105 signs, which is
the number of such Signs in existence on the 1st day of October 2011, notwithstanding the addition of any
existing signs as the result of annexation or attachment. The installation of an Off-Premise Sign is permitted
only with Replacement Sign Credits.

15.16 CONSTRUCTION AND MAINTENANCE

The construction, erection, installation, anchorage, wiring and maintenance of all Signs shall be subject to
the City Building Code, where applicable.

No Sign shall be constructed, erected, installed or maintained in a dangerous or unsafe condition or in a
condition of substantial disrepair.

Overhead wiring to or from the Sign, of any type, is prohibited. No electrical connections may be made
from any Sign to an electrical service, or from an electrical service to any Sign, except by a licensed electrician, and in conformance with the City Building Code. Electrical systems for Signs shall be properly permitted through the Department of Community Development and Inspections and wired in accordance with Building Code standards.

All Signs, together with all of their supports, braces, guys and anchors, shall be of rust-inhibitive material or treatment and shall be maintained in a good and serviceable condition. The display surfaces of all Signs shall be kept in a condition that will not contribute to blight.

15.161 REINSPECTION FEES

To compensate the City for inspection and administrative costs related to the enforcement of this Chapter, a fee of Sixty ($60.00) Dollars may be charged for any reinspection following the initial inspection which resulted in an order for corrective action and the first reinspection to determine compliance with an order for corrective action issued hereunder. There shall be no reinspection fee for a final inspection indicating compliance or for a reinspection occurring during the period of an approved time extension granted for good cause and involving a “good faith” effort on the part of the property owner to comply with the order. A fee of Ninety ($90.00) Dollars may be charged for a second reinspection; a fee of One Hundred Eighty ($180.00) Dollars may be charged for a third reinspection; and, a fee of Three Hundred Sixty ($360.00) Dollars may be charged for each subsequent reinspection. Reinspection fees which are not paid by or on behalf of the property owner within thirty (30) days of mailing of an invoice to the property owner of record on the City tax roll shall be charged and collected as a special assessment against the real estate upon which the reinspections were made, and shall be lien upon the real estate until paid in full, with interest accruing on the unpaid balance at the rate of seven (7%) percent per annum. There shall also be a One Hundred ($100.00) Dollar administrative charge added to the charge and special assessment to cover the administrative costs of charging and specially assessing the property.

15.162 RECURRING VIOLATION

As used herein, “recurring violation” shall mean a second, or any subsequent violation of any provision of this Chapter 15 committed by a person within any one (1) year period and for which the person admits responsibility or is determined to be the responsible person.

Whenever a notice of violation and order has been issued to the responsible person or tenant, where relevant, for a violation of this Code, no further notice and order shall be necessary for any recurrence of the same or similar violation prior to the commencement of any forfeiture action or prior to seeking an injunction in a court of record.

15.17 APPEALS AND SPECIAL EXCEPTIONS

A. Administration. It shall be the duty of the Administrator to administer and enforce this Ordinance.

B. Special Exceptions. Upon application for a Special Exception, the City Plan Commission may, after investigation and public hearing, grant a Special Exception from the terms of this Ordinance where such Special Exception will not be contrary to the spirit and purpose of this Ordinance, and where a Special Exception will do substantial justice.

In addition, the City may require that lands altered or filled to a depth of four (4') feet or more with earth or nonearth materials shall not be divided into building sites, except where soil tests prepared by a professional engineer clearly show that the soils are suited to development. Soil reports may be required to consider, but need not be limited to, an evaluation of soil permeability, depth to groundwater, depth to bedrock, soil bearing capacity, soil compaction, and the presence of toxic or hazardous materials. Where the Common Council determines land is not suitable for development, it shall, in writing, recite the particular facts upon which it bases its conclusion and afford the Subdivider an opportunity to present evidence in rebuttal to such finding of unsuitability. F. Preliminary Plat Review. In all phased developments, the Subdivider shall submit a Preliminary Plat and application. The Subdivider of a single phase development may submit a Preliminary Plat. The Preliminary Plat shall be prepared in accordance with this Ordinance. The Subdivider shall file with the Director of Community Development and Inspections the number of copies determined by the Director of Community Development and Inspections of the Plat and the application. The Subdivider shall pay the review fee therefor established by the Common Council, from time to time, by Resolution. The review fee entitles the Subdivider to two (2) permitted reviews, one (1) initial review and one (1) resubmittal. 1. The Subdivider shall, pursuant to Section 236.12(6) of the Wisconsin Statutes, submit the original drawing of the Preliminary Plat directly to the Wisconsin Department of Administration, which will prepare and forward copies of the Plat, at the Subdivider’s expense, to the Objecting Agencies. It shall be the responsibility of the Subdivider to submit the additional copies required by this Ordinance.

2. The Director of Community Development and Inspections shall provide copies of the Preliminary Plat to the Reviewing Agencies for their review and recommendations concerning matters within their jurisdiction.

4. The City Plan Commission and Public Works Committee shall examine the Preliminary Plat as to its conformance with this Ordinance; consider review comments from Objecting and Reviewing Agencies required to review and comment on the Plat; and shall recommend approval, approval with conditions or rejection of the Preliminary Plat to the Common Council.

G. Preliminary Plat Approval. The Objecting Agencies shall, within twenty (20) days of the date of receiving their copies of the Preliminary Plat, notify the Subdivider and all other Objecting Agencies of any objections. If there are no objections, they shall so certify on the face of the copy of the Plat and shall return that copy to the Director of Community Development and Inspections. If an objecting agency fails to act within twenty (20) days, it shall be deemed to have no objection to the Plat. In addition:

1. The Common Council shall, within ninety (90) days of the date of filing of a Preliminary Plat with the Director of Community Development and Inspections, approve, approve conditionally, or reject such Preliminary Plat. One (1) copy of the Plat shall thereupon be returned to the Subdivider with the date and action endorsed thereon; and if approved conditionally or rejected, a letter setting forth the conditions of approval or the reasons for rejection. One (1) copy each of the Plat and letter shall be placed in the Department of Community Development and Inspections file. Failure of the Common Council to act within ninety (90) days shall constitute an approval of the Plat, as filed, unless the review period is extended by mutual consent of the Director of Community Development and Inspections and Subdivider.

2. Approval or conditional approval of a Preliminary Plat shall not constitute automatic approval of the Final Plat, except that if the Final Plat is submitted within thirty-six months of the last required approval by the Common Council or state, if applicable of the Preliminary Plat and conforms substantially to the Preliminary Plat layout as indicated in Section 236.11(1)(b) of the Wisconsin Statutes, the Final Plat shall be entitled to approval with respect to such layout. Any agency vested by law to have final approving authority of a plat may extend the time for submission of a Final Plat. The Preliminary Plat shall be deemed an expression of approval or conditional approval of the layout submitted as a guide to the preparation of the Final Plat, which will be subject to further consideration by the City Plan Commission and the Common Council at the time of its submission. The Director of Community Development and Inspections shall provide his or her conclusions as to whether the Final Plat conforms substantially to the Preliminary Plat and provide his or her recommendations on approval of the Final Plat. The conclusions and recommendation shall be made a part of the record of the proceeding at which the Final Plat is being considered and are not required to be submitted in writing.

H. Final Plat Review. The Subdivider shall submit a Final Plat and an application in accordance with this Ordinance and shall file with the Director of Community Development and Inspections the number of copies determined by the Director of Community Development and Inspections of the Plat and the application. The Subdivider shall pay the review fee therefor established by the Common Council, from time to time, by Resolution. The review fee entitles the Subdivider to two (2) permitted reviews; one (1) initial review and one (1) resubmittal. All further resubmittals submitted after the two permitted reviews will be conducted only upon payment of a resubmittal fee therefor established by the Common Council, from time to time, by Resolution.

1. The Subdivider shall, pursuant to Section 236.12(6) of the Wisconsin Statutes, submit the original drawing of the Final Plat directly to the Wisconsin Department of Administration, which will prepare and forward copies of the Plat at the Subdivider’s expense to the Objecting Agencies. It is the responsibility of
the Subdivider to submit the additional copies of the Final Plat to the Director of Community Development and Inspections for review as required by this Ordinance.

2. The Director of Community Development and Inspections shall provide copies of the Final Plat and application to the Reviewing Agencies for their review and recommendations concerning matters within their jurisdiction.

3. If the Plat or any portion thereof is within one thousand (1,000') feet of a village, the Director of Community Development and Inspections, as provided in Section 236.11(2) of the Wisconsin Statutes, shall provide to the Village Clerk at least ten (10) days prior written notice of the City’s intention to approve the Plat, but failure to give such notice shall not invalidate any such Plat.

4. The City Plan Commission and Public Works Committee shall examine the Final Plat as to its conformance with the approved Preliminary Plat.

I. Final Plat Approval. The Objecting Agencies shall, within twenty (20) days of the date of receiving their copies of the Final Plat, notify the Subdivider and all other Objecting Agencies of any objections. If there are no objections, they shall so certify on the face of the copy of the Plat and shall return that copy to the Director of Community Development and Inspections. If an Objecting Agency fails to act within twenty (20) days, it shall be deemed to have no objection to the Plat. In addition:

1. A Final Plat shall be submitted within six (6) months of the last required approval of the Preliminary Plat.

2. The Common Council shall, within sixty (60) days of the date of filing of a Final Plat with the Director of Community Development and Inspections, approve, approve conditionally, or reject such Final Plat. One (1) copy of the Plat shall thereupon be returned to the Subdivider with the date and action endorsed thereon; and, if approved conditionally or rejected, a letter setting forth the conditions of approval or the reasons for rejection shall accompany the plat. One (1) copy each of the Plat and letter shall be placed in the Department of Community Development and Inspections file. Failure of the Common Council to act within sixty (60) days shall constitute an approval of the Plat, as filed, unless the review period is extended by mutual consent of the Director of Community Development and Inspections and Subdivider.

3. Upon failure of the Common Council to take action on the Plat within sixty (60) days, the Plat shall be deemed approved, provided the time having not been extended and no unsatisfied objections having been filed, and all fees payable by the Subdivider having been paid.

4. After the Final Plat has been approved by the Common Council and the State, and an assurance assuring the construction and installation of required improvements is filed, the City Clerk/Treasurer shall cause the certificate inscribed upon the Plat attesting to such approval to be duly executed. The Director of Community Development and Inspections shall then record the Plat with the Kenosha County Register of Deeds, within twelve (12) months of the last approval, and within thirty-six (36) months of the first approval.

J. Appeals. Any person aggrieved by an objection to a Plat or a failure to approve a Plat may appeal such objection or failure to approve as provided in Section 236.13(5) of the Wisconsin Statutes, within thirty (30) days of notification of the objection to the Plat or of the failure to approve the Plat.

Subdivider shall file with the Director of Community Development and Inspections the number of copies determined by the Director of Community Development and Inspections of the Certified Survey Map and application. The Subdivider shall pay the review fee therefor established by the Common Council, from time to time, by Resolution. The review fee entitles the Subdivider to two (2) permitted reviews; one (1) initial review and one (1) resubmittal. All further resubmittals submitted after the two permitted reviews will be conducted only upon payment of a resubmittal fee therefor established by the Common Council, from time to time, by Resolution. In addition:

1. The Director of Community Development and Inspections shall provide copies of the Certified Survey Map and application to the Reviewing Agencies for their review and recommendation concerning matters within their jurisdiction.

2. The Common Council, upon receiving City Plan Commission and Public Works Committee recommendations, shall approve, approve conditionally or reject such map within ninety (90) days from the date of filing of the map with the Director of Community Development and Inspections unless the time is extended by mutual consent of the Director of Community Development and Inspections and Subdivider. If the map is rejected, the reason(s) shall be stated in the minutes of the meeting and a written statement forwarded to the Subdivider.

3. After the Certified Survey Map has been approved by the Common Council, and the assurance assuring the construction and installation of required improvements is filed, the City Clerk/Treasurer shall cause the certificate to be inscribed upon the map attesting to such approval to be duly executed. The Director of Community Development and Inspections shall then record the map with the Kenosha County Register of Deeds within six (6) months of Common Council approval.

L. Lot Line Adjustment Survey Review and Approval. A Lot Line Adjustment Survey shall be required for any divisions of land which do not alter the exterior boundaries of the parcels being surveyed and do not result in the creation of additional lots. The Subdivider shall prepare the Lot Line Adjustment Survey in accordance with this Ordinance, and the Subdivider shall file with the Director of Community Development and Inspections the number of copies determined by the Director of Community Development and Inspections of the Lot Line Adjustment Survey and the application. The Subdivider shall pay the review fee therefor established by the Common Council, from time to time, by Resolution. 1. The Director of Community Development and Inspections shall, within thirty (30) days from the date of filing of the survey with the Director of Community Development and Inspections, unless the time is extended by mutual consent of the Director of Community Development and Inspections and Subdivider, approve or reject the survey, and transmit the decision in writing to the Subdivider. If the Survey is rejected, the reason(s) shall be stated in a written statement forwarded to the Subdivider. Any Subdivider objecting to the decision of the Director of Community Development and Inspections may appeal the decision to the Common Council. Such appeal shall be filed with the Director of Community Development and Inspections within thirty (30) days of the date of the decision by the Director of Community Development and Inspections.

17.09 DESIGN STANDARDS FOR LAND DIVISIONS

A. Streets. In any new Land Division, the street layout shall conform to the arrangement, width and location indicated on the Official Map, County Jurisdictional Highway System Plan and Comprehensive Plan. In areas for which such plans have not been completed, the street layout shall recognize the functional classification of the various types of streets and shall be developed and located in proper relation to existing and proposed streets. The Land Division shall be designed so as to provide each lot with satisfactory access to a public street. In addition:

1. Arterial streets shall be arranged so as to provide ready access to centers of employment, centers of governmental activity, community shopping areas, community recreation, and points beyond the boundaries of the community. Arterial streets shall also be properly integrated with and related to the existing and proposed area-wide system of arterial streets and highways and shall be, insofar as practicable, continuous and in alignment with existing or planned streets with which they are to connect.

2. Collector streets shall be arranged so as to provide ready collection of traffic from residential areas and conveyance of this traffic to the major street and highway system and shall be properly related to the mass transportation system, to special traffic generators such as schools, churches and shopping centers and other concentrations of population and to the major streets to which they connect.

3. Minor streets shall be arranged to conform to the topography, to discourage use by through traffic, to permit the design of efficient storm and sanitary sewerage systems, and water supply systems, and to require the minimum street area necessary to provide safe and convenient access to abutting property.

4. Proposed streets shall extend to the boundary lines of the Land Division unless prevented by topography or other physical conditions, or as determined by the City Plan Commission. A temporary turnaround may be required on deadend streets over one hundred fifty (150') feet in length. If required, the temporary turnaround must be constructed with an asphalt surface within the boundaries of the Land Division, unless an easement can be obtained by the Subdivider from the adjoining property owner. The temporary turnaround can be removed, with an authorization from the Director of Community Development and Inspections, when related conditions within the developers agreement have been met.

5. Whenever the proposed Land Division contains or is adjacent to an arterial street or highway, adequate protection of residential properties, limitation of access and separation of through and local traffic shall be provided by reversed frontage, with screen planting contained in a nonaccess reservation along the rear property line, or by the use of frontage streets.

6. Stream or lake shores shall have an access Platted in accordance with Section 236.16(3) of the Wisconsin Statutes.

7. North-South oriented streets shall be numbered consecutively and shall be called "avenues". East-west oriented streets shall be numbered consecutively and shall be called "streets". North-south oriented streets Platted in between existing consecutively numbered "avenues" shall be called "courts". East-west oriented streets Platted in between existing consecutively numbered "streets" shall be called "places". Diagonal streets shall be named by the Common Council, upon recommendation by the City Plan Commission. Streets extended or projected, whether connected or intermittent, shall use the same name. Street names for noncontiguous streets shall not duplicate or be similar to existing street names located elsewhere in the City.

B. Limited Access Highway and Railway Right-of-Way Treatment. Whenever the proposed Land Division contains or is adjacent to a limited access highway or railway right-of-way, and when lots within the proposed Land Division back upon the right-of-way of an existing or proposed limited access highway or a railway, a planting strip at least twenty (20') feet in depth shall be provided adjacent to the highway or railway in addition to the normal lot depth. This strip shall be a part of the Platted lots, but shall have the following or equivalent restriction lettered on the face of the Plat: "This strip reserved for the planting of trees and shrubs; the building of structures hereon is prohibited."

C. Street Design Standards. The minimum right-of-way and roadway width of all proposed streets
shall be as specified by the Comprehensive Plan or County Jurisdictional Highway System Plan; or if no width is specified therein, the minimum widths shall be designed per City criteria approved by the Public Works Committee (Board of Public Works), and on file in the Department of Public Works. Cross-sections for freeways, expressways and parkways should be based upon detailed engineering studies. In addition:

1. Cul-de-Sac Streets. Cul-de-sac streets designed to have one end permanently closed shall not exceed seven hundred fifty (750') feet in length. Cul-de-sac streets shall terminate in a teardrop turnaround having a minimum right-of-way radius of sixty (60') feet and a minimum outside curb radius of forty-eight (48') feet. If a center island is provided, the island shall be landscaped and maintained by an owners association, and provide a minimum pavement width of twenty-four (24') feet. Detailed dimensions for a typical cul-de-sac are shown in Illustration Nos. 3 and 4 to this Ordinance. Cul-de-sac streets shall be used only when the existing street layout or exceptional topography does not permit otherwise.

2. Street Grades. Unless necessitated by exceptional topography, the maximum centerline grade of any street shall not exceed five (5%) percent, nor be less than five-tenths (0.5) of one (1%) percent. Street grades shall be established, wherever practicable, so as to avoid excessive grading, removal of ground cover and tree growth, and general leveling of the topography. All changes in street grades shall be approved by the City Engineer.

3. Radii of Curvature. When a continuous street centerline deflects at any one point by more than ten (10°) degrees, a circular curve shall be introduced having a radius of curvature on said centerline of not less than the following:
   a. Arterial streets and highways: five hundred (500') feet.
   b. Collector streets: two hundred fifty (250') feet.
   c. Minor streets: one hundred (100') feet.

A tangent at least one hundred (100') feet in length shall be provided between reverse curves on arterial and collector streets.

4. Roadway Elevations. Elevations or roadways passing through floodplain areas shall be designed in the following manner:
   a. Arterial streets shall be designed so that they will not be overtopped by the 50 year recurrence interval flood.
   b. Minor streets shall be designed so that they will not be overtopped by the 10 year recurrence interval flood.

5. Half-Streets. Where an existing dedicated or Platted half-street is adjacent to the tract being subdivided, the other half of the street shall be dedicated by the Subdivider. The Platting of new half-streets is permitted, but development of property adjacent to half-streets is not permitted until the other half of the street has been dedicated and construction of the full street is completed.

D. Street Intersections. Streets shall intersect each other at as nearly right angles, where possible, as topography and other limiting factors of good design permit. In addition:

1. The number of streets converging at one intersection shall be limited to not more than two (2).
2. The number of intersections along arterial streets and highways shall be held to a minimum. Whenever practicable, the distance between such intersections shall not be less than one thousand two hundred (1,200') feet.
3. If the centerlines of minor streets approach arterial or collector streets from opposite sides within one hundred twenty-five (125') feet of each other, measured along the centerlines of the arterial or collector street, then the location shall be so adjusted that an aligned intersection is created.

E. Blocks. The widths, lengths and shapes of blocks shall be suited to the planned use of the land; zoning requirements, need for convenient access; control and safety of street traffic; and the limitations and opportunities of topography. In addition:

1. The length of blocks in residential areas should not be less than five hundred (500') feet, nor more
than one thousand (1,000') feet in length, unless otherwise dictated by exceptional topography or other
limiting factors of good design or otherwise approved by the City Plan Commission.

2. The width of blocks shall be wide enough to provide for two (2) tiers of lots of appropriate depth,
except where otherwise required to separate residential development from through traffic.

3. Utility easements shall, where practical, be placed along rear lot lines. All new utilities shall be
placed underground.

F. Lots. The size, shape, and orientation of lots shall be appropriate for the location of the Land
Division and for the type of development and land use contemplated. In addition:

1. Side lot lines shall be at right angles to straight street lines or radial to curved street lines on which
the lots face. Lot lines shall follow municipal boundary lines, rather than cross them.

2. Double frontage and reverse frontage lots shall be prohibited, except where necessary to provide
separation of residential development from through traffic or to overcome specific disadvantages of
topography and orientation.

3. Every lot shall front or abut a public street for a distance of at least forty (40') feet. Flag lots not
meeting the minimum frontage requirement shall be prohibited. Lots on curved public streets or public
cul-de-sac streets shall comply with the lot frontage requirements of Section 3.03 C.4. of the Zoning
Ordinance.

Exceptions to the public street lot frontage standards may be made for non-residential land divisions
provided all of the following standards are met:

(a) Lots may front or abut a private paved street for a distance of at least forty (40') feet where the
private street has a minimum width of twenty (20') feet and is constructed with curb and gutter;

(b) The private street was approved under a Site Plan Review or a Conditional Use Permit;

(c) Recorded access easements and any maintenance agreement are provided to the City with any
Land Division application requested under this Section; and,

(d) Public street building setback requirements shall apply in the same manner with respect to private
streets.

4. The average lot area shall be no less than ten thousand (10,000) square feet in each land division,
or within each phase of the land division in a multi-phase development. No individual lot within a land
division or within any phase of the land division in a multi-phase development shall be less than eight
thousand (8,000) square feet in lot area.

Exceptions to the lot area/lot width standards may be made for land divisions:

(a) Which are located within existing developed neighborhoods having lesser or greater development
standards. In such case, the minimum lot width and minimum lot area shall be determined by taking the
average of all lots within a one thousand (1,000') foot radius from the land division perimeter; or,

(b) Which are located within an area having a duly adopted neighborhood plan having specified
development standards.

5. Depth of lots shall be a minimum of one hundred twenty (120') feet, unless otherwise stated in the
Zoning Ordinance. Excessive depth in relation to width shall be avoided and a proportion of two to one
(2:1) shall generally be considered a desirable ratio of depth to width. Depth of lots or parcels reserved or
laid out for commercial or industrial use shall be adequate to provide for off-street service and parking
required by the use contemplated.

6. Lands lying between the meander line and the water's edge and any otherwise unplattable lands
which lie between a proposed Land Division and the water's edge shall be included as part of lots, outlots or
public dedications in any Plat abutting a lake or stream.

7. Grades of lot line swales shall be a minimum of one (1%) percent, except where exceptional
topography exists to create undue hardship, the City Engineer may consider and approve an exception to
this standard.

8. Lots whose only street access is the end of a dead end street, shall not have a driveway access,
unless a cul-de-sac or public street designed to City standards is constructed on the lot.

9. All corner lots shall be Platted with a radius at the intersection of the street right-of-way lines concentric with the standard curb and gutter radius.

G. Special Restrictions. Special restrictions which are appropriate to the location or design of the Land Division may be required by the Plan Commission and shall be shown on the Final Plat or Certified Survey Map. Examples of the application of this provision include, but are not limited to, access control along Public Ways, required planting or buffering strips, and prohibition of structures and vegetative clearing in environmentally significant lands.

H. Easements. The City Plan Commission may require utility easements of widths and location deemed adequate for providing facilities and utility service. Where a Land Division is traversed by a watercourse, drainageway channel or stream, an adequate drainageway or easement shall be provided. The location, width, alignment and improvements of such drainageway or easement shall be subject to the approval of the City Engineer and General Manager of Kenosha Water Utility. All easements shall be shown on the face of the Final Plat or Certified Survey Map.

I. Public Sites and Open Spaces. Suitable sites of adequate area shall be dedicated or reserved for schools, parks, environmental corridors, drainageways and other public purposes as provided in the Development Agreement. If designated on the Comprehensive Plan, such areas shall be made a part of the Plat as stipulated in Section 17.04 C. of this Ordinance. If not so designated, consideration shall be given in the location of such sites to the preservation of scenic and historic sites, woodlands, and other environmentally significant lands.

The Subdivider of land in the City of Kenosha shall, at the discretion and direction of the Common Council, either dedicate public and open space lands designated on the Comprehensive Plan or where no public or open space lands are dedicated, pay a public site fee. The Common Council shall, at the time of reviewing the Preliminary Plat or Certified Survey Map, select one of the following options and record such selection in the minutes of the meeting at which the Land Division is presented for approval.

1. Dedication of Site Option. Whenever a proposed park designated on the Comprehensive Plan is encompassed, all or in part, within a tract of land to be Subdivided, the public lands shall be made a part of the Plat and shall be dedicated to the public by the Subdivider. The public site shall be equal to five (5%) percent of the total net area of the Land Division.

2. Public Site Fee Option. If the Land Division does not encompass a public park, a fee for the acquisition of park land to serve the proposed Land Division shall be paid to the City Clerk/Treasurer prior to recording of the Land Division. The public site fee shall be equal to the value of the land that would have otherwise been dedicated. The value of said dedication shall be determined by the Plan Commission, as being its assessed value or its value as determined by an appraiser retained by the Plan Commission. Under no circumstances shall the public site fee be less than Two Hundred Fifty ($250.00) Dollars for each lot within the Subdivision for park purposes. Public site fees collected by the City Clerk/Treasurer under the provisions of this Ordinance shall be placed in a nonlapsing special fund for City park acquisition and development and shall be separate from the general fund of the City.

3. Environmental Corridors and Natural Areas. The Plan Commission shall require the dedication of primary environmental corridors, secondary environmental corridors, or isolated natural areas designated on the Comprehensive Plan above and beyond the five (5%) percent dedication for public sites.
J. Traditional Neighborhood Development. The design standards for Land Divisions involving Traditional Neighborhood Development may be altered by the City Plan Commission and Common Council to the extent that the principles and standards of Traditional Neighborhood Development are reasonably applied. Said design standards shall be elaborated in the Development Agreement required for the Land Division.

All such facilities shall be of adequate size and grade to hydraulically accommodate volumes of flow and shall be so designed as to prevent and control soil erosion and sedimentation, and preserve water quality, designed in conformance with City criteria therefor as approved by the Public Works Committee (Board of Public Works).

2. The City Engineer may require the installation of storm water retention/detention facilities at the Subdivider’s expense, designed in conformance with City criteria on storm sewers and storm water retention/detention as approved by the Public Works Committee (Board of Public Works), and on file in the Department of Public Works.

The trees shall be planted within the lawn park area unless otherwise authorized by a Development
Agreement. The City Forester shall mark all tree locations prior to planting. The Subdivider shall provide a
guarantee to replace at the Subdivider’s expense any street tree that is fifty (50%) percent dead or greater
within one (1) year of planting.

In lieu of planting street trees, the Subdivider may, at the time of Final Plat approval or Certified Survey
Map approval, pay a tree fee to the City Clerk/Treasurer of Four Hundred Fifty ($450.00) Dollars for each
tree to be planted. Monies collected for tree planting shall be kept in a special tree planting fund for that
purpose and shall be separate from the general fund of the City. The special funds shall be used
exclusively for the acquisition and planting of trees within those Land Divisions where said funds are
collected.

N. Erosion Control. The Subdivider shall install all erosion control measures as required by Chapter
33 of the Code of General Ordinances.

17.11 DEVELOPMENT AGREEMENTS

Water Utility, which shall be recorded with the Kenosha County Register of Deeds. The Subdivider shall
pay the review fee therefor established by the Common Council, from time to time, by Resolution. The
Development Agreement shall be in a form drafted or approved by the City Attorney. No building or

In the event access is denied, the legal custodian shall notify the requester of the denial in whole or in part, the reasons therefore, and the right of the requester to appeal.

B. Security. The custodian of public records shall be responsible for establishing a security system to insure the preservation of such records. The custodian shall establish such rules and regulations as deemed necessary and appropriate and not inconsistent with State Statutes to insure that such

**D. Request for Records Scheduled for Destruction.** Records may not be destroyed at any time after the receipt of request for inspection or copying until after the request is granted or until at least sixty (60) days after the date that the request is denied. ________________________________________

(Name of Department, Committee, Commission, Etc.)

1. Under Wisconsin Statutes, §19.35(1), a copy of which may be obtained from the legal custodian, members of the public have certain rights to access to public records. These rights include the right to inspect any record as defined herein, to photocopy said record or obtain a legible or audible copy of any tape or video recording and the right to photograph a record, the form of which does not permit copying. A member of the public need not identify himself or herself or state the purpose of the request in order to inspect or copy a record. A requester may, however, be required to show acceptable identification whenever the requested record is kept at a private residence or whenever security reasons or federal law or regulations so require. Upon access to or use of information, a requester shall comply with any regulations or restrictions which are specifically prescribed by law. In the process of honoring a request for records, the authority will not create a new record by extracting information from existing records and will not compile the information in a new format.

2. **Exceptions.** The public's right to access to public records may be limited according to law in certain circumstances where the material is deemed confidential or where the material is not a public record. In addition, the public's right to access is limited pursuant to the provision of §19.36 of the Wisconsin Statutes, a copy of which law may be obtained from the legal custodian, which permits withholding information in certain circumstances relating to the application of other laws, law enforcement records, contractor's records, computer programs and data, and trade secrets.

The provisions of the Wisconsin Public Records Law do not apply to a record which has been or will be promptly published with copies offered for sale or distribution. The undersigned legal custodian is responsible for insurance compliance with §§19.31 through 19.39 of the Wisconsin Statutes and with this Chapter so as to insure that the public may obtain information and access to records in his or her custody for purposes of inspection or copying. The legal custodian for this office has established the following rules: (e.g., specificity, public handling, use, time requirements, cost estimates, prepayment, removal, excess costs, nonpayment on account, and reasonable limitations as to subject matter or length of time represented by the record):

   b. During the following two (2) consecutive hours on the following day of each week: __________________. Twenty-four hours advance written or oral notice to inspect or copy a record is required.

8. Facilities. Some facilities which are available to the employees of the above listed authority will be made available to the public to obtain information and access and to make requests for records or obtaining copies of records, inspecting such records and abstracting of records. 9. Fee Schedule. Twenty-five ($.25) cents per page may be collected by the legal custodian to cover the copying of records. Where copies of photographs, audio or video tapes or other records not on standard sizes of paper and subject to photocopying upon existing equipment, the costs therefor shall be the actual, direct and necessary expense of the copying thereof. In the event it is necessary to search for a record, the following costs are hereby imposed: The hourly wage rate, plus fringe benefits, of the employee performing a record search where said cost equals or exceeds Fifty ($50) Dollars.

10. Denials and Appeals. In the event that you are denied access to records, in whole or in part, you are entitled to know the reason for the denial. If a request is made orally, the decision to deny access may be made orally unless a demand for the written statement of the reasons for the denial is made within five (5) business days of the oral denial.

Every written denial of a request by a custodian shall inform the person making the request that if the request for the record was made in writing, then the requester may bring an action for a writ of mandamus under §19.37(1) of the Wisconsin Statutes asking a Court to order the release of the record and/or the
requester may request the Kenosha County District Attorney or the Wisconsin Attorney General to bring an action for a writ of mandamus asking a Court to order release of the record to the requester.

In the event that a member of the public negligently misplaces or damages such record, he or she may be held liable for all consequent damages including costs of replacement.

CHAPTER XXVIII
VACANT BUILDING CODE

28.01 TITLE
This Chapter of the Code of General Ordinances shall be known as the "Vacant Building Code".

28.02 PURPOSE

A. This Code is enacted to facilitate the identification, inspection of, and to assure the property maintenance of vacant buildings for the purpose of preserving and promoting the public health, safety, prosperity and general welfare, and to abate and prevent public and private nuisances and potential fire hazards.

B. The Common Council of the City of Kenosha, Wisconsin, finds that there are now, and may in the future be, vacant buildings which are dilapidated, unsafe, unhygienic and inadequately maintained so as to create or contribute to blight and so as to jeopardize the health, safety, prosperity and general welfare, and so as to create a public and/or private nuisance.

C. Intent. The purpose of the Code is to establish the measures and requirements reasonably necessary to protect the health, safety and welfare of the public from the public nuisances, blight and negative market impact of vacant or abandoned buildings and structures.

28.03 PUBLIC RECORD

A. Finding. In addition to the purposes in Section 28.02, the City finds that vacant buildings are targets for vandalism, arson, and other illegal activities. The City still further finds that the public disclosure of the identification of any or all vacant buildings would provide to persons with criminal intentions a data source to locate vacant buildings in which to carry out illegal activity. While the City acknowledges the requirements of the Wisconsin Public Records Law embodied in Wisconsin Statutes §§ 19.31 through 19.39, and the strong public policy underpinning those statutes that all persons are entitled to the greatest possible information regarding the affairs of government, the City also recognizes that against that strong public policy, records custodians must balance contrary public policy such as that found by the City in this subsection A., that would weigh against disclosure of a particular document.

B. Policy. Prior to releasing any records that are received, created, or maintained pursuant to the provisions of this chapter or are received, created, or maintained to accomplish the purpose of this chapter, the records custodian will consider the intent of the City articulated in this section.

SIGNIFICANT LOAD. A discharge of conventional pollutants which is greater than normal domestic strength wastewater or which contain toxic or nonconventional pollutants in such quantity as to exceed limitations thereon imposed by law.

SIGNIFICANT NONCOMPLIANCE (SNC). A significant industrial user has been in significant noncompliance if any of paragraph 1-8 apply. A non-significant industrial user has been in significant noncompliance if paragraphs 3, 4 or 7 apply:

1. Any chronic violation of wastewater discharge limits, defined here as those in which sixty-six (66%) percent or more of all the measurements of the industrial user's wastewater discharge for the same pollutant parameter taken during a six-month period exceeded by any magnitude any numeric pretreatment standard or requirement including an instantaneous limit.

2. Any Technical Review Criteria (TRC) violations, defined here as those in which thirty-three (33%)
percent or more of all the measurements of the industrial user's wastewater discharge for the same pollutant
taken during a six-month period equaled or exceeded the product of numeric pretreatment
standard or requirement including an instantaneous limit multiplied by the applicable TRC = 1.4 for BOD, TSS,
fats, oil and grease, 1.2 for all other pollutants except pH, or a pH limit by 0.4 standard units.

3. Any violation that the Water Utility believes has caused, alone or in combination with other
discharges, interference or pass through (including endangering the health of Water Utility personnel or the
general public);

4. Any discharge of a pollutant that caused imminent endangerment to human health, welfare or to
the environment or has resulted in the POTW's exercise of its emergency authority.

5. Any failure to meet, within 90 days of the scheduled date, a compliance milestone contained in a
Wastewater Discharge Permit or enforcement order for starting or completing construction, or attaining final
compliance.

6. Any failure to provide, within 45 days of the due date, any required reports such as baseline
monitoring reports, 90 day final compliance reports, periodic self-monitoring reports, and reports on
compliance with compliance schedules, and failure to accurately report noncompliance.

7. Failure to accurately report noncompliance.

8. Any violation(s) which the Water Utility determines will adversely affect the implementation of
pretreatment.

Sludge. A solid by-product of wastewater treatment removed from wastewater at the POTW.
(Bio-solids)

Slug. Any discharge at a flow rate or concentration, which could cause a violation of the prohibited
discharge standards in Rule 08-02(04) of this ordinance. A Slug Discharge is any Discharge of a non-routine,
episodic nature, including but not limited to an accidental spill or a non-customary batch Discharge, which has
a reasonable potential to cause Interference or Pass Through, or in any other way violate the POTW's
regulations, Local Limits or Permit conditions.

Storm Sewer. A pipe or conduit designed and used to transport runoff water from precipitation or
other unpolluted source.

Storm Water Collection Facilities. The storm sewers, structures, and equipment designed and
used to collect and transport unpolluted water from the point of origin to the receiving stream.

System. Either individually or jointly, the wastewater collection facilities and the wastewater treatment
facilities and all appurtenances thereof; or individually or jointly, the water distribution facilities and the water
treatment facilities and all appurtenances.

Total Dissolved Solids or TDS. The quantity of solids dissolved in water, wastewater, or other
liquids that are not removable by laboratory filtering, as prescribed in 40 CFR Part 136.

Total Suspended Solids or TSS. The quantity of solids that either float on the surface of, or are in
suspension in, water, wastewater, or other liquids, and that are removable by laboratory filtering, as prescribed

Unpolluted Water. Water that may lawfully be deposited, without prior treatment, directly into the
receiving stream. The term shall include, but not be limited to, potable water, and uncontaminated storm
water, ground water, or surface runoff water.

Upset(s). An exceptional incident in which there is unintentional and temporary noncompliance with
pretreatment standards because of factors beyond the reasonable control of the user. An upset does not
include noncompliance to the extent caused by operational error, improperly designed treatment facilities,
inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

Utility. The Kenosha Water Utility.

Wastewater. The sewage, being a combination of liquids and solids carried in water, originating in
residential, commercial and industrial facilities, and discharged into the wastewater collection facilities.

I. Purchase and sell real estate and Water Utility assets, acquire and release easements, enter into right of entry agreements, and enter into leases and rental agreements.
J. Authorize the installation and construction of water or sewer infrastructure by Water Utility employees or through public construction contracts.
K. Appoint a General Manager to direct the operations of the Utility.

32.04 GENERAL MANAGER

The Board shall appoint a General Manager who shall take and hold office under the City of Kenosha Civil Service Ordinance and Rules and Regulations, which are incorporated herein by reference. The General Manager shall have the full charge and management of the Water Utility, subject to Board supervision, and the authority to execute contracts, easements, agreements; hire, direct and manage Utility personnel; implement the Operating Budget and Capital Improvement Program; and perform other activities approved or directed by the Board. The Assistant General Manager shall have authority to act for the General Manager in his/her absence, or unavailability. When the term General Manager is used in this Chapter, it shall include authorized designees thereof.

32.05 RULES AND REGULATIONS GOVERNING THE WATER UTILITY

Rule 05-01. Wisconsin Statutes. All Wisconsin Statutes as they now exist or as they may hereinafter be amended relative to water service and sanitary sewer service are incorporated herein by reference and made a part of this Chapter as if fully set forth herein.

Rule 05-02. Wisconsin Administrative Code. All provisions of the Wisconsin Administrative Code as they now exist or as they may hereinafter be amended relative to water service and sanitary sewer service are incorporated herein by reference and made a part of this Chapter as if fully set forth herein.

Rule 05-03. Compliance with Rules. All persons now receiving water and/or sanitary sewer service from the Water Utility, or who may request service in the future, shall be considered as having agreed to be bound by the rules and regulations as filed with the Public Service Commission of Wisconsin and Chapter XXXII of the City of Kenosha Code of General Ordinances.

Rule 05-04. Inspection of Premises. During reasonable hours, any officer or authorized employee of the Water Utility shall have the right of access to the premises supplied with service for the purpose of inspection or for the enforcement of the Water Utility's rules and regulations. See § 196.171, Wisconsin Statutes.

Rule 05-05. Water and/or Sanitary Sewer Main Extensions.
A. The Board may, whenever it deems it expedient and necessary and in the best interests of the Water Utility, construct water and/or sanitary sewer mains, connections and appurtenances in any highway, street, right of way or utility easement. The cost of such main may be specially assessed against the benefitted property as provided for in §66.0703, Wisconsin Statutes, and this Chapter or pursuant to the terms
of a developer’s agreement with owner/developer of property to be served.

B. Where the cost of the extension is to be collected through assessment by the Water Utility against the abutting properties, the procedure set forth under §66.0703 Wisconsin Statutes shall apply, and no additional customer contribution to the Water Utility will be required.

C. Where the Water Utility is unwilling or unable to make a special assessment, the extension will be made on a customer-financed basis as follows:

1. The applicant(s) will advance, as a contribution in aid of construction, the total amount equivalent to that which would have been assessed for all property under paragraph A.

2. Part of the contribution required in B.1. will be refundable. When additional customers are connected to the extended main within 10 years of the date of completion, contributions in aid of construction will be collected equal to the amount which would have been assessed under A. for the abutting property being served. This amount will be refunded to the original contributor(s). In no case will the contributions received from additional customers exceed the proportionate amount which would have been required under A., nor will it exceed the total assessable cost of the original extension.

D. When a customer connects to a transmission main or connecting loop installed at Water Utility expense there will be a contribution required of an amount equivalent to that which would have been assessed under A.

Rule 05-06. Water and Sanitary Sewer Mains - How Constructed on Divided Property. Construction of water and sanitary sewer mains which are to serve land divided by a plat of Subdivision, certified survey or plat of survey shall be in conformance with Chapter 17 of the City of Kenosha Code of General Ordinances and in accordance with Water Utility plans and specifications. Water and sanitary sewer mains may be constructed to serve land divided under Chapter 17 of the Code of General Ordinances only in accordance with a developer’s agreement approved by the Board and executed by the General Manager of the Water Utility, and then, subject to the final approval and acceptance by the General Manager of the Water Utility.

A developer or subdivider shall pay to the Water Utility for the Water Utility's cost of any existing water or sanitary sewer which is extended to the property and will be used as main extensions, if the said extension had not previously been paid for.

Rule 05-07. Water Main Installation in Wholesale Areas. The Water Utility has entered into "Multi-Municipality Cooperation Agreements" which have been adopted by the governing bodies and are, therefore, authorized as they apply to main extensions in wholesale areas.

Rule 05-08. Water Main and Sanitary Sewer Main Special Assessments. Whenever the Board shall cause to be constructed a water main or a sanitary sewer main in any highway or street, right-of-way, or utility easement, which is not subject to a developer’s agreement, the Water Utility, when legally possible, shall assess the abutting property owners for the cost thereof as provided for in this Chapter and in §66.0723, Wisconsin Statutes, as authorized by the Board. The special assessment may be based upon a charge per front foot of main installed or by another method of determining the cost to be assessed which is authorized by the Board to insure that property is assessed only to the extent benefitted and to permit recovery of the costs authorized by law.

Upon completion of construction and installation, the Water Utility will provide the property owner with written notice thereof and with an option of paying the special assessment therein in full within thirty (30) days or in ten (10) equal annual installments. The amount of each installment shall be equal to one-tenth (1/10th) of the total special assessment, plus interest at a rate determined by the Board. Special assessments shall be placed on the real estate tax roll and collected in the manner provided by law.

Rule 05-09. Water and Sanitary Sewer Design. Water and sanitary sewer plans and specifications shall be prepared or approved by the Water Utility. The Water Utility shall approve the size of water and sewer mains and the location of hydrants, valves, manholes and appurtenances thereto. Hydrant flow test information, if available, will be provided to designers by the Water Utility Engineering Division at no cost. Should additional hydrant flow testing information be required, the Water Utility Engineering Division will perform the necessary testing on a cost reimbursable basis. The fee for each hydrant test will be established by the Board.

Rule 05-10. Fire Hydrants. The cost of the installation of fire hydrants will not be specially assessed
to abutting property owners, except as may be provided for in a developer’s agreement.

**Rule 05-11. Public Land Dedications.** Special assessments shall not be forgiven or deferred as a consideration for any dedication of land for a public purpose, unless approved by the Board.

**Rule 05-12. Railroad and Utility Company Special Assessments.** Railroad and utility companies shall be specially assessed for all water and/or sanitary sewer mains fronting their property when and to the extent there is a benefit to the property.

**Rule 05-13. Double Special Assessments.** Generally, the cost of water and/or sanitary sewer mains shall be specially assessed against benefitted property on each side of a highway or street right-of-way. However, where property on one side of a highway or street right-of-way is the only beneficiary of such improvement or where the type or width of highway or street installed requires the installation of parallel water and/or sanitary sewer mains, the Board shall establish a special assessment rate to recover the cost thereof which shall not exceed two (2) times the current special assessment front foot or other applicable rate which would have been otherwise applicable.

**Rule 05-14. Special Assessment/Change of Circumstances.** Special Assessments which were valid and enforceable when made shall not be forgiven due to a subsequent change in circumstances.

**Rule 05-15. Hookup Fees.** Whenever the Board shall cause to be installed or constructed a water and/or sanitary sewer main, and/or water or sanitary sewer connection in any highway or street, right-of-way or easement and said water or sanitary sewer main and/or water or sanitary sewer connection may not be assessed under §66.07, Wisconsin Statutes, due to lack of authority to do so, the abutting property owner shall, as a condition of being permitted to hookup to the Water Utility System where such a hookup is otherwise authorized and permitted, shall pay a "Hookup Fee".

The "Hookup Fee" may be established through the use of the front foot assessment rate or such other rate as is determined by the Board to recover the Water Utility's cost and expense of serving the property, plus any connection charge effective at the time of connection. The minimum "Hookup Fee" charge shall be for sixty feet times the then current assessment rate.

The "Hookup Fee" shall be charged for all property within or outside of the City Limits that was not previously assessed, or was subject to a deferred special assessment, under §66.07, Wisconsin Statutes, due to the lack of authority to do so at the time of construction or any other reason. Where a "Hookup Fee" is paid, a special assessment for the same service shall not later be made against the property.

Required connection fees shall be in addition to the "Hookup Fee".

Deferred special assessments for properties outside of the City limits are entered as such only for accounting purposes and only recorded if there is a reasonable likelihood of collection according to inter-municipal or inter-governmental agreements. Deferred special assessments in the City shall be noted as paid in the City's books of accounts upon a "Hookup Fee" being paid in an amount sufficient to cover the amount thereof.

"Hookup Fees" may be paid in installments upon the request of the property owner requesting service pursuant to a policy and interest rate determined by the Board and upon an agreement that unpaid fees may be specially assessed against benefitted property.

**Rule 05-16. Deferred Special Assessments.** No property within the City, unless zoned “agricultural”, shall have any special assessment deferred for payment unless it is authorized by the Board, and then only pursuant to a uniform policy.

**Rule 05-17. Deferred Special Assessments Payable Upon Annexation or Attachment.** Upon annexation or attachment, all deferred special assessments for sanitary sewers, water mains, water services, and sewer laterals shall become due, owing, and payable in the same manner and to the same extent as if those assessments were validly assessed against said property on the effective date of annexation or attachment, except as heretofore provided. Deferred assessments for sanitary sewers, water mains, water services, and sewer laterals shall be due, owing, and payable at the charge or assessment rate prevailing on the effective date of annexation or attachment.

All deferred assessments shall be payable in installments where installment payments would have been available to any owner of property within the City for such improvements on the effective date of said annexation or attachment, although the annexing or attaching property owner(s) may, at their option, elect to pay the total amount due, owing, and payable forthwith.
Petitions for annexation shall contain a provision that in consideration for City approval of the petition for annexation, petitioners agree to the terms of this Chapter and waive any rights, if any, which they may have to contest the amounts due, owing and payable or the manner of payment heretofore enumerated, except for potential mathematical errors in calculations and except for a challenge based upon legal benefit to the property. However, the failure of any property owner to agree as above set forth shall not in and of itself void the obligations specified in this Chapter.

A. Front Footage. Mains are to be specially assessed based upon the front footage of each parcel of land which abuts a main and appurtenances to the nearest one thousandth (.001) foot.

B. Corner Parcels. Any parcel which has at least two (2) sides which face two (2) intersecting streets at the intersection shall be specially assessed for the full length of the side upon which the main is first installed. When mains are later installed on the other abutting street of the corner parcel there shall be a special assessment for the full length of the side less a maximum credit of one hundred and fifty (150) feet.

C. Standard Symmetric Cul-de-Sacs. Parcels fronting a standard symmetric cul-de-sac shall be especially assessed for the arc frontage.

Parcels which are tangent to a cul-de-sac, shall have a minimum special assessments based upon sixty (60') feet of frontage.

D. Offset or Nonsymmetric, Cul-de-Sacs. Parcels fronting offset or nonsymmetric cul-de-sacs shall be specially assessed in the same manner as a standard symmetric cul-de-sac.

E. Curved Streets. Parcels on curved streets shall be specially assessed for the frontage along the arc of the curve.

F. Corner Parcels on Curved Streets. Parcels on a curved street are considered corner parcels if there are intersecting streets. There shall be a maximum credit of one hundred and fifty (150') feet when the main covers the full length of the frontage. There shall be a minimum special assessment based upon sixty (60') feet of frontage.

G. Curved Streets with Partial Cul-de-Sacs. Parcels fronting a curved street which has a partial cul-de-sac on the outside radius of the curve shall be specially assessed for the arc frontage. Where the parcel is also a corner parcel, special assessments shall be levied in accordance with Subsection F.

H. Trapezoidal Parcels. Trapezoidal parcels (any four-sided lot with unequal interior angles) which have one side fronting a main shall be specially assessed based upon the frontage where the main is installed.

I. Triangular Parcels. Triangular parcels (three-sided lots with one side facing a street with a main) shall be specially assessed based upon frontage. Triangular parcels (three-sides lots with two sides facing streets with a main) shall be specially assessed as a corner parcel.

J. Double Frontage Parcels. Double frontage parcels (two sides facing two nonintersecting streets) shall be specially assessed only on the side(s) where the parcel is to be serviced.

K. Infrastructure Cost. The cost of providing infrastructure to serve the property may be built into the project assessment rate such as, but not limited to, water pumps, sanitary sewer lift stations, valves, manholes, facilities within intersections and right-of-way restoration.

Rule 05-19. Water Mains and Sanitary Sewer Mains and Connections Installed in Advance of Paving. Where streets are to be paved or repaved in full or part under circumstances where no sanitary sewers, water mains, water services and/or sewer laterals exist, the Water Utility may install the necessary sanitary sewers, water mains, water services and/or sewer laterals before the paving work is performed and specially assess the abutting property for the cost thereof in accordance with §66.07, Wisconsin Statutes, and this Chapter.

Rule 05-20 - Locating of Sanitary Lateral or Water Service Laterals. When requested to locate a sanitary sewer lateral or water service lateral, the Water Utility will field mark with a stake or paint the location per the latest records available. The records are available in the office of the Water Utility Engineering Services for review.

The Water Utility shall not be responsible for any costs to the owner, developer or other persons for any inaccuracy or incompleteness of the records or any misinterpretation of the records.

A. Unsafe Well Water. Where inhabited property that fronts a Water Utility water main is serviced by a private well, and where water from that well is bacteriologically unsafe or toxic, then the owner of said property shall be required to connect said property into an abutting water main and use Water Utility water for domestic purposes, subject to Water Utility Rules and Regulations, within thirty (30) calendar days following notification to the property owner that such a connection is required.

B. Safe Well Water. Where inhabited property that fronts a Water Utility water main is serviced by a private well that is subject to a Well Permit under §32.09, and the water from that well is bacteriologically safe, then the owner of said property shall be required to connect their property into an abutting water main within one (1) year. The connection shall be extended into the property and a water meter shall be set. (See §32.09) Water from the Water Utility need not be used as long as a Well Permit is maintained and the water from the well in bacteriologically safe.

Rule 06-02. Water Connection Charges. Owners shall be responsible, where the water main extension has been approved by the Water Utility through a developer’s agreement, for the water service lateral installation costs from the main through the curb stop.

The initial water service lateral(s), not installed as part of a developer’s agreement or an assessable Utility extension, will be installed from the main through the curb stop by the Water Utility, for which there will be charges as approved by the Wisconsin Public Service Commission.

Rule 06-03. Water Service Pipe. Water service pipe extending from the building to the Water Utility curb stop within the public right-of-way or easement, shall be installed in accordance with Wisconsin Administrative Code, SPS 382.

All curb stops for controlling the supply of water to customers shall be placed between the curb line of the street and sidewalk, where sidewalk is present or proposed, with the top of the box even with the grade of sidewalk or parkway. Representative detail drawings are on file at the Water Utility Engineering Office and are available for review upon request. Each water service lateral shall have a curb stop valve. When the water main is within ten (10') feet of the property line or within an easement, the tapping valve (corporation stop) of a service four (4") inch or greater in diameter may be considered to be the curb stop. If installed in this manner, the property owner is responsible for maintaining the entire water lateral, beginning at the tapping valve. The Utility is responsible for the tapping valve.

The minimum size of service pipe from the curb stop to the water meter shall be one (1") inch in diameter. The minimum size service from water main to curb stop for a residential unit, where the distance from the water main to the meter is greater than one hundred (100') feet, shall be one and one-half (1-1/2") inch diameter. In all cases the domestic service shall be sized to provide a minimum of 12 gpm at 20 psi at the water meter for each dwelling unit.

The water service from the curb stop to the building shall conform to the standards listed in Wisconsin Administrative Code, SPS 384. The water service from the main to the curb stop shall be type K copper for 1", 1-1/2" and 2" services; poly-encased ductile iron pipe Class 53 or C900 PVC pipe for 4", 6" and 8" services; and poly-encased ductile iron pipe Class 52 or C900 PVC pipe for services larger than 8". Alternate material may only be used upon written approval from the General Manager.

Water service pipe shall be laid at least five and one-half (5-1/2') feet below the planned finished grade of the street, lawn or below the existing grade, whichever is lower. The water service pipe may be laid in a sewer connection trench if it is properly shelved to one side of the trench or at least one (1') foot above the sewer lateral. No new or replacement service curb stop shall be laid deeper than six and one-half (6-1/2') feet below the established grade.

No person, party or contractor shall cover or permit the covering of any water connection line until the installation has been inspected and approved by the Utility. The contractor shall subject the water piping to a test in the presence of a City Plumbing Inspector, as required by the State Plumbing Code.

When a service pipe larger than two (2") inches is used to supply an individual service or a private
water main extension, the service pipe shall be tested in accordance with Rule 06-36 prior to any pressure test or water usage.

A water service may cross one or more parcels to service another parcel provided only one parcel is served and the water service meets all of the following requirements/conditions:

1. Approved by the General Manager of the Water Utility;
2. A copy of a recorded easement between parcel owners is delivered to the Water Utility;
3. A “Deed Covenant - Rights to Maintain Sewer and/or Water” (approved by the City Attorney) is recorded and a copy of the recorded document is delivered to the Water Utility.

**Rule 06-04. Responsibility for Water Service Pipes, Appurtenances and Connections.** The Water Utility is responsible for any necessary repairs to or replacement of the water service pipe and curb stop, from the curb stop to the Water Utility’s water distribution main located in an easement or in the public right-of-way. When the water main is within ten (10’) feet of the property line or within an easement, the tapping valve (corporation stop) of a service four (4”) inch or greater in diameter may be considered to be the curb stop. If installed in this manner, the property owner is responsible for maintaining the entire water lateral, beginning at the tapping valve. The Utility is responsible for the tapping valve.

The property owner is responsible for the installation, maintenance, and any necessary repairs to, or replacement of the water service pipe and all appurtenances and connections from within the building to the curb stop, except for the water meter and meter horn. The Water Utility is responsible for the installation, maintenance, and any repairs to, or replacement of the water meter and meter horn.

In the event any repair or replacement of the owner’s water service pipe is required, the owner, at his/her expense, must make the repair or replacement within twenty (20) days after receiving written notice from the Water Utility that repair or replacement is required. If the necessary repair or replacement is not completed by the owner within said twenty (20) days, or if the condition requiring repair or replacement is of such a nature as to cause a danger to persons or property, the Water Utility may disconnect the water connection or make the necessary repair or replacement and charge the cost to the property owner, and specially assess the property served. Any costs or expenses incurred by the Water Utility which are the responsibility of the owner as stated in this Chapter, shall be charged to the property owner and may be specially assessed to the property served.

The Water Utility, as a public service, and upon the request of the property owner, may enter private property which receives its water supply from the Water Utility to attempt to locate a water pipe break. Under normal circumstances, the Water Utility will not perform or arrange to perform any repair work on private property. The Water Utility may, at its discretion, shut off water services to the premises without the consent of the owner or occupant, where there is evidence that the water pipe break may endanger persons, damage property, or create a public nuisance.

**Rule 06-05. Water Service Leaks.** If the Water Utility makes repairs to a water service pipe on the Water Utility’s side and cannot reconnect to the service pipe on the homeowner’s side because of a deteriorated service pipe or if the water service begins leaking during the Water Utility’s maintenance to the meter or other Water Utility facilities, and it is determined that the owner’s water service pipe must be replaced, then the Water Utility and the property owner shall equally share the cost of replacing the water service pipe on the owner’s side.

Cost sharing shall only occur if the Water Utility attempted to reconnect or repair the water service pipe on the owner’s side and determined that the service pipe on the owner’s side requires replacement.

The property owner may arrange to have a contractor, acceptable to the Water Utility, replace or repair the water service pipe and then request 50 percent reimbursement of expenses from the Water Utility. Cost estimates must be approved by the General Manager prior to contracting the work.

The property owner shall be responsible for all costs for restoration on his/her property. The Water Utility shall be responsible for all costs for restoration of the right-of-way, including sidewalk, parkway, curb and gutter and road repairs.

**Rule 06-06. Lead Service Replacement.**

A. **Intent and Purpose.** Lead service lines have the potential to leach lead into drinking water.
Disturbing or reconnecting to an existing lead service line may increase lead levels in drinking water. Elevated lead levels in drinking water have been determined to cause health problems in young children, pregnant women and their unborn children, and are also potentially harmful to adults. The Common Council therefore finds it in the public interest to establish a comprehensive program for removing and replacing all lead service lines within and connected to the Water Utility water distribution system.

B. **Authority.** This ordinance is enacted pursuant to §§ 62.11(5) and 196.372, Wisconsin Statutes.

C. **Definitions.** This ordinance shall be interpreted so that the intent and purpose described may be accomplished. Words and phrases shall be understood according to common meanings unless the contrary is clearly indicated. In addition to the definitions for this Chapter found in Section 32.01, definitions of terms used in this Section are listed below:

1. **Customer-side service line.** The Property Owner's water service line, from the outlet of the curb stop to the inlet of the customer's water meter.
2. **Distribution System.** The network of water pipes, including mains and service lines, owned and operated by the Water Utility.
3. **Lead Service Line or LSL.** A water service line constructed of lead. The term includes the customer-side service line and/or the Utility-side service line.
4. **Property.** Real property as defined in § 70.03, Wisconsin Statutes.
5. **Property Owner.** A person or legal entity having a possessory interest, legal or equitable, in property, which defined term includes an estate, trust or lien.
6. **Plumbing Contractor.** A person, firm, corporation or other entity licensed by the State of Wisconsin to perform plumbing work in the City.
7. **Utility-side service line.** The Utility-owned portion of the water service line from the water main to the outlet of the curb stop, including the curb stop, but not the outlet joint of the curb stop.

D. **Lead Service Line Replacement Requirement.**

1. As provided in this ordinance, all existing lead service lines connected to the distribution system shall be replaced with water service lines constructed of materials approved by the City.
2. Where both the customer-side and Utility-side service lines are constructed of lead, the replacement of both sides of the service line shall be completed under a schedule established by the Utility.
3. Where only the customer-side service line is constructed of lead, the replacement of the customer-side LSL shall be completed under a schedule established by the Utility.
4. As of the effective date of this ordinance, no person, other than a Utility employee or agent, may connect a customer-side LSL to a non-lead Utility-side service line, except as a temporary emergency repair.

E. **Identification of Lead Service Lines.**

1. Upon notice from the Utility, any person or entity who owns, manages or otherwise exercises control over a property connected to the distribution system shall allow the Utility to inspect the customer-side service line to determine the material of construction. (See Rule 05-04.)
2. The Utility shall create and maintain a record of the location of all identified lead service lines in the City.

F. **Private Replacements Done in Conjunction with Utility Replacements.**

1. Prior to scheduling the replacement of Utility-side service lines, the General Manager, or his/her designee, shall inspect all affected customer-side service lines for the presence of lead. In the event that the Property Owner fails to provide access to the interior of any improvement to accomplish such inspection, the General Manager shall take such steps necessary to make the determination, and shall collect the cost therefore from the Property Owner, including by imposition of a special charge.
2. If the customer-side service line is found to be constructed of lead, the Property Owner will be
notified in writing of that fact, along with notification that the Property Owner must replace the customer-side service line.

3. Replacement of the customer-side LSL must be completed by the Property Owner at the time the Utility-side service line is replaced unless an extension is allowed under subparagraph F.7.

4. A Property Owner having a customer-side LSL will be notified in writing at least forty-five (45) days prior to the date for scheduled replacement of the Utility-side service line.

5. Within thirty (30) days of receipt of the replacement notice, Property Owner must schedule replacement of the customer-side service lateral to coincide with the scheduled replacement of the Utility-side service line.

6. Failure to commence work on the replacement of the customer-side LSL when scheduled pursuant to this ordinance or to complete such work within a reasonable time after commencement of the work, may result in a citation for the violation to the Property Owner.

7. Upon written request of the Property Owner with demonstration by the Property Owner of a compelling need, the General Manager may, at his or her discretion, extend the time requirement for replacement of the customer-side LSL, unless the General Manager determines that doing so will create an imminent threat to the health, safety or welfare of the public.

1. The Utility may provide an eligible Property Owner with financial assistance to replace a customer-side LSL if the Utility maintains a financial assistance program that has received the approval of the Public Service Commission of Wisconsin and that has available funding.

2. If the Utility maintains an approved financial assistance program, the Utility may provide eligible Property Owners with a grant for up to fifty percent (50%) of the cost of customer-side LSL replacement, but not to exceed a maximum grant amount established by the Board of Water Commissioners. The Board of Water Commissioners shall periodically review and adjust the maximum grant amount.

3. Financial assistance granted to eligible Property Owners shall be in accordance with the following priority:
   a. for Properties with leaking or failed customer-side or Utility-side service lines.
   b. for Properties where the Water Utility is replacing the Utility-side service line, on either a planned or emergency basis.
   c. for Properties with licensed child care facilities and schools.
   d. for Properties where children under the age of seven (7) or pregnant women reside.
   e. to all remaining Properties with customer-side LSLs.

4. A Property Owner is eligible for financial assistance for the purpose of replacing the customer-side LSL if the Property Owner satisfies all of the following criteria:
   a. The Property Owner alone, or collectively with others, owns the entire fee simple title to the Property served by a customer-side LSL.
   b. The Property Owner's customer-side LSL is either attached to a Utility-side service line that is not a LSL, or a Utility-side LSL scheduled for replacement and for which the Property Owner has been notified by the Utility of such scheduled replacement.
   c. The Property Owner of subparagraph a, above, agrees to have the work done by a Utility-approved Plumbing Contractor and in compliance with this ordinance.
   d. The Property Owner of subparagraph a, above, executes a temporary right of entry and construction easement authorizing the Utility access to the dwelling as needed.

5. Written applications for financial assistance shall include the following:
   a. A completed application on a form furnished by the Utility signed by the Property Owner of subparagraph 4. a, above. The completed application form shall include a certification by the Property Owner that attests that all eligibility criteria are met.
   b. The executed documentation required by paragraph G.4.
   c. Copies of written quotes from at least two pre-qualified Plumbing Contractors for the replacement
of the customer-side LSL. A pre-qualified Plumbing Contractor is one that either is on the Utility's Prequalified Plumbing Contractor list, or is a Plumbing Contractor that is properly licensed to work in the State of Wisconsin, has filled out a Prequalification Form at the Kenosha Water Utility office, and has been accepted by the Utility.

6. Prior to commencement of any work, the Utility shall determine if the Property Owner is eligible for financial assistance, and if there is money available to provide financial assistance to replace the customer-side LSL. Such determination shall be provided in writing to the Property Owner who applied.

7. Customer-side service line replacement work must be accomplished in a worker-like manner and be coordinated with any Utility replacement work as required by paragraph F.

8. Upon completion of the customer-side service line replacement, the Property Owner shall provide the Utility with a copy of the invoice from the Plumbing Contractor. Upon proof of completion satisfactory to the Utility, the Utility shall pay directly to the Plumbing Contractor the amount of financial assistance approved by the Utility for replacement of the customer-side LSL. The Utility shall notify the Property Owner of the payment.

9. In addition to the provision of grants, the Utility may provide financial assistance for customer-side LSL replacements in the form of loans. In accordance with § 66.0627, Wisconsin Statutes, the Utility shall require that an eligible Property Owner enter into a loan agreement, which provides that loan repayments be paid in annual installments, with installment payments being placed on the tax roll as a special charge. The total amount of grants and loans provided as financial assistance by the Utility may not exceed the actual cost of replacement of the customer-side LSL.

10. Disputes regarding eligibility for financing may be appealed to the Board of Water Commissioners.

H. Severability. If any subsection or portion of this ordinance is for any reason determined to be invalid or unconstitutional by the decision of a court of competent jurisdiction, that subsection or portion shall be deemed severable and shall not affect the validity of the remaining subsections or portions of this ordinance.

I. Authority to Discontinue Service. As an alternative to any other methods provided for obtaining compliance with this section regarding replacement of a customer-side LSL, the Utility may, after at least thirty (30) days of giving notice, discontinue water service to such property served by customer-side service LSL after reasonable opportunity has been given to make the appropriate replacement.

Rule 06-07. Frozen Laterals.

A. Thawing of a customer's lateral shall be at the Water Utility's expense if:

1. The frozen lateral is a direct result of a Water Utility disconnect and the disconnection occurs during a time when conditions are such that frozen lateral could reasonably be expected to occur or;

2. The customer's portion of lateral is electrically conductive and:
   a. It is the first thaw for the customer at the location during the current winter season and;
   b. The Water Utility has not provided the customer with seasonal notice of the corrective actions to be taken for a known condition.

B. Lateral thawing shall be at the customer's expense if:

1. The customer's lateral is not electrically conductive and the frozen lateral is not a direct result of a Water Utility disconnect as set forth in sub. A. 1. or;

2. The customer neglected to provide or maintain proper insulation or protection for the lateral according to standard accepted practice, or specific Water Utility instructions on, for example, the required depth of burial needed to prevent freezing, or;

3. The Water Utility advises the customer of the corrective measures to be taken and the customer does not follow the Water Utility's advice. (See § PSC 185.35 (7) for bill adjustment where a Water Utility requests a customer to let water flow to prevent freezing), or;
4. If the Water Utility disconnects for a dangerous condition.

Rule 06-08. Number of Meters on One Water Service Pipe. Each parcel of property shall have only one (1) water service with only one (1) water meter (customer) unless otherwise authorized and approved in writing by the General Manager of the Water Utility, except customers may have a second water meter for "lawn sprinkling" (no sanitary sewer charge) in the same location as the domestic meter. A parcel with more than one building to be served may split a single service from the Water Utility to serve each building, if installed per the State Plumbing Code. Each building must have a meter, and each meter must have a separate exterior curb stop that is accessible to Water Utility personnel.

Owners of multi-unit dwelling units or condominiums must apply, in writing, and must obtain approval from the General Manager for the installation of separate water meters for each housing unit served by a single service pipe.

Rule 06-09. Customer Responsibilities. The Water Utility, absent negligence on its part, shall not assume responsibility for any damages incurred by a customer or property owner arising out of a broken or defective water main or service pipe where the installation thereof was performed in a good and workmanlike manner or from damages arising from insecure boilers, variation in water pressure, or the water hammer from the mains or from the failure of any water fixture.

The Water Utility shall not be responsible for the cost of any water loss or property damage arising out of a broken or defective service pipe or appurtenance thereto where the property owner is responsible for the maintenance thereof.

Each customer shall be responsible for maintaining their premises which receive service in as safe a condition as the nature of the premises shall reasonably permit so as to protect employees of the Water Utility from harm when they enter said premises in the performance of their duties.

Each customer is also responsible for providing the Water Utility with access to their premises as provided in Rule 05-04. Water service may be temporarily discontinued (shut off) should a customer fail to comply with this Section.

Rule 06-10. Meters Required. All water services within the Retail Service Area shall be metered. All meters shall be furnished by the Water Utility and shall be installed by or under the supervision of the Water Utility. Only one meter will be installed for each service pipe, unless otherwise approved by the General Manager.

The meter must be installed before the City of Kenosha, Department of Community Development and Inspections will issue a certificate of occupancy.

No connection to the service pipe shall be made before the meter.

Submeters shall not be installed, read or maintained by the Water Utility.

A. Meters shall be placed in the basement where a basement exists. The meter must be placed on the service pipe within twelve inches (12") of the inside wall and between twelve inches (12") and twenty-four inches (24") above the floor. If no basement exists or the service pipe is extended beyond where the service enters the building foot print, the service pipe shall be buried under the concrete floor (no exposed pipe) until it rises to the meter. The service pipe riser to the meter shall be perpendicular to the floor and secured or reinforced to support the meter. The meter shall be so placed as to be easily accessible and shall be kept free from all obstructions so that it may be easily read, maintained and inspected and it shall be protected by the property owner from freezing and other damage.

All meters shall have a valve on both the inlet and outlet side of meter.

All meters of size from five-eighths inch (5/8") through one inch (1") shall be set with the use of a meter horn supplied by the Water Utility. Meter horns shall be furnished upon application for a meter and shall be installed by a licensed plumber. Representative detail drawings are on file at the Water Utility Engineering Office and are available for review upon request. Meters installed in newly constructed single family units shall be a minimum of three-quarter inch (3/4").
All meters one and one-half inch (1-1/2") or larger shall be provided with a bypass connection. The bypass connection shall be teed off the main service pipe before the inlet valve and after the outlet valve which are required at the meter. Representative detail drawings are on file at the Water Utility Engineering Office and are available for review upon request. The size of the bypass connection shall not be less than one normal pipe size less than the meter size. A locking valve, approved by the Utility, shall be installed on the bypass and will be locked by the Water Utility. A meter test plug shall be provided between the outlet side of the meter and outlet valve for three inch (3") and larger meters.

Existing meter bypass connections installed without locking bypass valves shall be allowed to remain in service unless it is discovered that the valve has been tampered with or operated without the consent of the Water Utility, whereby the Water Utility will require the owner to replace the existing valve with a locking bypass valve in the meter bypass connection which shall be locked by the Water Utility.

A remote water meter register is required for all water meters, and shall be attached directly to the outside of the building or structure wall. The remote register shall be approximately four (4') feet above finished ground elevation and located by the Water Utility where it will be free of obstruction and easily accessible.

Wiring from meter to remote register will be exposed on both the interior and exterior of a residential (single family or duplex) building unless the owner, at his/her expense, provides a ½" conduit.

Any owner or builder of a new duplex, who receives authorization for two separate meters, shall provide a ½" conduit with three, #18 wires from each meter to the remote reader. The remote reader shall be field located and approved by the Water Utility.

Wiring from meter to remote register shall be three, #18 wires in a ½" conduit for each meter for commercial and industrial buildings. The remote register or reader shall be field located and the location shall be approved by the Water Utility.

Remote water meter registers shall be installed only by authorized employees of the Water Utility. The Water Utility does not assume responsibility for the defacement or damage of property caused by necessary holes, fastenings or other work required for proper installation.

The remote water meter registers, wiring and other appurtenances required for the installation shall be and remain the property of the Water Utility. The Water Utility shall have the right of access to install, read, remove, test and inspect the meter and installation as a condition of providing water service.

Rule 06-12. Location of Meters, Remote Registers--Not Obstructed. In the event that a meter or remote register is situated in a location that is inaccessible or difficult to access, the Water Utility shall notify the owner of such condition, and if such condition is not remedied in a manner satisfactory to the General Manager within thirty (30) days after receipt of such notice, the water service may be discontinued (shut off) by the Water Utility and remain discontinued (shut off) until such condition is remedied.

Rule 06-13. Meters and Meter Bypasses Not to be Interfered With. Meters and meter bypasses shall be left in the condition and manner as set by the Water Utility and shall not be tampered with by anyone in any manner whatsoever. No meter shall be moved or disturbed without written permission from the General Manager, and then only by a licensed plumber.

In no case shall a service pipe coupling bypass be inserted in the service pipe in place of a meter, except that in case of frozen service pipes or frozen meters. Only a licensed plumber, upon notification to the Water Utility, or the Water Utility will be permitted to make such insertion.

Any person violating this provision will be required, as a condition of future water service, to pay an amount equal to the amount of damage sustained by the Water Utility by reason of loss of, or damage to the meter, and the loss of revenue from the sale of water by reason of inaccurate water usage registration on meter. Diversion of service around the meter, which has not been previously authorized by the Water Utility, may result in a disconnection and refusal of service in accordance with Wisconsin Administrative Code, PSC §185.37.

Rule 06-14. Meter Repairs. All meters, damaged by frost, hot water or causes other than ordinary wear and tear, will be repaired or replaced by the Water Utility and the cost thereof shall be
charged to the owner of the property served. All repairs or replacements due to ordinary wear and tear of
the meter will be made by the Water Utility at the expense of the Water Utility.

Prior to replacing a meter, the condition and configuration of the service pipe and the valves on
both the inlet and outlet sides of the meter will be assessed to determine the potential for future water
leaks. In those instances where the piping and/or valves are in poor condition and/or the configuration of
the plumbing is such that future water leaks are likely, the owner may be asked to sign a "hold harmless"
agreement prior to the replacement of the meter. Plumbing configurations that are in violation of
Wisconsin Administrative Code, SPS 381 through 387 (Plumbing) will be referred to City of Kenosha,
Department of Community Development and Inspections.

Rule 06-15. Meter Pits. If a meter pit must be placed outside of the premises, the owner must
request special written permission therefor and construct the pit according to specifications of the Water
Utility to obtain water service. Representative detail drawings are on file in the Water Utility Engineering
Office and are available for review upon request.

New residential units shall be designed in such a manner that outside meter pits are not required.

In all cases of existing or new meter pits, the owner is responsible to maintain the pit according to
specifications of the Water Utility. In the event that a pit does not meet Water Utility specifications, the
Water Utility shall notify the owner of such condition, and if such condition is not remedied in a manner
satisfactory to the General Manager within thirty (30) days after receipt of such notice, the water service
may be discontinued (shut off) by the Water Utility and remain discontinued (shut off) until such condition
is remedied.

The meter must be accessible for meter reading and testing at all times and is subject to all other
rules governing meters.

Rule 06-16. Failure to Read Meters. Where the Water Utility is unable to read a meter, the fact
will be plainly indicated on the bill, and either an estimated bill will be computed or the minimum charge
applied. The difference shall be adjusted when the meter is again read, that is, the bill for the succeeding
billing period will be computed with the gallons or cubic feet in each block of the rate schedule doubled,
and credit will be given on that bill for the amount of the bill paid the preceding period. Only in unusual
cases shall more than three consecutive estimated or minimum bills be issued.

Rule 06-17. Testing Meters. Water meters shall be tested in accordance with Wisconsin
Administrative Code PSC §185.75.

Rule 06-18. Meters Failing to Register. Water meters failing to register shall be billed in
accordance with Wisconsin Administrative Code, PSC §185.34.

Rule 06-19. Collection of Overdue Bills. An amount owed by the customer may be levied as a
tax as provided in § 66.0809 of the Wisconsin Statutes.

Rule 06-20. Adjustment of Water Bill. An adjustment of a water bill may only be made in
accordance with Wisconsin Administrative Code, PSC §186.35.

Rule 06-21. Disconnection and Refusal of Service. Disconnection and refusal of service shall
be in accordance with Wisconsin Administrative Code, PSC §185.37.

Rule 06-22. Deferred Payment Agreement. Deferred payment agreements shall be in
accordance with Wisconsin Administrative Code, PSC §185.38.

Rule 06-23. Dispute Procedures. Dispute procedures shall be in accordance with Wisconsin
Administrative Code PSC §185.39.
Rule 06-24. Breaking Seals and Locks Prohibited. No person shall break any seal or lock upon any meter, meter bypass, remote register, valve, private fire hydrant or other fixtures that may be sealed by the Water Utility.

Rule 06-25. Check Valve or Other Protective Devices. When water service is provided to a hot water boiler or other pressure vessel, a check and relief valve or other protective device shall be installed, as required by Wisconsin Administrative Code, SPS 381 through 387 (Plumbing). The Water Utility may require vacuum breakers, backflow preventers or check valves on any water service if it is found necessary to protect the public water supply, as may be determined by the General Manager.

Rule 06-26. Private Fire Service Pipe. Private fire service pipes may be unmetered or metered as authorized by the General Manager. Fire service pipe meters must be set in accordance with Rule 06-12 where their use is required by the Water Utility. Representative detail drawings are on file at the Water Utility Engineering Officer and are available for review upon request.

The rates for Private Fire Protection service shall be based on the service pipe size as authorized by the Public Service Commission.

Rule 06-27. Seasonal or Intermittent Use. Charges for seasonal or intermittent use are authorized by the Wisconsin Public Service Commission.

Rule 06-28. Permits for Temporary Water Service. Permits for temporary water service shall be issued and obtained from the City of Kenosha Department of Community Development and Inspections. Applicants for a new Building Permit shall also make application for Temporary Water Service Permit. Charges for Temporary Water Service Permits shall be as authorized by the Wisconsin Public Service Commission.

No Occupancy Permit for a building serviced by a water service exceeding two inches (2") in diameter shall be approved until such time as the Water Utility has provided the Plumbing Inspector with written verification that the water service that serves the building has been successfully tested in accordance with Rule 06-36.

Rule 06-29. Discontinuance of Service. Any property owner desiring to discontinue the use of water service must give written notice to the Water Utility of such discontinuance, providing within such notice the location of the relevant premises served and the date water service is to be discontinued. Water service discontinuance policies are in accordance with the Wisconsin Administrative Code, PSC §185.3.

Rule 06-30. Disconnection of Water Service Prior To Razing or Moving Buildings. Prior to razing or moving any building the party to whom a Razing or Moving Permit is issued shall request the Water Utility, in writing, to remove the meter and shall cause the water service to be disconnected and capped at the property line. If the capped water service from the property line to the connection at the water main in the public right-of-way is constructed of lead or galvanized steel, the entire water service shall be abandoned and is not permitted for reuse.

Rule 06-31. To Provide a Program for Protecting the Public Water System from Contamination Due to Backflow of Contaminants Through the Water Service Connection into the Public Water System.

A. Cross-Connection Prohibited. No person may establish or permit to be established or maintain or permit to be maintained any cross-connection. No interconnection shall be established whereby potable water from a private, auxiliary or emergency water supply, other than the public water supply of the Utility, may enter the supply or distribution system of the Utility, unless such private, auxiliary, or emergency water supply and the method of connection and use of such supply shall have been
approved by the Utility and the State of Wisconsin Department of Natural Resources. Cross-connection shall be protected as required in Chapter SPS 382, Wisconsin Administrative Code.

**B. Inspections.** It shall be the duty of the Utility to cause inspection to be made of all properties serviced by the Utility where cross-connection with the public water system is deemed possible. Residential properties serviced by the Utility shall be inspected on an interval matching the meter replacement schedule. All non-residential properties serviced by the Utility shall be inspected on a 2-year interval. Commercial properties of similar or lesser risk as residential properties may follow the same schedule as residential properties. The Utility shall be responsible for determining the hazard risk and the inspection schedule.

The Utility may, but is not required to, perform the cross-connection inspection of residential and low hazard properties. For non-residential properties or properties of significant hazard risk, upon notification in writing by the Utility, the property owner must, at their own expense, have the plumbing inspected for cross-connections by a State of Wisconsin Certified Cross-Connection Inspector/Surveyor or by a State of Wisconsin licensed plumber. The frequency of required inspections and re-inspections, based on potential health hazards involved, may be shortened by the Utility. The Utility shall charge fees as approved by the State of Wisconsin Public Service Commission for on-premises follow-up visits by Utility personnel for re-inspection due to customer non-compliance and for after-hours inspections or re-inspections.

**C. Owner Responsibility.** The property owner shall be responsible for the protection of the customer's potable water system. Every person owning or occupying a premise receiving municipal water supply shall maintain such municipal water supply free from any cross connection, either by a direct or an indirect nature. The responsibilities include the elimination of, or protection from, all cross connections on their premises. The owner shall, at their own expense, install, maintain and test any and all backflow preventers on their premises in compliance with the Chapter SPS 382.41 Wisconsin Administrative Code and the Utility's Cross Connection Ordinance.

The property owner shall have corrected any malfunction revealed by periodic testing of any backflow preventer on their premises. The property owner shall inform the Utility of any proposed or modified cross connections and also any existing cross connections that are not protected by an approved backflow prevention means. The property owner shall not install a by-pass around any backflow preventer unless there is a backflow preventer of the same type in the by-pass. Property owners who cannot shut down operation for testing of the backflow prevention assembly must supply additional assemblies necessary to allow testing and maintenance to take place. In the event the property owner installs potable water using fixtures, equipment or appurtenances upstream of the backflow preventer, such must have its own approved backflow prevention means.

The property owner is required to follow the protection practices described in the American Water Works Association publication AWWA M-14 titled "Recommended Backflow Prevention and Cross Connection Control", United States Environmental Protection Agency publication titled "Cross Connection Control Manual", Chapters SPS 381-384 Wisconsin Administrative Code, and the Utility's Cross Connection Control Ordinance, unless the Utility requires or authorizes other means of protecting the potable water systems.

Other required or authorized means will be subject to prior approval of the Utility.

**D. Right of Entry.** Upon presentation of credentials, representatives of the Utility shall have the right of entry at any reasonable time to examine any property served by a connection to the public water system of the Utility for cross-connection. If entry is refused, such representatives may obtain a special inspection warrant under 66.0119, Wis. Stats. Refusing to provide access shall be sufficient cause for the Utility to discontinue water service to the property, as provided under paragraph F of this ordinance.

**E. Provision of Requested Information.** The Utility may request an owner, lessee, or occupant of property served by a connection to the public water system to furnish the Utility with pertinent information regarding the piping systems on the property. Refusing to provide requested information shall
be sufficient cause for the Utility to discontinue water service to the property, as provided under paragraph Subsection F. of this ordinance.

F. Authority to Discontinue Service. The Utility is hereby authorized and directed to discontinue water service to any property wherein any connection in violation of this section exists and to take such other precautionary measures deemed necessary to eliminate any danger of contamination of the public water system. Water service shall be discontinued if the means of backflow prevention required by the Utility is not installed, tested, maintained, and repaired in compliance with this ordinance and Wisconsin Administrative Code NR 811 or if it is found that the means of backflow prevention required by this ordinance has been removed, bypassed or information requested in Section E. is not provided. Water service shall be discontinued only after reasonable notice and opportunity for hearing under Ch. 68 Wis. Stats., except as provided in Subsection G. of this section. Water service to such property shall not be restored until the unprotected cross-connection has been eliminated or requested information is not provided.

G. Emergency Discontinuance of Service. If it is determined by the Utility that an unprotected cross-connection or an emergency endangers public health, safety, or welfare and requires immediate action, service may be immediately discontinued. A written notice to the effect must be delivered to the customer premises. The owner, lessee, or occupant shall have an opportunity for hearing under Ch. 68 Wis. Stats., within 10 days of such emergency discontinuance. Such hearing shall be before the Board of Water Commissioners and shall conform to all existing due process requirements.

H. Reconnection of Service. Water service to any property discontinued under the provisions of this ordinance shall not be restored until the cross-connection has been eliminated or a backflow prevention device is approved by the Utility has been installed in compliance with the provisions of this section. The Utility shall charge fees as approved by the State of Wisconsin Public Service Commission for the reconnection of the water service.

I. Additional Protection. In the case of premises having (a) internal cross-connection that cannot be permanently corrected or controlled, or (b) intricate plumbing and piping arrangements or where entry to all portions of the premises is not readily accessible for inspection purposes, making it impracticable or impossible to ascertain whether or not dangerous cross-connections exist, the public water system shall be protected against backflow from the premises by installing an approved backflow preventer in the service line. In the case of any premises where there is any material dangerous to health that is handled in such a manner that, in the opinion of the Utility, could create an actual or potential hazard to the public water system, the public water system shall be protected by an approved air-gap separation or an approved reduced-pressure principle backflow preventer. Examples of premises where these conditions will exist include sewage treatment plants, hospitals, mortuaries, plating plants, and car wash establishments. In the case of any premises where, in the opinion of the Utility, an undue health threat is posed because of the presence of toxic substances, the Utility may require an approved air gap at the service connection to protect the public water system. This requirement will be at the discretion of the Utility.

Rule 06-32. Fire Hydrants. No person, except an employee of the Water Utility, Public Works Department or Fire Department, in the course of their employment, or person obtaining a permit from the Water Utility, shall open and take water from a Water Utility owned fire hydrant or in any way interfere with, injure, break, or deface any fire hydrant belonging to the Water Utility. No building, structure, tree, pole, post, sign, or any other obstruction shall be placed, located or maintained within a five (5') foot radius of any fire hydrant connected to the Water Utility water supply system.

Any unauthorized person taking water from a fire hydrant shall pay to the Water Utility a Hydrant Permit fee and water usage charge as payment for the water diverted from the fire hydrant in addition to any applicable civil forfeitures resulting from prosecution and conviction for a violation of this Chapter.

Fire Hydrant Permit fees are authorized by the Wisconsin Public Service Commission.
Rule 06-33. Fire Hydrant Maintenance. Private fire hydrant maintenance may be performed by Water Utility employees upon a signed agreement between the Water Utility and property owner. Charges for private fire hydrant maintenance shall be established by the Water Utility.

Rule 06-34. Fire Protection. The Water Utility, as a public service, may install and maintain fire hydrants to be used for Public Fire Protection. The fire hydrants shall be installed in accordance with the National Board of Fire Underwriters recommendations. However, the Water Utility does not assume liability for any failure to act in this regard as the performance of such service is not guaranteed within any particular time frame or as to any particular location.

Rule 06-35. Testing of Water. The Wisconsin Department of Natural Resources has approved and authorized the Water Production Laboratory of the Water Utility to test water to determine if it is safe for domestic purposes.

Any water connection larger than two (2”) inches shall be flushed by the installer and tested by the Water Utility laboratory and be certified with two consecutive bacteriologically safe samples at least twenty-four (24) hours apart prior to use for any purpose. A water line pressure test shall be made only after bacteriologically safe samples have been obtained.

Preparation for flushing and testing shall consist of providing a flushing assembly at the end of the installed line before any other piping is connected. The flushing assembly shall consist of a two (2”) inch minimum connection to the end of the line, a three-quarter (3/4”) inch female pipe tee for a test faucet, a test faucet and necessary hose to discharge the flushing water in to a drain. The size of the hose shall be one and one-half (1-1/2”) inches for water main sizes smaller than eight (8”) inches and hose lengths two hundred (200’) feet or less. All others require hoses two and one half (2-1/2”) inches in diameter.

Flushing shall proceed only upon approval and under the supervision of the Water Utility. All samples for newly constructed services or water mains shall be taken by Water Utility personnel. Metering of flushing water is required. Meters can be obtained at the Utility Business Office.

Flushing water may only be turned off upon notification by the Water Utility that the installation has been determined to be bacteriologically safe.

32.07 RULES AND REGULATIONS GOVERNING THE SEWERAGE SYSTEM

Rule 07-01. Sewer Inspection Permit Required. A Sewer Inspection Permit shall be obtained from the Department of Community Development and Inspections or the Water Utility before any extension is made to a sanitary sewer main or lateral. Any work on sanitary sewers within the street right-of-way or any Water Utility easement shall be done according to Water Utility specifications and inspected by the Water Utility Engineering Division.

Rule 07-02. Sewer Lateral Charges. Owners shall be responsible, where the sewer main extension has been approved by the Water Utility through a developer’s agreement for the sanitary sewer lateral installation costs from the main to the property line.

The initial sanitary sewer lateral(s), not installed as part of a developer’s agreement or an assessable utility extension, will be installed from the main through to the property line by the Water Utility, for which there will be charges as approved by Board.

Rule 07-03. Sewer Lateral Specifications. Sanitary sewer lateral from the sewer main to the property line shall be a minimum of four inch (4”) for residential properties and a minimum of six inch (6”) for non-residential properties, to include PVC pipe with rubber gaskets or solvent cemented joints. If a tee or wye is not available for connection, a saddle of the proper size shall be used. Saddle shall be installed with sealant and stainless steel straps as recommended by manufacturer. Hole cutter or sabre saw shall be used to cut PVC sewer pipe.
Rule 07-04. Responsibility for Sanitary Sewer Pipes, Appurtenances, and Connections. The property owner is responsible for the installation, maintenance, cleaning, repair and replacement of the entire sanitary sewer lateral from the building to the Water Utility's sanitary sewer located in an easement or in the public right-of-way.

In the event it becomes necessary to repair or replace that portion of the sanitary sewer lateral that lies underneath the public right-of-way, the Water Utility will make the necessary repair or replacement at its initial cost upon the property owner signing an agreement that the property owner will pay the costs of the necessary sanitary sewer lateral repair and replacement and excavation and repair of the public right-of-way in the event such work is necessitated because of damage or blockage to the sanitary sewer lateral that was caused by property owner, or occurred during the homeowner’s, or the homeowner's contractor's maintenance or cleaning of the sanitary sewer lateral or for other causes attributable to the homeowner or the homeowner's contractors.

In the event any repair or replacement of the sanitary sewer lateral outside of the public right-of-way is required of the owner, the owner, at their expense, must make the repair or replacement within thirty (30) days after receiving written notice from the Water Utility that repair or replacement is required. If the necessary repair or replacement is not completed by the owner within said thirty (30) days, or if the condition requiring repair or replacement is of such a nature as to cause a danger to persons or property, the Water Utility may make the necessary repair or replacement and charge the cost to the property owner, and specially assess the property served.

Rule 07-05. Customer Responsibility. The Water Utility shall not assume responsibility for any damages incurred by a customer or property owner arising out of a broken or defective sanitary sewer main where the installation thereof was performed in a good and workmanlike manner.

The Water Utility shall not be responsible for the cost of any property damage arising out of a broken or defective service pipe or appurtenance thereto where the property owner is responsible for the maintenance thereof.

Each customer shall be responsible for maintaining their premises which receives service in as safe a condition as the nature of the premises shall reasonably permit so as to protect employees of the Water Utility from harm when they enter said premises in the performance of their duties.

The customer is responsible for providing the Water Utility with access to their premises so that employees of the Water Utility may read meters and make other inspections as authorized or required by the Board or this Chapter. Water service may be temporarily discontinued (shut off) should a customer fail to comply with this Rule.

Rule 07-06. Required Building Connections to Sanitary Sewer. For each parcel of property, there shall be one sanitary sewer lateral connection, unless otherwise authorized and approved in writing by the General Manager. To assure preservation of the public health, comfort, and safety, it is required that any building used for human habitation or intended for human habitation and located adjacent to a sanitary sewer main or in a block through which such main extends, be connected with such sanitary sewer main by means of individual connections or private interceptor mains. If any person fails to comply for more than one hundred eighty (180) days after notice in writing, the Water Utility may impose a penalty or may cause connection to be made, and the expense thereof shall be assessed as a special tax against the property. The owner may, within thirty (30) days after the completion of the work, file a written request with the City Clerk asking that the special assessment be payable in ten (10) equal annual installments. The amount of each installment shall be equal to one-tenth (1/10th) of the total special assessment, plus interest at a rate determined by the Board. Special assessments shall be placed on the real estate tax roll and collected in the manner provided by law.

Rule 07-07. Sewerage Service Charges.

Rule 07-07(01). Cost of Service. Sewerage Service Charges are composed of operation,
maintenance, replacement, capital and debt costs. These costs of service are distributed to wastewater volume, BOD, suspended solids, phosphorus, and customer service.

Customer service costs associated with water meter costs, water meter reading, billing, and collecting bills are assessed equally to all sewer customers as a fixed charge.

New connections will be allowed to connect to the system if there is available capacity in the existing wastewater collection and treatment facilities. The Utility has the right to reject connections of users or other municipalities if capacity of the system is not adequate.

**Rule 07-07(02). Replacement Fund (DNR).** Replacement Fund costs are determined by annual depreciation cost to equipment with a life of 20 years of less. These allocations are then distributed to volume, BOD, suspended solids, and phosphorus. This is a restricted fund used for replacement of existing equipment.

**Rule 07-07(03). Capital Costs.** Capital expenses are allocated to the wastewater parameters based upon their relation to the parameters. Outlying community customers are not charged for any collection system capital expenditures. A return on investment is charged to outlying communities to collect revenues to reimburse the Utility for capital expenses incurred in the past for older wastewater treatment facilities and interceptors that are still in use.

**Rule 07-07(04). Operation and Maintenance Costs.** Operation and maintenance costs are allocated to wastewater parameters and customer services. For the outlying communities, the unit costs for volume are adjusted by subtracting out the cost of collection system sewer main and lateral maintenance. The outlying communities will pay for a portion of the sewer maintenance and treatment of infiltration/inflow that is attributable to their usage of the interceptor sewer system.

**Rule 07-07(05). Rates and Fees.** The Board shall establish, adopt, and from time to time modify rates and fees. The Board shall develop a sewerage service charge system that will:

1. Meet Department of Natural Resources’ requirements as may be required.
2. Develop rates that will allow the Water Utility to generate revenue to pay expenses, cover debt service, and receive an adequate return on investments.
3. Establish fair and equitable rates for the City of Kenosha retail customers, outlying municipalities, waste haulers and any other customers receiving service from the Water Utility.

All rates and fees for sewer service shall be adopted by the Board and shall relate to the following categories:

**A. Category A Retail Charges.** Category A Retail is defined as City of Kenosha customer with normal domestic strength wastewater having BOD concentrations of no greater than 200 mg/l, suspended solids no greater than 250 mg/l, phosphorus no greater than 5.0 mg/l.

1. The service charge for Category A Retail customers shall be the fixed charge plus volume charge. The service charge for Category A Retail dischargers discharging to the wastewater collection facilities and being served by the Water Utility with water metered service shall be based on the volume of water used, as measured by the Water Utility water meter upon the premises receiving water service from the Water Utility, plus a fixed charge.
2. Industrial dischargers will be assessed an additional charge for the purpose of defraying the cost of the Wastewater Discharge Permit and pretreatment program.
3. The service charge for Category A Retail residential dischargers discharging to the wastewater collection facilities and receiving part or all of their water supply from sources other than the Water Utility, shall be based upon the estimated volume of wastewater discharged to the wastewater collection facilities where there is no meter measuring the total water supply used. Where desired, the owners or occupiers of such property shall install sewage meters, at their cost and expense. Where such a meter has been installed, the service charge shall be based upon the volume of wastewater discharged,
plus a fixed charge. Commercial or industrial dischargers discharging to the wastewater collection facilities and receiving part or all of their water supply from sources other than the Water Utility, shall be required to install water or sewage meters for billing calculation purposes. The cost of the meters and installation shall be paid by the customer. Testing of meters to ensure the proper operation and accuracy shall be performed as required by the Water Utility.

4. Where a significant amount of metered water does not reach the wastewater collection facilities due to process water that is discharged into the storm sewer system or ground watering, etc., the discharger may, at their own cost and expense, install a second meter which would monitor the flow of such water. Requests for a second meter must be made, in writing, and approved by the General Manager of the Water Utility. Upon approval and verification by the Water Utility of the separated piping systems, the second meter will be installed.

5. The Water Utility may determine a sprinkling credit, which is a reduction in the Sewerage Service Charge, to be given for summer water consumption in excess of normal winter consumption. This credit is given based on the average usage during the winter season subtracted from the actual usage during the summer season. There is a minimum usage of 1,000 cubic feet per month for summer consumption. This provision applies only to retail residential customers within the City of Kenosha.

B. Category B Retail Charges. Category B Retail is defined as City of Kenosha customers having wastewater concentrations of BOD greater than 200 mg/l, suspended solids greater than 250 mg/l, or phosphorus greater than 5.0 mg/l.

Dischargers whose wastewater exceeds the concentrations for any one of these parameters shall be in Category B Retail. The service charge for Category B Retail wastewater shall be the fixed charge and volume charge as established in Category A Retail, plus a unit charge for BOD greater than 200 mg/l, suspended solids greater than 250 mg/l, or phosphorus greater than 5.0 mg/l. Category B Retail service charges for volume, BOD, suspended solids and phosphorus shall be computed in accordance with the formula presented below:

\[ C = F + (V \times CV) + 0.00624 V [(B \times CB) + (S \times CS) + (P \times CP)] \]

where:
- \( C \) is the Charge to sewer user for collection and treatment of wastewater;
- \( F \) is the Fixed charge per billing period;
- \( B \) is the Concentration of excess BOD in mg/l in the wastewater (concentration minus 200 mg/l equals \( B \));
- \( S \) is the Concentration of excess suspended solids in mg/l of wastewater (concentration minus 250 mg/l equals \( S \));
- \( P \) is the Concentration of excess phosphorus in mg/l of wastewater (concentration minus 5.0 mg/l equals \( P \));
- \( V \) is the Wastewater volume in 100 cubic feet for the billing period; \( CV \) is the Cost per 100 cubic feet;
- \( CB \) is the Cost per pound of BOD;
- \( CS \) is the Cost per pound of suspended solids;
- \( CP \) is the Cost per pound of phosphorus;
- 0.00624 equals Conversion factor.

C. Wholesale/Municipal Metered Charges. Wholesale/Municipal Metered Service Charges for outlying communities are established for customers flowing into master sewer meters. The charges for this class of customer shall be determined by actual readings and monitored loadings from the master meter. Fixed charges and/or sampling charges shall be calculated based on actual costs for service, including, but not limited to, metering, monitoring, testing, billing and administration.

D. Wholesale/Municipal Unmetered Charges. Wholesale/Municipal Unmetered Service Charges for outlying communities are established for customers not flowing into master sewer meters. Sewer service charges for outlying community's customers not having master sewer meters shall be based on average sewer metered flows and loadings, from their respective village, town, or district, less any industrial/commercial flows and loadings, divided by the number of nonindustrial/commercial customers connected to the metered system. Fixed charges shall be calculated based on actual costs for
service.

Industrial dischargers will be assessed an additional charge for the purpose of defraying the cost of the Wastewater Discharge Permit and Pretreatment Program.

A. Sewerage Service Charge Billing Period. Service charges shall be billed pursuant to a schedule recommended by the General Manager of the Water Utility and approved by the Board.

B. Payment of Service Charges. Sewerage service charges shall be payable twenty (20) days after the billing date, at the Water Utility Business Office or authorized payment station.

C. Penalties. A late payment charge of one (1%) percent per month will be added to bills not paid within 20 days of issuance. This late payment charge will be applied to the total balance for sewerage service, including late payment charges.

Rule 07-07(07). Service Charge for Haulers. No hauler in the business of collecting and disposing of septic tank sludge, holding tank sewage, leachate or other wastes shall discharge such material to the wastewater collection facilities unless a Wastewater Discharge Permit therefor has been first obtained from the Water Utility. "Hauler Dumping Rates" for service charges shall apply to all haulers.

Rule 07-07(08). Charges to Industrial Dischargers in the Wastewater Discharge Permit Program. In addition to service charges, industrial discharges in the Wastewater Discharge Permit Program shall pay an annual charge which is based upon the volume of wastewater discharged per year to the wastewater collection facilities. Charges are also assessed to pay for costs incurred by the Water Utility for the sampling and analysis of each of the priority pollutants and/or other regulated pollutants.

Rule 07-07(09). Laboratory Testing Charges. Laboratory fees for testing metals, oil and grease, PH, B.O.D., suspended solids, phosphorous, leachate sampling and other testing shall be based on time, material and overhead.

Rule 07-07(10). Charge For Unlawful Storm Water Discharge. In the event the Water Utility determines that storm (rain) water from a downspout, sump pump, parking lot, or any other cause located on property receiving sanitary sewer service is discharged in violation of Rule 08-02(02) of the Code of General Ordinances, the Water Utility may assess a charge to cover the cost of treatment, administration and other associated costs. In addition, penalties under Rule 10 Penalties may apply.

The owner or occupant of the violating property will be provided with a written notice of the violation and given 30 days to permanently disconnect the unlawful connection prior to the imposition of the charge.

The charge, based on the estimated volume of storm (rain) water entering the sanitary sewer system plus administrative cost, will be added to the customer’s service bill. This charge is in addition to all other remedies and ordinance enforcement measures provided for in this Chapter.

32.08 WASTEWATER DISCHARGE REGULATIONS

Rule 08-01. General. These regulations set forth uniform requirements for dischargers discharging into the wastewater collection facilities of the Water Utility and enables said Water Utility to comply with the Clean Water Act, as amended, 33 U.S.C. 1251, et seq. and the Pretreatment Regulations, 40 CFR Part 403. This Section also allows the POTW to operate pursuant to legal authority enforceable in Federal, State, and local courts, which authorizes or enables the POTW to apply and to enforce the requirements of Sections 307(b) and (c), and 402(b)(8) of the Act and any regulations as hereafter provided for. The objectives of this Section are as follows:
A. To prevent the introduction of discharges into the wastewater collection and treatment facilities which could cause injury thereto, not amenable to removal, or could contaminate sludge;

B. To provide for the equitable distribution of the costs and expenses of the system and of operating an industrial wastewater pretreatment program through the granting of Wastewater Discharge Permits.

C. To provide for the regulation and monitoring of dischargers discharging into the wastewater collection facilities through the issuance of permits and enforcement of general regulations.

These regulations apply to all wastewater discharged into the Water Utility's wastewater collection system and/or treated at the Water Utility's wastewater treatment facilities.

Rule 08-02. Discharge to the Wastewater Collection Facilities.

Rule 08-02(01). Unpolluted Waters Prohibited in Sanitary Sewers. No person shall discharge or cause to be discharged any unpolluted waters into the wastewater collection facilities. Unpolluted waters may only be discharged into storm sewers and such other outlets as permitted by law.

Rule 08-02(02). Downspouts and Sump Pumps Discharge Prohibited. No downspout or sump pump of any house, building, structure, or outlet of any cistern or drain shall be connected to or discharged to the wastewater collection facilities. In the event of such a connection, the Water Utility shall provide the owner or occupier of the violating property with a written notice to permanently disconnect the unlawful connection, within Thirty (30) days. It shall be unlawful for any person to fail to promptly comply with such order, unless an extension of time has been requested from and granted by the Water Utility prior to the date specified in an order to disconnect. (Charges for unlawful storm water discharge – See Rule 07-07 (10).)

   2. Concentrations of inert suspended solids, or inert dissolved solids, sufficient to injure the system or contaminate the sludge.

N. No person shall introduce or cause to be introduced into the POTW any pollutant or wastewater which pass through or interfere with the operation or performance of the POTW or sanitary sewer.

Rule 08-02(05). Dilution of Discharge Prohibited. No person discharging into the wastewater collection facilities shall increase the use of potable or process water or mix separate wastewaters for the purpose of diluting prohibited wastewater as a partial or complete substitute for pretreatment or to otherwise avoid compliance with or circumvent this Section.

Rule 08-02(06). Notice of Accidental Discharge of Prohibited Wastewater. Any person who does not hold a Wastewater Discharge Permit who discharges or causes to be discharged prohibited wastewater into the wastewater collection facilities shall immediately orally notify the Water Utility thereof. Such notice shall include the date, time, place, and cause of such discharge, the nature, volume, and concentration of such discharge and any corrective action taken. The oral notice must be reduced to writing and submitted to the Water Utility within ten (10) days of an accidental discharge.

Rule 08-03. Wastewater Discharge Permits.

Rule 08-03(01). Dischargers Required to Obtain a Permit. The following Dischargers shall be required to obtain a Wastewater Discharge Permit prior to and as a condition of any wastewater discharge into the wastewater collection facilities:

   C. Haulers.
   D. Municipalities.

Rule 08-03 (02). Procedures for Application. Applications for Wastewater Discharge Permits shall be made on Water Utility supplied forms. It shall be unlawful for any person to intentionally file an incomplete or inaccurate application. A Wastewater Discharge Permit will not be processed or issued until a complete and accurate application is filed. The application for a Wastewater Discharge Permit must be signed by an authorized representative of the industrial user, municipality or hauler, and must contain the following information prior to being processed:
   A. The name, address and location of the industrial discharger, hauler or municipality and the location of the point of discharge if different from the business address.
   B. The SIC number of the facility.
   C. The probable constituents and characteristics of wastewater that will be discharged.
   D. The expected time and duration of discharges.
   E. The expected average daily wastewater discharge rates, in gallons per day, including seasonal variations, if any.
   F. Site plans, floor plans, mechanical and plumbing plans, and details which show all sanitary sewers, sanitary sewer connections, inspection manholes, sampling chambers, and appurtenances by
size, location and elevation.

G. General description of activities, facilities, and plant processes on the premises, including all materials that may be discharged.

H. A listing of each product produced by type, expected quantity, process or processes, and anticipated rate of production.

J. Whether or not the Facility will be in compliance with this Section on a consistent basis.

**Rule 08-03(03). Amendments to Applications.** An industrial discharger, municipality, or hauler, must submit an amended application for a Wastewater Discharge Permit within thirty (30) days following any material change in the information required and previously submitted on an application form, and thirty (30) days prior to the following:

A. Change in the characteristics and constituents of wastewater,

B. Change in the volume of wastewater discharged by twenty percent (20%) or more, or

C. Change in the operations or processes utilized by the discharger. An amended application will be processed the same as if it were an original application. This rule does not apply to temporary variations in production schedules.

**Rule 08-03(04). Insufficient Information.** Where an application for a Wastewater Discharge Permit contains insufficient or inaccurate information, the Water Utility may require more complete and accurate information. Applicants shall be provided thirty (30) days from the date of receipt of written notice of an incomplete or inaccurate application in which to furnish more complete or accurate information.

**Rule 08-03(05). Permit Approval.** Ninety (90) days after a fully completed and accurate application is submitted for a Wastewater Discharge Permit, such permit shall be issued in accordance with the provisions of this Section, which will specify wastewater which is totally prohibited, place limits on the constituents and characteristics of wastewater, and provide for the pretreatment of certain wastewater prior to its discharge to the wastewater collection facilities. Wastewater Discharge Permits are granted by the Board.

**Rule 08-03(06). Permit Terms, Conditions and Limitations.** The following terms, conditions, and limitations shall be specified in Wastewater Discharge Permits:

A. Effluent limitations based on prohibited discharge standards, categorical pretreatment standards, local limits and state and local law.

B. Limitations on the average and maximum rate and time of discharge and/or requirements for flow regulation and equalization.

C. Requirements for inspection and sampling. Cost incurred by the Water Utility for sample collection and analysis shall be billed to the discharger.

D. Special conditions imposed by the Water Utility under particular circumstances, including sampling locations, frequency of sampling and monitoring, the number and types of analytical tests, reporting schedule, and special technical reports or discharge reports. The special conditions imposed shall be reasonable and necessary to carry out the objectives of this Section. In each case, at the discharger’s written request, the Water Utility may provide to the discharger a full and complete explanation of the reason for the special condition(s).

E. Requirements for reporting and action plans in the event of an accidental discharge of prohibited wastewater. Dischargers which have a potential for an accidental discharge of prohibited wastewater shall be required to develop a written plan designed to prevent accidental discharges of prohibited wastewater, and in the event of such accidental discharge, to mitigate potential damages which could be caused thereby. Such plan shall include a provision that dischargers place signs in conspicuous places on their premises advising officers, employees and agents thereof of the procedure to be utilized to report a discharge of prohibited wastewater to the Water Utility.
F. Requirements for pretreatment. Where pretreatment is required, the discharger shall submit a plan therefor to the Water Utility. Such plan may not be implemented until approved by the State of Wisconsin and the Water Utility. Effluent limitations will be based on applicable Federal and State pretreatment standards and this Chapter. It shall be unlawful for a discharger to fail to obey an order for pretreatment for any phase of the implementation of pretreatment. Pretreatment shall be at the sole cost and expense of the discharger.

G. Provisions for self-monitoring, sampling, reporting, notification, and record keeping requirements, including an identification of the pollutants to be monitored, sampling location, sampling frequency, and sample type, based on Federal and State laws, rules and regulations and this Chapter. Installation, operation, and maintenance of the sampling facilities shall be at the cost and expense of the discharger and shall be subject to the approval of the Water Utility. Access to sampling sites, processes that discharge wastewater, pretreatment facilities and wastewater self-monitoring records shall be granted to the Water Utility and its authorized representatives.

H. Requirements to control slug discharges, if determined by the POTW to be necessary. If the POTW determines that a slug control plan is needed, the industrial user must develop a plan with the following elements as deemed necessary by the POTW:

1. A description of discharge practices, including non-routine batch discharges;
2. A description of stored chemicals;
3. Procedures for immediately notifying the POTW of slug discharges, including any discharge that would violate a prohibition in Rule 08-02(04), with procedures for a subsequent written notification within 5 days;
4. Any procedures deemed necessary by the POTW to;
   a. Prevent accidental spills;
   b. Inspect and maintain storage areas;
   c. Handle and transfer materials;
   d. Control loading and unloading operations;
   e. Control plant site run-off; and
   f. Train workers.
5. Any procedures deemed necessary by the POTW for building containment structures or equipment;
6. Any procedures deemed necessary by the POTW to contain toxic organic pollutants, including solvents;
7. Any procedures and equipment deemed necessary by the POTW for emergency response; and
8. Any practices deemed necessary by the POTW to limit the damage suffered by the treatment plant or the environment after a slug discharge.

I. Provisions of discharge by haulers. The permit will identify each vehicle and the license number thereof which will discharge into the wastewater collection facilities. Permits shall be nonassignable and nontransferable, except in the case of replacement of a vehicle for which a permit has been issued. The Water Utility may require a bond to guarantee payment of all fees and charges. The time and place of discharge into the wastewater collection facilities will be designated by the Water Utility. The Water Utility may impose such conditions as it deems necessary on any permit granted.

   Haulers must carry public liability and motor vehicle insurance in an amount no less than One Million Dollars ($1,000,000) covering loss through death, injury and property damage caused in any way or manner by an action, or omission, of a hauler or the employees or agents thereof. A Certificate of Insurance must be furnished to the Water Utility with the application.

   Haulers shall post a bond for Five Thousand Dollars ($5,000) to indemnify and hold harmless the Water Utility against injury to the system, contamination of the sludge, and costs associated with the correction of upsets in process at the wastewater treatment facility. Permit holders may not discharge prohibited wastewater into the system unless their permit so authorizes, and then only to the extent permitted.
Haulers shall pay a service charge as determined by the concentration of the waste pursuant to Rule 07-07(05) of this Chapter, or as determined by agreement with the Water Utility. All trucked or hauled wastewater must be discharged at the point(s) designated by the Water Utility.

J. A statement that dischargers discharging on the effective date of this rule shall comply with said Section where it is stricter than Federal or State laws, or regulations, within fifteen (15) days after the effective date of said Section. If compliance with Section 32.08 is not met within the allotted fifteen (15) days, stepped enforcement actions will be initiated.

K. A statement of applicable civil and criminal penalties for violation of this Chapter, pretreatment standards and requirements, and any applicable compliance schedule.

L. Compliance by existing industrial sources with categorical pretreatment standards shall be within three (3) years of the date the standard is effective unless a shorter compliance time is otherwise specified. Existing sources which become industrial users subsequent to promulgation of an applicable categorical pretreatment standard shall be considered existing industrial users.

M. New sources shall install and have in operating condition, and shall "start-up" all pollution control equipment required to meet applicable pretreatment standards before beginning to discharge. Within the shortest feasible time (not to exceed 90 days), new sources must meet all applicable pretreatment standards.

Rule 08-03(07). Equivalent Limits. When the limits in a categorical pretreatment standard are expressed only in terms of mass of pollutant per unit of production, the POTW may convert the limits to equivalent limits expressed either as mass of pollutant discharged per day or effluent concentration.

The POTW shall calculate equivalent mass-per-day limitations by multiplying the limits in the standard by the industrial user's average rate of production. This average rate of production shall be based upon a reasonable measure of the industrial user's actual long-term daily production, such as the average daily production during a representative year. New sources shall use projected production in place of actual production.

Any industrial user operating under a control mechanism incorporating equivalent mass or concentration limits shall notify the POTW within two (2) business days after the user has a reasonable basis to know that the production level will significantly change.

Rule 08-03(08). Permit Duration. All Wastewater Discharge Permits shall be issued for four (4) years, or as determined by the Board, subject to conditions of this Section.

Rule 08-03(09). Limitations on Permit Assignment and Transfer. A Wastewater Discharge Permit is issued to a specific industrial discharger, municipality, or hauler for a specific operation and is not assignable to another discharger, or transferable to any other location without prior notification and approval from the Water Utility.

Rule 08-03(10). Permit Amendments by Issuer. The Water Utility may amend any Wastewater Discharge Permit issued to a discharger subject to the discharger being given an opportunity to be heard, for the purpose of correcting any errors or omissions made by the Water Utility and to incorporate revised limitations on prohibited wastewater required by law. A compliance schedule shall be issued if an industry cannot meet any new or modified requirements on their effective date, unless prohibited by Federal or State law, rule or regulation.

Rule 08-03(11). Extensions of Permit Time Schedules. Whenever any industrial discharger, municipality, or hauler believes that any time schedule contained in a Wastewater Discharge Permit is unreasonable under the circumstances, such discharger may request, in writing, an extension of time to meet such schedule prior to the expiration of any such time limit. Time extensions may be given after the fact, but the discharger is subject to the penalties herein provided for failure to meet such time schedule.

Rule 08-03(12). Opportunity for Hearing Relative to Permit Conditions and Limitations. Any discharger, within thirty (30) days of the granting of a Wastewater Discharge Permit, may file with the
Water Utility a request to be heard relative to the application of any permit conditions and limitations. An opportunity to be heard will be provided before the General Manager of the Water Utility within ten (10) days of the receipt thereby of a request for hearing.

**Rule 08-04. Reporting and Monitoring Requirements for Holders of Wastewater Discharge Permits.**

**Rule 08-04(01). NCPS Incorporated by Reference.** The NCPS, and all amendments which may be made thereto, are incorporated herein by reference.

**Rule 08-04(02). Application of Rule 08-04.** Rule 08-04 is applicable to all holders of Wastewater Discharge Permits where NCPS are applicable.

**Rule 08-04(03). Notice to Holders of Wastewater Discharge Permits.** Where applicable, the Water Utility shall provide written notification to all holders of Wastewater Discharge Permits, that NCPS are applicable, as follows:

- **A.** At the time of granting a Wastewater Discharge Permit, such notice will be provided within such permit, and limitations provided for by NCPS will be a term and condition of such permit.
- **B.** At such time as the Water Utility is aware of new NCPS.
- **C.** At such time as the Water Utility is aware that a holder of a Wastewater Discharge Permit is subject to NCPS.

However, lack of notice furnished by the Water Utility will not relieve the holder of a Wastewater Discharge Permit of their obligation to timely comply with NCPS.

**Rule 08-04(04). Baseline Monitoring Report (BMR) Filing Requirements.** All Baseline Monitoring Reports shall be filed with the Water Utility as follows:

- **A.** Any industrial discharger subject to NCPS that plans to connect to the wastewater collection facilities shall file a BMR with the Water Utility no later than sixty (60) days prior to discharging any wastewater to the collection facilities.
- **B.** New industrial dischargers subject to NCPS shall file a BMR with the Water Utility no later than ninety (90) days prior to the initial discharge of wastewater to the collection facilities.
- **C.** An existing discharger that becomes an industrial discharger subject to NCPS after promulgation of an applicable pretreatment standard shall file a BMR with the Water Utility within one hundred eighty (180) days following the effective date of the categorical standard.

**Rule 08-04(05). Required Contents of BMR.** A BMR shall be on a Water Utility form and shall contain the following information respecting industrial dischargers subject to NCPS:

- **A.** Identifying Information. The name and address of the discharger, and the names of the persons who own and operate the facility from which there will be a discharge of wastewater into the wastewater collection facilities; and the SIC of the operator.
- **B.** Permits. A listing of any environmental control permits held or applications pending.
- **C.** Description of Operations. A description of the unit processes that the facility plans to use in production.
- **D.** Production. A description of the nature and average rate of production.
- **E.** Points of Discharge. A process schematic diagram indicating points of wastewater discharge.
- **F.** Pretreatment Equipment. Any pretreatment equipment employed at the facility.
- **G.** Flow Measurement. The discharger shall submit information showing the measured average daily and maximum daily flow, in gallons per day, to the POTW from all wastestreams.
- **H.** Measurement of Pollutants. The discharger shall identify the pretreatment standards applicable to each regulated process. Sampling and analysis shall be done on wastestreams that are regulated and results shall identify the nature and concentration of regulated pollutants. Sampling and analysis shall be performed pursuant to 40 CFR 403.12(b)(5)(ii)-(viii). Where alternative sampling is authorized by the
POTW under Rule 08-04(10), the samples shall be representative of the discharge and the decision to allow alternative methods shall be documented in the industrial user's file.

I. Certification. A statement, reviewed by an authorized representative of the discharger and certified by a qualified professional, indicating whether pretreatment standards are being met on a consistent basis, and, if not, whether additional operation and maintenance and/or additional pretreatment is required for the discharger to meet the pretreatment standards and requirements.

Rule 08-04(06). Compliance Date Report. Within ninety (90) days following the date for final compliance with applicable categorical pretreatment standards or in the case of a new source following commencement of the introduction of wastewater into the POTW, any industrial discharger subject to NCPS shall submit to the Water Utility a report containing the information described in 40 CFR 403.12(b)(4)-(6). For all other industrial dischargers subject to NCPS expressed in terms of allowable pollutant discharge per unit of production, this report shall include the discharger's actual production during the appropriate sampling period. This report shall be signed by an authorized representative of the discharger and certified by a qualified professional.

Rule 08-04(07). Periodic Reports on Continued Compliance. Any industrial discharger subject to NCPS shall submit to the Water Utility a report indicating the nature and concentration of pollutants in the effluent which are limited by categorical pretreatment standards. This report shall also include a record of measured or estimated average and maximum daily flows for the reporting period for the discharge reported in Rule 08-04(05)(G). Compliance reports shall be submitted to the Water Utility during the months of July and January, unless required more frequently by the Water Utility. Flow shall be reported on the basis of actual measurement, except that where cost or feasibility considerations justify, the Water Utility may accept reports of average and maximum flows estimated by verifiable techniques.

Rule 08-04(08). Pretreatment Reporting Requirements. Industrial dischargers subject to NCPS shall comply with the following reporting requirements:

A. All dischargers shall notify the POTW immediately of all discharges that could injure the system or contaminate the sludge, including any slug loadings by the discharger.

B. The reports required in Rule 08-04(07) shall be based upon data which is representative of conditions occurring during the reporting period. Appropriate sampling and analysis shall be performed during the period covered by the reporting period. The POTW shall require such frequency of monitoring as necessary to assess and assure compliance by discharger, with applicable pretreatment standards and requirements. Sampling and analysis may be performed by the POTW instead of the discharger. When the POTW collects all of the information required for a report, the POTW will not require the discharger to submit the report.

C. If a discharger subject to the reporting requirement in Rule 08-04(07) monitors any pollutant more frequently than required by the POTW, using the procedures prescribed in this Section, the results of this monitoring shall be included in the report required in Rule 08-04(07).

D. The POTW may authorize a monitoring waiver for individual pollutants for an industrial user subject to a categorical standard if the user has demonstrated through sampling and other technical factors as deemed necessary by the POTW that the pollutant is neither present nor expected to be present in the discharge, or is present only at background levels from intake water and without any increase in the pollutant due to activities of the industrial user. This authorization is subject to the following conditions:

1. The POTW may authorize a waiver where a pollutant is determined to be present solely due to sanitary wastewater discharged from the facility provided that the sanitary wastewater is not regulated by an applicable categorical standard and otherwise includes no process wastewater.

2. The monitoring waiver is valid only for the duration of the effective discharge permit, but in no case longer than five (5) years. The user shall submit a new request for the waiver before the waiver may be granted for each subsequent discharge permit or five (5) year period.

3. In making a demonstration that a pollutant is not present, the industrial user shall provide data from sampling of the facility's process wastewater prior to any treatment present at the facility that is
representative of all wastewater from all processes. The request for a monitoring waiver shall include the
certification statement and be signed in accordance with Wisconsin Administrative Code, NR 211.15(10).
Non-detectable sample results may only be used as a demonstration that a pollutant is not present if the
EPA approved method from 40 CFR Part 136 with the lowest minimum detection level for that pollutant
was used in the analysis.

4. Any grant of the monitoring waiver by the POTW shall be included as a condition in the user's
discharge permit. The reasons supporting the waiver and any information submitted by the user in its
request for the waiver shall be maintained by the POTW for three (3) years after expiration of the waiver.

5. Upon approval of the monitoring waiver and revision of the user's discharge permit by the
POTW, the industrial user shall certify on each report with the statement below, that there has been no
increase in the pollutant in its wastestream due to activities of the industrial user: "Based on my inquiry of
the person or persons directly responsible for managing compliance with the applicable pretreatment
standards, I certify that, to the best of my knowledge and belief, there has been no increase in the level of
[list pollutant(s)] in the wastewaters due to the activities at the facility since filing of the last periodic report."

6. In the event that a waived pollutant is found to be present or is expected to be present based
on changes that occur in the user's operations, the user shall immediately comply with the monitoring
requirements of the discharge permit or other more frequent monitoring requirements and notify the
POTW.

7. This paragraph does not supersede certification processes and requirements established in
categorical pretreatment standards, except as otherwise specified in the categorical pretreatment standard

8. Where the POTW has authorized a user subject to a categorical pretreatment standard to
forego sampling for a pollutant that is not present, the POTW shall sample for the waived pollutant at least
once during the term of the user's discharge permit. In the event that the POTW subsequently determines
that a waived pollutant is present or is expected to be present in the industrial user's wastewater based on
changes that occur in the user's operations, the POTW shall immediately begin at least annual effluent
monitoring for that pollutant and inspection.

E. The POTW may determine that an industrial user subject to categorical pretreatment
standards is a non-significant categorical industrial user rather than a significant industrial user on a finding
that all of the following conditions are met:

1. The industrial user never discharges more than 100 gallons per day of total categorical
wastewater, excluding sanitary, non-contact cooling and boiler blowdown wastewater, unless specifically
included in the pretreatment standard.

2. The industrial user has consistently complied with all applicable categorical pretreatment
standards and requirements.

3. The industrial user never discharges any untreated concentrated wastewater.

4. The industrial user annually submits the following certification statement signed in accordance
with the signatory requirements of Wisconsin Administrative Code, NR 211.15 (10) along with any
additional information deemed necessary by the POTW: "Based on my inquiry of the person or persons
directly responsible for managing compliance with pretreatment standards, I certify that, to the best of my
knowledge and belief that during the period from [date], to [date], the facility described as [facility name]
met the definition of a non-significant categorical industrial user as described in NR 211.15 (4) (d); the
facility complied with all applicable pretreatment standards and requirements during this reporting period;
and the facility never discharged more than 100 gallons of total categorical wastewater on any given day
during this reporting period. This compliance certification is based upon the following
information:[applicable data]."

5. Where the POTW has determined that an industrial user meets the criteria for classification as
a non-significant categorical industrial user in accordance with Wisconsin Administrative Code, NR 211.15
(4) (d), the POTW shall evaluate, at least once per year, whether the industrial user continues to meet
those criteria.

F. The POTW may reduce the frequency of the reports required under Rule 08-04(07) to no less
than once per year, unless required more frequently by the pretreatment standard or the department,
where the industrial user meets all of the following conditions:
1. The industrial user’s total categorical wastewater flow does not exceed any of the following:
   a. One one-hundredth percent of the design dry weather hydraulic capacity of the POTW, or five thousand (5,000) gallons per day, whichever is smaller, as measured by a continuous effluent flow monitoring device unless the industrial user discharges in batches;
   b. One one-hundredth percent of the design dry weather organic treatment capacity of the POTW; and
   c. One one-hundredth percent of the maximum allowable headworks loading for any pollutant regulated by the applicable categorical pretreatment standard for which approved local limits were developed by a POTW in accordance with Wisconsin Administrative Code, NR 211.10 (3);
2. The industrial user has not been in significant noncompliance, at any time in the past two (2) years;
3. The industrial user does not have daily flow rates, production levels, or pollutant levels that vary so significantly that decreasing the reporting requirement would result in data that are not representative of conditions occurring during the reporting period;
4. The industrial user shall notify the POTW immediately of any changes at its facility causing it to no longer meet conditions of paragraph 1. or 2. Upon notification, the industrial user shall immediately begin complying with the minimum reporting requirements under Rule 08-04(07); and
5. The control authority shall retain documentation to support the determination that a specific industrial user qualifies for reduced reporting requirements under this paragraph for a period of three (3) years after the expiration of the term of the control mechanism.
6. Where the POTW has determined that an industrial user is ‘subject to reduced reporting requirements as described in, the POTW shall inspect and sample the effluent from the industrial user at least once every two (2) years. If the industrial user no longer meets the conditions for reduced reporting, the POTW shall immediately begin sampling and inspecting the industrial user at least once a year.

Rule 08-04(09). Reports from Noncategorical Significant Industrial Dischargers. The POTW shall require appropriate reporting from those significant industrial dischargers with discharges that are not subject to NCPS. Significant noncategorical industrial dischargers shall submit to the Water Utility at least once every six months, in the months of July and January, a report indicating the nature, concentration, and flow of the pollutants required to be monitored by the Water Utility. These reports shall be based on sampling, and analysis performed in the period covered by the report, and performed in accordance with the techniques described in 40 CFR Part 136 and amendments thereto. Where 40 CFR Part 136 does not contain sampling or analytical techniques, or where the Administrator otherwise determines, the sampling and analysis shall be performed by using validated analytical methods or any other applicable sampling and analytical procedures, including procedures suggested by the POTW or other persons approved by the EPA Administrator. Sampling shall be conducted at the appropriate sampling location and shall be representative of conditions during the reporting period. If a user monitors any regulated pollutant more frequently than required by the POTW, the results of this monitoring shall be included in the report. This sampling and analysis may be performed by the POTW. Where the POTW itself collects all information required for the report, the noncategorical significant industrial discharger will not be required to submit the report.

Rule 08-04(10). Sampling Collection and Analysis for SIUs. Sampling and analysis shall be performed to identify the concentration or mass of regulated pollutants in the discharge from each regulated process, according to the requirements of the applicable categorical pretreatment standard and the POTW. Samples shall be representative of daily operations. Grab samples shall be used for pH, cyanide, total phenols, oil and grease, sulfide and volatile organics. All other samples shall be 24-hour flow proportional composites, unless time proportional or grab sampling is authorized by the POTW. Where alternative sampling is authorized by the POTW, the samples shall be representative of the discharge and the decision to allow alternative methods shall be documented in the industrial user's file. Multiple grab samples collected during a 24-hour period may be composited prior to analysis provided appropriate
protocols specified in Wisconsin Administrative Code, ch. NR 219, and in EPA and department guidance are followed.

Rule 08-04(11). Notice of Violation/Repeat Sampling and Reporting. If sampling performed by a discharger indicates a violation, the discharger must notify the POTW within twenty-four (24) hours of becoming aware of the violation. The discharger shall also repeat the sampling and analysis and submit the results of the repeat analysis to the POTW within 30 days after becoming aware of the violation, except the discharger is not required to resample if the POTW performs sampling between the discharger’s initial sampling and the time when the discharger receives the results of this sampling.

Rule 08-04(12). Notification of Changed Discharge. All industrial dischargers shall promptly notify the POTW in advance of any substantial change in the volume or character of pollutants in their discharge, including the listed or characteristic hazardous wastes for which the industrial user has submitted initial notification under Rule 08-04(11). Significant Industrial Users are required to notify the POTW immediately of any changes at its facility affecting the potential for a Slug Discharge.

Rule 08-04(13). Hazardous Waste Notification. Any industrial discharger who commences the discharge of hazardous waste shall notify the POTW, the EPA Regional Waste Management Division Director, and State hazardous waste authorities in writing of any discharge into the POTW of a substance which, if otherwise disposed of, would be a hazardous waste under 40 CFR Part 261. Such notification must include the name of the hazardous waste as set forth in 40 CFR Part 261, the EPA hazardous waste number, and the type of discharge (continuous, batch, or other). If the industrial discharger discharges more than 100 kilograms of such waste per calendar month to the POTW, the notification shall also contain the following information to the extent such information is known and readily available to the industrial discharger:

A. An identification of the hazardous constituents contained in the wastes,
B. An estimation of the mass and concentration of such constituents in the wastestream discharged during that calendar month, and
C. An estimation of the mass of constituents in the wastestream expected to be discharged during the following twelve (12) months.

All notifications must take place no later than 180 days after the discharge commences. Dischargers are exempt from the hazardous waste notification requirement during a calendar month in which they discharge fifteen (15) kilograms or less of non-acute hazardous wastes. Discharge of any quantity of acute hazardous waste as specified in 40 CFR 261.30(d) and 261.33(e) requires a onetime notification.

Rule 08-04(14) Signature Requirements. The reports containing analytical data required by this section shall include a certification as defined in NR211.15(10)(a) signed by an Authorized Representative.

Rule 08-05. General Provisions Governing Dischargers Discharging to the Wastewater Collection Facilities.

Rule 08-05(01). Measurement of Flow. The volume of flow used for computing service charges shall be the metered water consumption of the discharger as shown in the records of meter readings maintained by the Water Utility, except that devices for measuring the volume of wastewater discharged may be required by the Water Utility if this volume cannot otherwise be determined from the metered water consumption records. Metering devices for determining the volume of wastewater shall be approved by the General Manager of the Water Utility and installed, owned, and maintained by the discharger. Such meters, upon approval and installation, shall not be removed without the consent of the General Manager of the Water Utility. New categorical dischargers shall install, maintain, and own flow monitoring equipment for processes which generate categorical wastewater discharges. When a pretreatment system is updated or newly constructed, flow monitoring equipment shall be installed, maintained, and owned by the industrial
Devices used for measuring flows by methods described in §NR 218.05 shall be calibrated and the calibration rechecked at least annually using one of the following methods:

A. A method specified by the manufacturer of the device.
B. Calculation of the flow from the dilution of chloride or other ion or substance added to the effluent stream at a fixed rate sufficiently ahead of the sampling point to ensure complete mixing.
C. Measuring the volume withdrawn from or introduced into a tank or container in a known period of time, or
D. In any specific instance by any other method approved by the General Manager of the Water Utility in response to a written request.

Records of calibration data shall be retained for a three-year period, or for a longer period on specific request of the Water Utility.

Rule 08-05(02). Sampling Manholes. A discharger which discharges wastewater in excess of normal domestic strength wastewater, including all food service facilities, and/or which discharges nonconventional pollutants, shall be required to construct and maintain one (1) or more sampling manholes to facilitate observation, measurement, and sampling of its wastewater. Sampling manholes shall be located as prescribed by or approved by the General Manager. Sampling manholes and related equipment shall be installed by the discharger at his/her cost and expense, and shall be maintained by the discharger so as to be safe, accessible, and in proper operating condition at all times. Plans for the installation and construction of sampling manholes and related equipment shall be approved by the General Manager prior to the commencement of construction or installation. This requirement shall apply to all new construction, change in occupancy, and renovation of existing facilities, and existing facilities classified as Category B Retail.

Rule 08-05(03). Wastewater Sampling. Any wastewater discharged into the wastewater collection facilities shall be subject to periodic inspection by the Water Utility to determine the character and concentration thereof, without notice to the discharger.

Rule 08-05(04). Grease and Oil, Sand Separators and Sand Basins. A discharger (other than cooking and/or food waste) who utilizes a garage catch basin, or grease or oil interceptor/separator which is connected to the wastewater collection facilities shall install, at its cost and expense, a sampling manhole on the sewer lateral. The manhole shall be located outside of the building, on private property and, if possible, accessible by a van/truck. The design of the manhole shall be as shown in "Standard Specifications for Sewer and Water Construction in Wisconsin" (latest edition) or as approved by the General Manager.

Rule 08-05(05). Monitoring of Municipalities. Municipalities other than the City of Kenosha shall monitor their wastewater and report their findings as to the wastewater volume, BOD, suspended solids, phosphorus, and oil at the cost and expense of the municipality, as directed by the General Manager. Metering stations may be required by the General Manager to be installed and maintained at the cost and expense of the municipality. The General Manager shall have the right to install flow monitoring and sampling equipment to check the results reported by a municipality, and in the event of a dispute or conflict, the findings and determinations of the Water Utility shall control, all in accordance with the municipality's Wastewater Discharge Permit.

Rule 08-05(06). Analysis. All measurements, testing and analysis shall be performed in accordance with 40 CFR Part 136 and amendments thereto. Where 40 CFR Part 136 does not contain sampling or analytical techniques for the pollutant in question, or where the Administrator determines that the Part 136 sampling and analytical techniques are inappropriate for the pollutant in question, sampling and analysis shall be performed by using validated analytical methods or any other applicable sampling and analytical procedures, including procedures suggested by the POTW or other parties, as approved by the Administrator. Sampling method, location, time, duration and frequency are determined on a
case-by-case basis, subject to the approval by the Water Utility.

**Rule 08-05(07). Confidential Information.** Information and data obtained by the Water Utility pursuant to this Section with respect to the nature and frequency of wastewater discharges shall be available to the public or other governmental agencies, without restriction, unless the discharger specifically requests confidentiality and is able to satisfactorily demonstrate that the release of such information would divulge information, processes, or methods of production entitled to protection as trade secrets. When the Water Utility grants a request for confidentiality, the portions of a report which are confidential shall not be made available for inspection to the public, but shall be made available, upon written request, to governmental agencies for uses related to this Section. The National Pollutant Discharge Elimination System (NPDES) Permit, and Wisconsin Pollutant Discharge Elimination System (WPDES) Permit shall also be available for use by any party involved in judicial or administrative review or enforcement proceedings involving the discharger furnishing the report. Wastewater constituents and characteristics are not recognized as confidential information.

**Rule 08-05(08). Bypass.** Bypass is prohibited, and the POTW may take enforcement action against an industrial user for a bypass, unless:

A. The bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

B. There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate backup equipment should have been installed in the exercise or reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventative maintenance; and,

C. The industrial user submitted notices as required under this rule.

If an industrial user knows in advance of the need for a bypass, it shall submit prior notice to the POTW, at least ten days before the date of the bypass, if possible.

An industrial user may allow any bypass to occur which does not cause pretreatment standards or requirements to be violated, but only if it also is for essential maintenance to assure efficient operation. An industrial user shall submit oral notice of an unanticipated bypass that exceeds applicable pretreatment standards to the POTW within twenty-four (24) hours from the time it becomes aware of the bypass. A written submission shall also be provided within 5 days of the time the industrial user becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

The POTW may approve an anticipated bypass, after considering its adverse effects, if the POTW determines that the user will meet the three conditions listed above in 08-05(08) A, B, and C.

**Rule 08-05(09). Upset.** An upset shall constitute an affirmative defense to an action brought for noncompliance with pretreatment standards if the requirements of the next paragraph are met.

A. An industrial user who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:

1. An upset occurred and user can identify the cause(s) of the upset.

2. The facility was at the time being operated in a prudent and workmanlike manner and in compliance with applicable operation and maintenance procedures.

3. The user has submitted the following information to the POTW within twenty-four (24) hours of becoming aware of the upset (if this information is provided orally, a written submission must be provided within five (5) days):

   (a) A description of the discharge and cause of noncompliance.

   (b) The period of noncompliance, including exact dates and times or, if not corrected, the anticipated time the noncompliance is expected to continue.
(c) Steps being taken and/or planned to reduce, eliminate and prevent recurrence of the noncompliance.

4. In any enforcement proceeding, the user seeking to establish occurrence of an upset shall have the burden of proof.

5. The user shall control production or all discharges to the extent necessary to maintain compliance with pretreatment standards upon reduction, loss, or failure of its treatment facility until the facility is restored or an alternative method of treatment is provided. This requirement applies in the situation where, among other things, the primary source of power of the treatment facility is reduced, lost or fails.

Rule 08-07. Reassignment of Dischargers. The General Manager will reassign dischargers into appropriate service charge categories where Water Utility records indicate facts supporting such a change. Dischargers will be given an opportunity to be heard on the proposed action before it becomes effective.

Rule 08-08. Enforcement of Wastewater Discharge Permit.

Rule 08-08(01). Written Notice of Violation. Any discharger in violation of a Wastewater Discharge Permit issued to it, shall be served with a written notice stating the nature of the violation and the action proposed to be taken by the Water Utility, in response to such violation.

Rule 08-08(02). Administrative Order(s). The General Manager shall have the following courses of action as options which may be taken, jointly or severally, in response to a violation of a Wastewater Discharge Permit:

A. To issue an order to immediately cease the unlawful conduct identified in a notice of violation.

B. To issue an order to cease the unlawful conduct identified in a notice of violation within a specified period of time.

C. To pursue penalties and legal remedies as provided in Section 32.11.

D. To make a claim for damages occasioned by injury to the system or contamination of the sludge.

E. To suspend or revoke a Wastewater Discharge Permit.

F. To commence an action at law or in equity in the State or Federal Courts for a declaratory judgment, monetary damages, and/or a temporary or permanent injunction.

G. To commence an action at law for a court imposed compliance schedule.

Rule 08-08(03). Opportunity for and Purpose of Hearing. The notice of violation shall provide the discharger with an opportunity for a hearing prior to enforcement action being taken. Such notice shall provide a time within which the discharger may request a hearing, which time limit shall be reasonable under the circumstances. Following a request for a hearing, a hearing shall be held before the General Manager and the violator shall be notified, in writing, of the time, date and place thereof. The purpose of such hearing shall be to determine the existence of mitigating factors, if any, and to determine the factual basis underlying the alleged violation. The failure to make a timely, written request for a hearing shall constitute a waiver of the right to such hearing. However, in the event of an emergency, an order under Rule 08-08 (02) A. may be issued without a written notice and prior hearing, provided that such written notice and hearing are provided as soon as possible following the issuance of said order.

Rule 08-08(04). Written Determination. Within ten (10) days following the hearing, or in the absence of a timely request for a hearing, within ten (10) days following the last day on which a hearing could have been requested, a written determination report shall be made.

Rule 08-08(05). Grounds for Suspension, Revocation, or NonRenewal of Wastewater
Discharge Permit. The General Manager of the Water Utility may commence an administrative proceeding, upon written notice, and an opportunity to be heard, to seek the suspension, revocation or nonrenewal of any Wastewater Discharge Permit should a discharger:

A. Fail to factually report to the Water Utility the constituents and characteristics of its wastewater discharge.

B. Fail to promptly report to the Water Utility any violation by it of this Section or of any order promulgated under authority of this Section or any violation of any permit it may hold issued pursuant to this Section.

C. Fail to promptly report to the Water Utility any significant change in the constituents and characteristics of its wastewater discharge.

D. Fail to provide to the Water Utility reasonable access to its premises for inspection, sampling and monitoring purposes.

E. Fail to abide by the terms and conditions of this Section, any order promulgated under authority of this Section, any permit issued pursuant to this Section or any court order enforcing this Section and orders promulgated under its authority.

F. Fail to provide accurate and truthful information and statements to the Water Utility.

G. Attempt to or tamper with any sampling, or monitoring equipment or with the analysis or reports required by this Chapter.

H. Fail to timely file an amended permit application where one is required by this Section.

Rule 08-09. Service of Notices, Findings, and Determinations. Service of notices, findings, and determinations provided for in this Section shall be by personal service or by Certified Mail with Return Receipt. Notices to the Water Utility shall be served at or delivered to the Water Utility Business Office.

Rule 08-10. Procedures for Review. Any discharger, permit applicant, or permit holder adversely affected by any decision, action or determination made by the General Manager of the Water Utility interpreting or implementing the provisions of this Section or of any permit issued herein, may file with the General Manager of the Water Utility a written request for reconsideration within ten (10) days of the date of such decision, action, or determination, setting forth in detail the facts and arguments supporting the request for reconsideration. The General Manager of the Water Utility shall render a decision on the request for reconsideration, in writing, within fifteen (15) days of receipt of the request. If the decision on the request for reconsideration made by the General Manager of the Water Utility is unsatisfactory to the party requesting the reconsideration, then such party may, within ten (10) days after notification of such decision, file a written appeal with the Board. The written appeal shall be heard by the Board within forty-five (45) days from the date of filing. The Board shall make a final ruling on the appeal within sixty (60) days from the date of the filing of an appeal.

Rule 08-11. Annual Publication of Enforcement Proceedings. The Water Utility shall annually publish, in the largest daily newspaper published in Kenosha, a list of industrial users which, during the previous twelve (12) months, were in significant noncompliance with applicable pretreatment standards and requirements. Significant noncompliance and/or criteria are listed in 08-01.

Rule 08-12 Grease Management.

Rule 08-12(01) Purpose. The purpose of this rule is to establish uniform requirements for food service establishments discharging grease wastewater into the Water Utility wastewater collection system and to enable the Water Utility to comply with all applicable federal and state laws, including those, which apply to sanitary sewer overflows.

Rule 08-12(02) Food Service Establishments.

A. General. All food service establishments are required to have a grease trap or grease
B. New facilities. Upon the effective date of this rule, food service establishments which are newly proposed or constructed, or existing facilities which will be expanded or renovated, where such facility did not previously exist, shall be required to install, operate and maintain a grease interceptor or grease trap according to the requirements of the Wisconsin Administrative Code, SPS 382.34(5).

C. Existing facilities. For the purposes of sizing and installation of grease interceptors, all food service establishments existing prior to the effective date of this rule shall be permitted to operate and maintain existing grease interceptors or grease traps provided same are in efficient operating condition. Upon the effective date of this rule, the Water Utility may require an existing food service establishment to install, operate and maintain a new grease interceptor or trap that complies with the requirements of this chapter or to modify or repair any noncompliant plumbing or existing interceptor or trap within ninety (90) days of written notification by the Water Utility when any one or more of the following conditions exists:

1. The facility is found to be contributing oils and grease in quantities sufficient to cause line stoppages or necessitate increased maintenance on the wastewater collection system;
2. The facility has an undersized, irreparable or defective grease interceptor or trap;
3. The facility has a garbage grinder;
4. Remodeling of the food preparation or kitchen waste plumbing system is performed which requires a plumbing or building permit to be issued;
5. The existing facility is sold or undergoes a change of ownership.

D. Plumbing connections. Grease interceptors or traps shall be located in the food service establishment’s lateral sewer line after all fixtures that may introduce grease into the sewer system and the connection to the wastewater collection system. Such fixtures shall include but not be limited to, sinks, dishwashers, automatic hood wash units, floor drains in food preparation and storage areas, and any other fixture which is determined to be a potential source of grease. Garbage grinders installed within food service establishments shall be plumbed through the grease interceptor(s) and a solids interceptor shall separate the discharge before connecting to the grease trap. Solids interceptors and grease interceptors shall be sized and rated for the discharge of the garbage grinder. Wastewater from sanitary facilities and other similar fixtures shall not be introduced into the grease interceptor or trap under any circumstances.

E. Grease interceptors. Grease interceptors shall be installed at all new food service establishments as specified by the Wisconsin Administrative Code, SPS 382.34(5). All food service establishments shall comply with the following guidelines:

1. Inspection, pumping, and maintenance. Each food service establishment shall be responsible for the costs of installing, inspecting, pumping, cleaning and maintaining its grease interceptor. Pumping services shall include the initial complete removal of all contents, including floating materials, wastewater and bottom sludge and solids from the interceptor. Grease interceptor cleaning shall include scraping excessive solids from the walls, floors, baffles and all pipe work. The return of gray water back into the grease interceptor from which the wastes were removed is allowable, provided that grease and solids are not returned to the interceptor. The grease hauler shall wait at least twenty (20) minutes to allow the interceptor waste to separate in the truck tank before attempting to re-introduce the gray water to the interceptor. It shall be the responsibility of each food service establishment to inspect its grease interceptor during the pumping procedure to ensure that the interceptor is properly cleaned out and that all fittings and fixtures inside the interceptor are in working condition and functioning properly.

2. Interceptor pumping frequency. Each food service establishment shall determine the frequency at which its grease interceptor(s) shall be pumped according to the following criteria:
   a. When the floatable grease layer exceeds six (6) inches in depth as measured by an approved dipping method; or,
   b. When the settleable solids layer exceeds eight (8) inches in depth as measured by an approved dipping method; or,
   c. When the total volume of settleable solids is more than three quarters (3/4) of the total clearance of the outlet pipe located at the bottom of the interceptor; or,
   d. When the total volume of captured grease and solid material displaces more than twenty (20)
percent of the capacity of the interceptor as calculated using an approved dipping method.

3. Repairs. Each food service establishment shall be responsible for the cost and scheduling of all repairs to its grease interceptor(s). Repairs required by the Water Utility shall be completed within ten (10) calendar days after written notice is received by the facility unless the Water Utility establishes a different compliance date.

4. Disposal. Wastes removed from each grease interceptor shall be disposed of at a facility permitted to receive such wastes. Neither grease nor solid materials removed from interceptors shall be returned to any grease interceptor, private sewer line or to any portion of the wastewater collection system.

F. Interceptor additives prohibited. Any chemicals, enzymes, emulsifiers, live bacteria or other grease cutters or additives are prohibited.

G. Alternative grease removal devices or technologies. Alternative devices and technologies such as automatic grease removal systems shall be subject to written approval by the Water Utility prior to installation. Approval of the device shall be based on demonstrated (proven) removal efficiencies and reliability of operation. The Water Utility may approve these types of devices depending on manufacturers’ specifications on a case-by-case basis. The food service establishment may be required to furnish analytical data demonstrating that grease discharge concentrations to the wastewater collection system will not exceed the established limitation.

**Rule 08-12(03) Entry, Inspection, Sampling, and Reporting.**

A. Entry. All food service establishments shall allow Water Utility personnel, bearing proper credentials and identification, access to all parts of the premises during reasonable business hours, for the purpose of inspection, observation, and sampling in accordance with the provisions of this rule. Any user refusing the Water Utility entry to or upon the premises of the user for the purposes of inspection, sampling effluents or performing such other duties as required by this rule shall constitute a violation of the terms of this rule. The Water Utility may seek a warrant or use any other legally available procedures to discharge their duties.

B. Inspection and sampling. The Water Utility may inspect the facilities of any food service establishment, to determine compliance with this rule. Grease interceptors shall be inspected as necessary to insure compliance with specific grease interceptor requirements and to determine if proper cleaning and maintenance schedules are being performed.

The Water Utility may collect effluent samples to determine compliance. The Water Utility shall re-inspect any user that received a deficiency notice after the original inspection. In the event that the user is compliant with all of the deficiencies, there shall be no charge for the re-inspection. In the event of continuing non-compliance, successive re-inspections will be scheduled and appropriate fees shall be charged to the user for the first and all successive re-inspections. Such fees may be charged to the appropriate account of the customer's sewer bill.

C. Reporting. Owners of grease trap/interceptors shall obtain records from contractors used to remove grease waste showing the volume of grease waste shipped; the name and address of the destination; and the name and address of the contractor. Owners of grease trap/interceptors shall maintain these records for a minimum of five years and make them available to the Water Utility for inspection and copying upon request.

**Rule 08-12(04) Enforcement and Damage Assessment.**

A. Enforcement response plan. Whenever the Water Utility determines that a grease interceptor is in need of pumping, repairs or other maintenance, or in the event that an additional grease interceptor is required, the Water Utility shall proceed as prescribed below:

1. If during inspection, the Water Utility determines that a violation exists, the Water Utility shall immediately notify the owner/manager of the food service establishment that a violation exists and must be addressed promptly.

2. The Water Utility may issue the food service establishment a notice of violation (NOV) stating the nature of the violation(s). Upon issuance of a NOV:

   The Water Utility shall perform a first re-inspection after a minimum of fifteen (15) calendar days...
after issuance of the NOV, to allow sufficient time for corrective action by the food service establishment to be completed. In the event that the food service establishment is compliant with all of the deficiencies, there shall be no charge for the re-inspection. If all of the deficiencies have not been corrected, a first re-inspection fee shall be charged to the food service establishment.

A second re-inspection will be performed after a minimum of ten (10) additional calendar days have passed. In the event that the food service establishment is compliant with all of the deficiencies, there shall be no additional charge for the re-inspection. If deficiencies remain, a second re-inspection shall be charged to the food service establishment.

Additional re-inspections and fees will be assessed until the food service establishment is compliant with all of the deficiencies. If necessary, additional enforcement actions may be necessary.

Fees shall be established and, when necessary, modified by the Board.

B. Assessment of damages. When the discharge from a food service establishment causes an obstruction, damage or any other impairment to the facilities or any expense of whatever character or nature to the Water Utility, the Water Utility may charge the expenses incurred to the discharger. The expenses include services to clear the obstruction, repair the damage to the Utility's facilities or to recover any other expenses for damage(s) of any kind or nature suffered by the Water Utility. The Water Utility shall file a claim with the food service establishment or person causing the damages for any and all expenses or damages suffered by the Water Utility. If the claim is ignored or denied, the Water Utility may charge the expense to the Water Utility sewer bill, or notify the city attorney to take such measures as shall be appropriate to recover any expense or damages suffered by the Water Utility.

**Rule 08-12(05) Permit Requirements.**

A. It is unlawful for any facility to discharge effluent from a grease interceptor without authorization from the Water Utility. Authorization shall be given in the form of a Grease Interceptor Permit. Application for a permit shall be made to the Water Utility. If the Water Utility determines that the proposed discharge does not conflict with the provisions of this Chapter, or any other federal, state or local requirement or regulation, and the permit fee is paid, a permit shall be issued allowing the facility to discharge into the sanitary sewer collection system. Each grease interceptor permit shall be issued for a time not longer than three years from the date of the permit. The grease generator shall apply for permit re-issuance prior to the expiration of the grease generator's existing permit.

**Rule 08-12(06) Fees.** The Board may establish and, from time to time, modify charges, surcharges, and fees for permit application, operation, enforcement, administration, and reimbursement of costs incurred.

**Rule 08-13. Amalgam Management at Dental Offices.**

A. This rule applies to any dental office that places or removes amalgam. If work in a dental office is limited to work that does not involve placing or removing amalgam, such as orthodontics, periodontics, maxillo-facial surgery, endodontics, or prosthodontics, then this rule does not apply.

B. All dental offices shall implement best management practices for amalgam as established by the Wisconsin Dental Association.

C. Within the shortest reasonable time, but no later than four years from the effective date of this Chapter, every vacuum system where amalgam is used or removed shall include an amalgam separator that meets the criteria of the International Standards Organization for amalgam removal equipment (ISO 11143). Dental office shall install, operate and maintain the amalgam separator according to manufacturer's instructions. The amalgam separator shall have a design and capacity appropriate for the size and type of vacuum system.

D. Within one year of the adoption of this Chapter, each dental office shall submit a report that certifies the implementation of the management practices required by paragraph 08-13 B and identifies the contractors used to remove amalgam waste within the last twelve months.

E. Within two years of the adoption of this Chapter, each dental office shall provide a schedule for the installation of the amalgam separator required by paragraph 08-13 C.
F. Within three years of the adoption of this Chapter, each dental office shall provide the following information:

1. The installation date, manufacturer and model name of the amalgam separator, if the installation of the separator is completed.

2. A brief explanation of the delay, anticipated installation schedule, proposed manufacturer and model name of the amalgam separator, if the separator has not yet been installed.

G. If the dental office has provided a report according to paragraph 08-13 F, the dental office shall notify the Water Utility of the completion of the installation within five days after completion.

H. Dental offices shall obtain records for each shipment from contractors used to remove amalgam waste showing the volume or mass of amalgam waste shipped; the name and address of the destination; and the name and address of the contractor. Dental offices shall maintain these records for a minimum of five years and make them available to the Water Utility for inspection and copying upon request.

I. Dental offices shall allow the Water Utility to inspect vacuum system, amalgam separator, and amalgam waste storage areas upon request. Inspections shall occur during the normal operating schedule of the dental office.

J. If the dental office is implementing the management practices required by paragraph 08-13 B and is operating and maintaining the amalgam separator required by paragraph 08-13 C, then any numerical discharge limit for mercury established in any other section of this Chapter does not apply.

Rule 08-14. Record Retention by Dischargers. Dischargers subject to this Section shall retain and preserve, for no less than three (3) years, any records, books, documents, memoranda, reports, correspondence, and any and all summaries thereof relating to monitoring, sampling and chemical analyses made in connection with its wastewater discharge. C. Administration. This Chapter 33 shall be administered and enforced by the Director of Community Development and Inspections, or his/her designee.

33.02 FINDINGS AND PURPOSE

A. Findings. The Common Council finds that runoff from land-disturbing construction activity carries a significant amount of sediment and other pollutants to the waters of the State in the City.

B. Purpose. It is the purpose of this Chapter to further the maintenance of safe and healthful conditions; prevent and control water pollution; prevent and control soil erosion; protect spawning grounds, fish and aquatic life; control building sites, placement of structures and land uses; preserve ground cover and scenic beauty; and promote sound economic growth by minimizing the amount of sediment and other pollutants carried by runoff or discharged from land-disturbing construction activity to waters of the State in the City.

33.03 INTENT

The intent of this Chapter is to require use of best management practices to reduce the amount of sediment and other pollutants resulting from land-disturbing construction activities. Use of this Chapter will foster consistent, Statewide application of the construction site performance standards for new development and redevelopment contained in Subchapters III and IV of Chapter NR 151, Wisconsin Administrative Code.

33.04 APPLICABILITY OF CODE

3. Nonpoint discharges from silviculture activities.

4. Routine maintenance for project sites under five (5) acres of land disturbance if performed to maintain the original line and grade, hydraulic capacity or original purpose of the facility.

5. Exemptions For Municipal Road or County Highway Projects. Municipal road or County highway projects are exempt where all of the activity takes place within existing public right-of-ways.

C. Applicability to Excluded or Exempted Sites. Notwithstanding the applicability requirements in Subsection A, or the exemptions in Paragraphs B.2. through B.5., this Chapter applies to construction sites of any size that, in the opinion of the Code Official, or designee, are likely to result in runoff that exceeds the safe capacity of the existing drainage facilities or receiving body of water, that causes undue channel erosion, that increases water pollution by scouring or the transportation of particulate matter, or that endangers property or public safety.

This Chapter applies to land-disturbing construction activities on lands within the boundaries and jurisdiction of the City, as well as the extraterritorial division of land subject to an ordinance enacted pursuant to Sections 236.45(2) and (3) of the Wisconsin Statutes.

**A. BMP Design Criteria, Standards and Specifications.** All BMPs required to comply with this Chapter shall meet the design criteria, standards and specifications based on the following:

1. Design guidance and technical standards identified or developed by the Wisconsin Department of Natural Resources under Subchapter V of Chapter NR 151, Wisconsin Administrative Code.
2. Design guidance and technical standards identified in the City of Kenosha Stormwater Management Criteria as developed and revised by the Director of Public Works, or his/her designee, and on file in the City Engineer’s Office.
3. For purposes of this Chapter, average annual basis is calculated using the appropriate annual
rainfall or runoff factor, also referred to as the R Factor, or an equivalent design storm using the 90th percentile rainfall distribution developed by the Southeastern Wisconsin Regional Planning Commission, revised 2005, and approved by the Wisconsin Department of Natural Resources, with consideration given to the geographic location of the site and period of disturbance.

B. Alternate Standards. Other technical standards not identified or developed in Subsection 33.08 A. may be used provided that the methods have been approved by the Code Official.

C. Conflict Resolution of Technical Sources. The Code Official shall approve final design criteria, standards and specifications for BMP requirements in the event of conflicts between technical sources in Section 33.08 A.

33.09 PERFORMANCE STANDARDS

A. Responsibility For Implementation of Plan. The responsible party shall implement an Erosion and Sediment Control Plan, developed in Section 33.11, which incorporates the requirements of this Section.

B. Plan. A written plan shall be developed in accordance with Section 33.11 and implemented for each construction site.

C. Erosion and Other Pollutant Control Requirements. The plan required under Section 33.11 shall include the following:

1. BMPs that, by design, achieve to the maximum extent practicable, a reduction of eighty (80%) percent of the sediment load carried in runoff, on an average annual basis, as compared with no sediment or erosion controls until the construction site has undergone final stabilization. No person shall be required to exceed an eighty (80%) percent sediment reduction to meet the requirements of this Section. Erosion and sediment control BMPs may be used alone or in combination to meet the requirements of this Section. Credit toward the sediment reduction shall be given for limiting the duration or area, or both, of land-disturbing construction activity, or other appropriate mechanism.

2. Notwithstanding Paragraph C.1., if BMPs cannot be designed and implemented to reduce the sediment load by eighty (80%) percent on an average annual basis, the plan shall include a written and site-specific explanation as to why the eighty (80%) reduction goal is not attainable and the sediment load shall be reduced to the maximum extent practicable.

3. Where appropriate, the plan shall include sediment controls to do all of the following to the maximum extent practicable:
   a. Prevent tracking of sediment from the construction site onto roads and other paved surfaces.
   b. Prevent the discharge of sediment as part of site dewatering.
   c. Protect the separate storm drain inlet structure from receiving sediment.

4. The use, storage and disposal of chemicals, cement and other compounds and materials used on the construction site shall be managed during the construction period, to prevent their entrance into waters of the State. However, projects that require the placement of these materials in waters of the State, such as constructing bridge footings or BMP installations, are not prohibited by this Section.

D. Location. The BMPs used to comply with this Section shall be located prior to runoff entering waters of the State.

E. Alternate Requirements. The Code Official may establish storm water management requirements more stringent that those set forth in this Section if the Code Official determines that an added level of protection is needed for sensitive resources.
33.10 EROSION CONTROL PERMITS AND ADMINISTRATION

A. Erosion Control Permits Required. No activity shall occur and no Building Permit may be issued until an Erosion Control Permit is issued by the Code Official.

B. Permit Application. The applicant must provide the following when requesting a permit:
1. A completed application form signed by the landowner. If a landowner appoints an agent to submit an application, the landowner shall be bound by all of the requirements of this Chapter and the terms of any permit issued to the agent.
2. An Erosion Control Plan meeting all the standards of the Wisconsin Department of Natural Resources (WDNR) and the Wisconsin Department of Commerce.
3. Copies of permits or permit applications or approvals required by any other governmental entity.
4. A proposed timetable and schedule for completion and installation of all elements of approved Erosion Control Plans and a detailed schedule of completion of construction.
5. Projects of a smaller scale may be allowed relief from some permit application requirements at the discretion of the Code Official.

C. Permit Approval. The Code Official shall verify that the permit application is complete. Upon approval, the Erosion Control Permit shall be issued after the applicant has met all other requirements of this Chapter.

D. Permit Conditions.
1. Plan Implementation. The Erosion Control Plan shall be implemented prior to the start of any land-disturbing activity and shall be maintained over the duration of the project.
2. Permittee Responsibilities. The permittee is responsible for the successful completion of the Erosion Control Plan. The permittee shall be liable for all costs incurred, including environmental restoration costs, resulting from noncompliance with an approved plan.
3. Permission To Enter Property For Inspection. Application for a permit shall constitute express permission by the permittee and landowner for the Code Official to enter the property for purposes of inspection under Section 33.08 E. of this Chapter or for curative action.
4. Adjacent Public Thoroughfares To Be Cleaned. All mudtracking off-site onto adjacent public and private thoroughfares shall be cleaned up and removed by the end of each working day or at the discretion of the Code Official using proper disposal methods.
5. Approved Permit and Erosion Control Plan Kept on Project Site. A copy of the approved permit and Erosion Control Plan shall be kept on the project site, or in a place readily accessible to contractors, engineers, inspection staff and other authorized personnel.
6. One and Two Family Erosion Control Permit Requirements. The landowner shall be responsible for construction site and erosion control maintenance and grading work at the project site, and for proper restoration in compliance with this Chapter. All items listed below shall be complied with:
   a. All required drainage structures and appurtenances shall meet City specifications and approved grading and drainage plans.
   b. All required ditches, swales, berms, drainage easements and waterways located within the boundary of the referenced site or within the adjacent road right-of-way and area lying adjacent to the site shall be graded to the proper gradient and side slope, and meet the approved elevations, and shall be seeded or sodded and stabilized.
   c. The finished or final yard elevation and slope around the perimeter of any new structure, along with the entire site area, shall be final graded and finished with topsoil and seeded or sodded to the required elevations as shown on the approved Building Permit Plat of Survey as submitted at the time of Building Permit issuance. If seeded, the parkway, a ten (10) foot perimeter along any public sidewalk or right-of-way, and any drainageway, including downspout channels, shall be protected by erosion control matting or other approved method.
If a structure or project is completed between September 15 and May 1 of any given year, the site may be rough graded so as to prevent runoff, and erosion control measures are to be installed and maintained until the site can be final graded and stabilized, but in no case later than June 1 of the following year.

d. All roof drainage and sump pump discharge shall be outletted to the street yard, natural drainageway or approved storm sewer system so as not to saturate, accumulate or damage the subject property or adjacent properties.

e. Gutters and downspouts, or roof leaders and downspouts, shall be installed on all principal structures in order to direct water runoff away from the structures to the street yard, natural drainageway or approved storm sewer system.

f. The site shall be cleared of rubbish, brush and any other debris. Construction materials, other unused materials, clay or fill piles shall be removed from the site.

g. A Plat of Survey prepared by a Wisconsin registered land surveyor or Wisconsin licensed professional engineer shall be submitted showing proposed elevations as approved by the City, and actual final elevations in the following locations:

(1) At the property corners and at all corners of the structures.

(2) At twenty-five (25) foot intervals along each property line.

E. Permit Duration. Permits issued under this Section shall be valid for a period of one hundred eighty (180) days from the date of issue, or for the pendency of the Building Permit or other construction authorizations, whichever is longer.

F. Extensions of Time To Complete Work. Any applicant who obtains a permit and fails to complete the work in the time specified in Subsection 33.10 E., may apply to the Code Official for a time extension not to exceed one (1) year. Extensions may be granted if the work commenced has proceeded in a professional and workmanlike manner which exhibits reasonably progress. Extended permits shall not impose new conditions unless required by this Ordinance, or any other State or local law, rule or regulation. In the event that the Code Official denies the request for extension, such denial may be appealed to the Stormwater Utility Committee. Such appeal must be filed in the office of the City Clerk/Treasurer within thirty (30) days of the denial. There is no fee for this appeal. Upon a violation of Subsection 33.10 E., no new work may commence without the issuance of an approved extension or a new permit.

G. Cash Assurance. At the time a preliminary grading or mass grading Erosion Control Permit is issued to any project involving one (1) or more acres of land-disturbing construction activity, the landowner shall submit a payment of Five Thousand ($5,000.00) Dollars to guarantee that the conditions of the Erosion Control Permit and this Chapter are being followed as they relate to maintaining the public right-of-way and storm sewer system. The cash assurance shall be used if the City determines that the landowner or his/her contractor have not kept the right-of-ways clean from mudtracking, if there is damage to the stormwater drainage improvements, or if erosion and sediment controls are not being maintained. If the cash assurance is depleted prior to completion of the project, the landowner shall post another cash assurance in the same amount. The cash assurance shall be refunded to the landowner once the project is completed and it is determined that the property is in compliance with this Chapter.

H. Soil Stockpiles.

1. Review and Approval Required. Soil stockpiles are permitted only when reviewed and approved as part of an Erosion Control Permit for site mass grading or new building construction, or other approved land-disturbing activities.

2. Location. Soil stockpiles shall not be located in close proximity to any public street or alley, and in all cases shall be located as indicated on the approved plan. Requested changes of location shall require a revised plan and approval of the Code Official.
3. Removal. All soil stockpiles shall be removed from the site or graded to meet the approved drainage plan at the time the permit expires, or at the time a Temporary Occupancy Permit is issued to any project connected with that particular site, whichever occurs sooner.

I. Project Site Maintenance.

1. Responsibility of Landowner. It shall be the responsibility of the landowner to maintain the project site and adjoining right-of-way in conformance with the following:
   a. Free from debris, rubbish, unused building materials, scraps, etc. All such materials shall be collected in a covered dumpster or other approved container.
   b. Grass, weeds and vegetation shall not exceed a height of eight (8”) inches.

2. Failure To Comply With Order(s). In the event that the responsible party fails to comply with an order to clean the site or to cut grass, weeds or vegetation, the Code Official may have the work done, and shall recover the cost through special assessments levied against the property. A One Hundred ($100.00) Dollar Administrative Fee for processing and administering the special assessment shall be added to the special assessment against the property.

J. Inspections.

1. Implied Consent. Application for a permit shall constitute permission by the applicant and landowner for the Code Official, or his/her designee, to enter upon the property and inspect during the construction phase prior to the inspections, as may be deemed necessary to confirm compliance with the requirements of this Chapter.

2. Number of Inspections. The site of any regulated land disturbing activity shall be inspected once every thirty (30) days, or more frequently as determined by the Code Official during the construction phase.

3. Compliance Verification. Within ten (10) days after installation of all practices in an approved Erosion Control Plan and achievement of soil stabilization, the permittee shall notify the Code Official. The Code Official shall inspect the property to verify compliance with the Erosion Control Plan within ten (10) days of notification of soil stabilization.

4. Maintenance. Maintenance, as outlined in Commerce 21.125 and Commerce 60.20, Wisconsin Administrative Code, is the responsibility of the owner, and facilities are subject to inspection and orders for repair.

The City Forester shall abandon or modify said proposed work or proceed with it as he/she believes the best interest of the public requires. No prior notices by the City Forester are required for the trimming of living trees or for the removal of dead or dangerous trees. The absence of a timely notice shall not render any work performed invalid.

Notice shall be served on the owner of record of said lot identifying those conditions which constitute a public nuisance and demanding abatement by a time certain in the manner and to the extent prescribed by said notice. Service shall be in the manner provided for service of a Summons in the Circuit Court or by Certified Mail-Return Receipt. If the owner cannot be served or if there is no Certified Mail-Return Receipt, the order may be served by posting it on the main entrance of the building or structure, if any, or where no building or structure is present, by posting a sign on each side of said lot, and by publishing as a Class One (1) Notice, under Chapter 985, Wisconsin Statutes.

G. Emergency Procedure. The above specified notice procedure does not apply when circumstances arise which require immediate action to protect the public from imminent harms, such as sickness, disease or personal injury. In determining imminent harm, there must be a balancing of the rights of the landowner to notice and appeal procedures with the right of the public to be protected from a risk of harm which could be avoided by prompt action. However, where possible, the landowner should be given a minimum of twenty-four (24) hours written or oral notice prior to City abatement action. The above Ordinance shall otherwise apply, except for the notice and appeal procedures, which shall be as herein stated.

   4. Excavate or disturb the ground within the dripline of any tree without a permit.
   5. Perform any work within the dripline of any tree without taking measures as directed by the City Forester to protect the tree from injury and damage, up to and including tunneling.
   6. Remove any guard, stake or other protective device or close or obstruct any open space about the base of a tree designed to permit access of air, water or fertilizer.
   7. Perform any other act contrary to this Ordinance.
34.10 TREE PROTECTION

A. Application. This Ordinance, except as otherwise provided, shall be applicable to lots and parcels of land which are:

1. Twenty thousand (20,000) square feet or greater; or,
2. Subject to a Conditional Use Permit; or,
3. Subject to a Subdivider’s Agreement; or,
4. Zoned B-2 or IP;

and which contain a protected tree.

This Ordinance shall not apply to the construction of garages and additions to dwellings located on residential lots improved with a dwelling.

B. Prohibition. No person shall perform any act requiring a Permit in this Ordinance without first obtaining a Permit or perform any action pursuant to a Permit contrary to the terms, conditions and limitations of such permit or otherwise violate any provision of this Ordinance.

1. Permit Required. Any person, party, firm or corporation to whom this Ordinance applies, except as herein provided, shall not remove a protected tree, build or construct any building or structure upon a lot or parcel containing a protected tree, or otherwise disturb the land upon a lot or parcel containing a protected tree without first obtaining a permit hereunder. A permit is not required where a development is regulated by a Subdivider’s Agreement or Conditional Use Permit, where the Tree Protection provisions of this Ordinance are incorporated therein.

A permit shall not be required by government personnel or agencies who remove a tree in the performance of their official duties during an emergency declared by the Mayor or Common Council.

The owner of any regulated lot or parcel of land who claims an exemption from this permitting requirement for reason of there being no protected tree on said lot or parcel shall, as a condition of exemption, file an executed statement to this effect with the permitting authority.

2. Application Form And Filing. Permit application shall be made to the City Forester in the Department of Public Works upon City forms. Where an application is made for a Building Permit, the Tree Protection Permit application may be combined with the Building Permit application, and filed with the Department of Community Development and Inspections for forwarding to the City Forester. Where the lot or parcel of land contains a tree which has a diameter measured at fifty-four (54") inches from grade of three (3") inches or greater, the application shall include a tree location survey to include the following on a scale of 50:1 or larger:

a. Location, shape and dimensions of the lot or parcel, existing and proposed locations of buildings, utilities and other improvements, if any.

b. Location of all existing trees, which are subject to this Ordinance, identifying the tree diameter measured at fifty-four (54") inches from grade. Trees proposed to remain, to be transplanted, or to be removed, shall be identified as such. Groups of trees which are fifteen (15’) feet or more in distance from any land disturbing activity may be designated as a “clump” of trees, with the estimated number and average size listed. All trees shall be numbered on the plan.

c. Where existing trees are to be transplanted, the proposed relocation for such trees, together with a statement as to how such trees are to be transplanted, protected during land clearing and building construction and maintained after construction, is required.

d. A statement indicating how trees not proposed for removal or relocation are to be protected during land clearing and building construction.

e. Locations and dimensions of all setbacks and easements required by the City of Kenosha Zoning Ordinance or Subdivider’s Agreement.
f. Grade changes proposed for each lot or parcel of land and a statement showing how such changes will affect trees protected by this Ordinance.

g. Location of trees to be planted.

h. Approved landscape plan, if any is required by another Ordinance, to be attached.

The above data may be combined, as practical, into as many documents as will fulfill the requirement.

Where no protected tree is located upon the lot or parcel of land, a request for a "No Tree Verification" shall be submitted in lieu of a tree location survey.

3. **Time Of Permit Issuance.** Permit issuance shall be governed by the following time frames:

a. Where a construction activity requires a City approved landscape plan, following landscape plan approval.

b. Where a construction or land disturbing activity requires an Erosion Control Permit, following the issuance of the Permit.

c. Where a construction activity requires a Building Permit, prior to the issuance of the Permit.

4. **Permit Fee.** The Permit fee shall be as determined by the Commission from time to time and maintained by the Department of Public Works in its schedule of fees and charges. The fee shall increase five hundred (500%) percent in the event any work requiring a Permit is commenced prior to obtaining a Permit, without effect on penalties arising out of a prosecution for a violation of this Ordinance.

5. **Permit Review, Inspection and Issuance.** The Permit application shall be reviewed by the City Forester and based thereon, and following site inspection, the City Forester may reject the application for insufficient data, or as being untimely, grant or deny the Permit, or grant the Permit with conditions and/or limitations.

The Permit may authorize the removal of protected trees where the landscape plan provides for tree removal, replacement and additional tree planting with the result that there will be an overall improvement in the environmental condition and aesthetic character of the site, or where the tree(s):

a. Pose a safety hazard to pedestrian or vehicular traffic or threaten to cause disruption to public utility services;

b. Pose a safety hazard to buildings or structures;

c. Prevent access to a lot or parcel of land;

d. Unreasonably prevents development of a lot or parcel of land or the physical use thereof, provided the applicant has not failed to design and locate the proposed improvements to minimize the removal of trees;

e. If diseased or weakened by age, storm, fire or other cause, so as to pose a danger to persons, property, improvements or other trees;

6. **Permit Conditions.** Any Permit issued for a site containing a protected tree shall include the following conditions:

a. Prior to and during the construction or land disturbance, the owner, developer or agent thereof shall clearly mark (with red flagging) all trees proposed to be removed and shall erect barricades around all trees to be protected. The barricades shall remain in place and in good condition throughout the construction and land disturbance activity. Removal of other vegetation within any tree protection zone identified on the Permit, shall be accomplished by mowing or hand clearing only. If improvements are to be located within the tree protection zone, clearing by machinery will be allowed, but only in the area and to the extent necessary to install the improvements.

b. Unless otherwise approved by the City Forester, required tree protective barricades shall be installed no closer than ten (10’) feet from the trunk or at the outer edge of the dripline, whichever is greater, to shield all trees or groups of trees to be protected. The barricades shall be constructed in a post
and rail configuration. The upright posts shall be a minimum of a two (2") inch by two (2") inch wooden stake, six (6') feet in length. Connecting the upright posts shall be a minimum of a single one (1") inch by four (4") inch rail. The maximum distance allowed between upright posts is eight (8') feet. "Do Not Enter" signs shall be posted on all barricades.

c. Large property areas containing protected trees and separated from construction or land clearing areas, road rights-of-ways, lakes and utility easements may be barricaded off, in lieu of erecting barriers, as required by §§a. and b., by placing stakes a maximum of twenty-five (25') feet apart and connecting the stakes with two (2) lines of red colored ribbon from stake to stake and posting "Do Not Enter" signs along the outside perimeters of such areas at regular intervals.

d. Silt barriers, hay bales or similarly effective erosion control barriers shall be required in any area where erosion or siltation may cause damage to protected trees.

e. There shall be no movement, cleaning or storage of equipment within a designated tree protection zone. The owner, developer or agent shall not permit the placement of construction material, debris, or fill; nor cause or permit disposal of waste materials such as paints, oils, solvents, asphalt, concrete, mortar or any other harmful material within the dripline of any protected tree.

f. Where elevation changes are proposed within a designated tree protection zone, the applicant shall be required to design and submit drawings of appropriate root protection devices; i.e., drain tiles, retaining walls, etc., for approval. These root protection devices shall be in place prior to the deposit of fill, or excavation of soil from the protected zone.

g. No damaging attachment, wires, signs or permits may be fastened to any tree protected by this Ordinance.

h. Pruning trees for construction clearance shall be minimal to provide for passage of equipment and personnel, as well as to accommodate buildings and structures. Oaks and elms shall not be pruned from May through the end of August during the Permit term.

i. Trenching is prohibited for any reason, including utility installation within the dripline of protected trees during construction or thereafter. Tunnelling to a minimum depth of thirty (30") inches below existing tree grade within the dripline is permitted.

7. Tree Replacement And Planting Standards. As a condition of the granting of permission to remove a tree, the applicant shall be required to relocate the tree(s) being removed or replace the tree(s). The replacement(s) shall have at least equal shade potential and other approved characteristics comparable to those of the tree removed. Replacement shall be diameter inch for diameter inch removed, i.e., eighteen (18") inch diameter = six (6) trees @ three (3") inches diameter. Alternatives, with respect to size, number and species may be considered but must have written approval of the City Forester before implementation.

A minimum of one (1) replacement tree shall be required for each two thousand (2,000) square feet of lot or parcel of land not improved by a building or structure for which a Tree Permit has been issued. Any tree(s) left in good growing condition on the site shall be counted toward the minimum requirement. Replacement trees shall have a single stem, with a single terminal leader, specimen grade and conform to the American Standard for Nursery Stock Standards, published by the American Association of Nurserymen, Inc.. All replacement trees shall be a minimum of eight (8') feet in height, when planted, and have a diameter of at least two (2") inches, measured six (6") inches above grade. Trees shall be planted in accordance with the most recent Edition of the International Society of Arboriculture Standards.

Where a tree(s) is(are) to be removed under the provision of this Ordinance, the City Forester shall have the option, with owner's permission, to relocate the tree(s) not being relocated within property to another property, at the City's expense. The relocation shall be accomplished within fifteen (15) working days of the issuance of a Permit or other suitable schedule as agreed to by the City Forester and applicant.

Trees planted in compliance with an approved landscape plan required under another Ordinance may
be used to help satisfy the requirements of this Section. However, there may be different requirements in
regard to species, sizes, and locations. It is the applicants responsibility to consult with the City Forester to
resolve any potential conflicts, prior to the installation of replacement trees.

Trees required to be planted in accordance with this Section shall be in place and established prior to
the issuance of a Certificate of Occupancy. No tree shall be located closer than five (5') feet to any
property line or underground utility line. Replacement trees shall not be planted underneath or near
overhead utility lines, unless they are a species which will attain a height that would not interfere with such
lines. The planting site must have sufficient root zone and canopy space to reasonably allow the tree(s) to
grow to a mature size.

Replacement tree(s) shall be planted either bareroot or balled and burlapped. A minimum of one (1)
stake, set below the bottom of the planting pit, shall be used for bareroot trees. Only a webbing material
with a width greater that one (1") inch may be used to hold the tree(s) attached to the stake by itself or with
wire. Planting pits shall be as deep or slightly less than the depth of the root ball, so that the root collar
remains at grade or slightly higher. Planting pits may be as wide as possible within the upper eighteen
(18") inches of the surface. All trees shall receive mulch, composed of approved materials, at a minimum
depth of three (3") inches and a minimum width of three (3') feet from the stem for trees two (2") in
diameter, six (6") inches above grade, and one (1') foot wider for each additional tree-inch diameter
increase, i.e., three (3") tree = mulch four (4') feet wide from the stem, or as approved by the City Forester.

8. Periodic Inspections. The City Forester shall conduct periodic inspections of the site during land
disturbance and construction, in order to ensure compliance with this Ordinance.

9. Tree Survival. The property owner shall be responsible for the maintenance and survival of trees
protected on site and planted pursuant to this Ordinance. All trees relocated or replaced in accordance
with the terms of this Ordinance shall be replaced should the trees expire anytime within two (2) years after
City approval of site planting.

34.11 ENFORCEMENT

This Chapter shall be enforced by the City Forester and designees thereof.

Any City Department which observes a violation of this Chapter shall bring said violations to the
attention of the City Forester.

34.12 ADMINISTRATIVE REMEDIES

Until the provisions of this Chapter, including the conditions on any Permits issued thereunder, have
been fully met, the City shall withhold issuance of any Land Use Permit, Building Permit, Certificate of
Occupancy or inspection required under the current City Building Code or issue stop orders for any land
development involving tree removal.

34.13 APPEALS

Any person aggrieved by the administration or interpretation of any of the terms or provisions of this
Chapter, who is not in violation of this Ordinance, may appeal to the Commission within fifteen (15) days of
receiving notice of such administration or interpretation, which, after a hearing, with notice to the
appellant, may reverse, affirm or modify, in whole or in part, the order, requirement, decision or
determination of the City Forester, and to that end shall have all the powers of the City Forester. The
notice of appeal shall be filed with the Department of Public Works.
34.135 SPECIAL CHARGES

The City may specially charge any property for work performed by or at the direction of the City, where any work is done on such property or in the lawn park area abutting such property to secure compliance with this Ordinance, under circumstances where the property owner has been notified of the work to be performed and has failed to timely perform the work. The special charge shall include a Seventy-five ($75.00) Dollar administrative fee.

34.14 PENALTY

Any person who by himself/herself or by his/her agent or employee, shall violate any of the provisions of this Chapter, shall, upon conviction, pay a forfeiture of not less than Twenty-five ($25.00) Dollars and not more than One Thousand ($1,000.00) Dollars, and in default of payment thereof, be imprisoned in the County Jail for a period not to exceed ninety (90) days. A separate offense shall be deemed to have been committed on every day on which a violation occurs or continues.
35.01 PURPOSE

The purpose of this Chapter is to impose Impact Fees in accordance with Section 66.0617, Wisconsin Statutes, as a condition of an approval granted for the development of land, to be expended as capital costs by the City in the provision of public facilities required to meet the demands for public services by the new development. The requirements of this Chapter are in addition to the requirements of Chapter 17, entitled "Regulating the Division and Platting of Land", and other applicable ordinances.

35.02 DEFINITIONS

In this Chapter:

A. "Capital Costs" means the capital costs to construct, expand or improve public facilities, including the cost of land, and including legal, engineering and design costs to construct, expand or improve public facilities, except that not more than ten (10%) percent of capital costs may consist of legal, engineering and design costs unless the City demonstrates that its legal, engineering and design costs which relate directly to the public improvement for which the Impact Fees were imposed exceed ten (10%) percent of capital costs. "Capital costs" does not include other noncapital costs to construct, expand or improve public facilities, vehicles or the costs of equipment to construct, expand or improve public facilities.

B. "City" shall mean the City of Kenosha, Wisconsin.

C. "Developer" means a person, party, firm, corporation or other legal entity that constructs or creates a land development.

D. "Development" means the real property which is the subject of land development.

E. "Impact Fees" means cash contributions, contributions of land or interests in land or any other items of value that are imposed on a developer by the City under this Chapter.

F. "Land Development" means the construction or modification of improvements to real property that creates additional residential dwelling units within the City or that results in nonresidential uses that create a need for new, expanded or improved public facilities within the City.

G. "Public Facilities" means highways, as defined in Section 340.01(22), Wisconsin Statutes, and other transportation facilities, traffic control devices, facilities for collecting and treating sewage, facilities for collecting and treating storm and surface waters, facilities for pumping, storing and distributing water, parks, playgrounds, land for athletic fields, solid waste and recycling facilities, fire protection facilities, law enforcement facilities, emergency medical facilities and libraries. "Public facilities" does not include facilities owned by a school district. With regard to Impact Fees that were first imposed before June 14, 2006, "Public Facilities" includes other recreational facilities that were substantially completed by June 14, 2006.

H. "Service Area" means a geographic area delineated by the City within which there are public facilities relative to a certain number of persons, parcels of land or other appropriate measure, as specified by the City.
35.03 PUBLIC FACILITIES NEED ASSESSMENT

This Chapter is based upon a Public Facilities Need Assessment which is on file in the office of the City Clerk and available for inspection and/or copying in accordance with the State Public Records and Property Law, Subchapter II of Chapter 19, Wisconsin Statutes.

The Public Facilities Need Assessment includes:
A. An inventory of existing Public Facilities, including an identification of any existing deficiencies in the quantity or quality of those Public Facilities for which an Impact Fee is imposed.

B. An identification of the new Public Facilities, or improvements or expansions of existing Public Facilities, that will be required because of Land Development for which an Impact Fee is imposed. This identification is based on explicitly identified Service Areas and service standards.

C. A detailed estimate of the Capital Costs of providing the new Public Facilities or the improvements or expansions in existing Public Facilities, including an estimate of the effect of recovering these Capital Costs through Impact Fees on the availability of affordable housing within the City.

35.04 FINDING OF REASONABLENESS AND STATUTORY COMPLIANCE

Impact Fees imposed by this Chapter are found by the Common Council of City to be reasonable and in compliance with Section 66.0617, Wisconsin Statutes in that they:

A. Bear a rational relationship to the need for new, expanded or improved Public Facilities that are required to serve Land Development.

B. Do not exceed the proportionate share of the Capital Costs that are required to serve Land Development, as compared to existing uses of land within City.

C. Are based upon actual Capital Costs or reasonable estimates of Capital Costs for new, expanded or improved Public Facilities.

D. Do not include amounts necessary to address existing deficiencies in Public Facilities.

E. Do not prohibit or deter the construction of affordable housing within the City.

35.05 IMPACT FEE REDUCTION

A. Impact Fees imposed by this Chapter shall be reduced to the extent necessary:

1. To compensate for other Capital Costs imposed by City with respect to Land Development to provide or pay for Public Facilities, including special assessments, special charges, land dedications or fees in lieu of land dedications under Chapter 236, Wisconsin Statutes, or any other items of value.

2. To compensate for moneys received from the Federal or State government specifically to provide or pay for the Public Facilities for which the Impact Fees are imposed.

B. The Board of Park Commissioners may, in its discretion, provide for an exemption from, or a reduction in the amount of Park/Open Space Impact Fees imposed on a Developer that provides low-cost housing in accordance with guidelines established by the Department of Community Development and Inspections, except that no amount of an Impact Fee for which an exemption or reduction is provided under this Section may be shifted to any other development in the Land Development in which the low-cost housing is located or to any other Land Development in the City.

D. With regard to Park/Open Space Impact Fees collected after April 10, 2006, but more than seven (7) years after the effective date of the Ordinance enacting Park/Open Space Impact Fees, fifteen (15) years after the date on which the fee was collected. Said fifteen (15) year period of time is found to be reasonable by the Common Council of the City in view of the appropriate planning and financing periods for the particular types of facilities for which said Impact Fees are imposed.

**A Park/Open Space Impact Fee** to acquire real property for parks or open space and for the development and improvement of such real property. The real property acquired, developed or improved may be in the nature of a neighborhood park/open space directly serving the development, or in the nature of a park/open space which benefit Development and entire City, such as, but not limited to, golf courses, swimming pools, fishing facilities, athletic fields and environmental corridors. The costs of equipment not physically attached to real property, and the costs of operation are ineligible costs.

The fee shall be as follows:

The City Clerk/Treasurer, or designee, shall calculate the adjusted fees and maintain a copy of the calculation and
the adjusted Impact Fees in the office of the City Clerk/Treasurer.

35.11 APPEAL

A. A Developer upon whom a Park/Open Space Impact Fee is imposed shall have the right to contest the amount, collection or use of said Impact Fee by filing a written Notice of Appeal with the City Clerk/Treasurer within thirty (30) days following the imposition of the Park/Open Space Impact Fee. Upon the filing of a timely appeal, the appeal shall be reviewed by the City Finance Committee, who shall provide the Developer with notice and an opportunity to be heard and then make a recommendation to the Common Council of City. The Common Council of City shall make a determination on timely appeals within ninety (90) days of the date of the filing of the Notice of Appeal. The Common Council of City may affirm, negate, or modify the Park/Open Space Impact Fee.

Upon the filing of a timely appeal, the Board of Water Commissioners shall provide the Developer with notice of an opportunity to be heard. The Board of Water Commissioners shall make a determination on timely appeals within ninety (90) days of the date of the filing of the Notice of Appeal. The Board of Water Commissioners may affirm, negate, or modify the Sewer Impact Fee.
36.01 AUTHORITY

A. Statutory Authority. This Ordinance is adopted by the Common Council of the City of Kenosha, Wisconsin, pursuant to Section 62.234 of the Wisconsin Statutes. Except as otherwise specified in Section 62.234, Wisconsin Statutes, Section 62.23 of the Wisconsin Statutes, applies to this Chapter and to any amendments to this Ordinance.

B. Nonlimitation. The provisions of this Chapter are deemed not to limit any other lawful regulatory powers of the City of Kenosha.

C. More Stringent Standards. The requirements of this Chapter do not preempt more stringent stormwater management requirements that may be imposed by any of the following:
   1. Wisconsin Department of Natural Resources administrative rules, permits or approvals, including those authorized under Sections 281.16 and 283.33 of the Wisconsin Statutes.
   2. Targeted non-agricultural performance standards promulgated in rules by the Wisconsin Department of Natural Resources under Section NR 151.004, Wisconsin Administrative Code.

D. Responsibility For Enforcement. The Common Council hereby designates the Director of Public Works, or his/her designee, shall administer and enforce the provisions of this Chapter.

36.02 FINDINGS AND PURPOSE

A. Findings. The Common Council finds that uncontrolled, post-construction runoff has a significant impact upon water resources and the health, safety and general welfare of the community, and diminishes the public enjoyment and use of natural resources. Specifically, uncontrolled post-construction runoff can:
   1. Degrade physical stream habitat by increasing stream bank erosion, increasing streambed scour, diminishing groundwater recharge, diminishing stream base flows and increasing stream temperature.
   2. Diminish the capacity of lakes and streams to support fish, aquatic life, recreation and water supply uses by increasing pollutant loading of sediment, suspended solids, nutrients, heavy metals, bacteria, pathogens and other urban pollutants.
   3. Alter wetland communities by changing wetland hydrology and by increasing pollutant loads.
   4. Reduce the quality of groundwater by increasing pollutant loading.
   5. Threaten public health, safety, property and general welfare by overtaxing storm sewers, drainageways and other minor drainage facilities.
   6. Threaten public health, safety, property and general welfare by increasing major flood peaks and volumes.
   7. Undermine floodplain management efforts by increasing the incidence and levels of flooding.

B. Purpose. It is the purpose of this Chapter to establish long term, post-construction runoff management requirements that will diminish the threats to public health, safety, welfare and aquatic environment. Specific purposes are to:
   1. Further the maintenance of safe and healthful conditions.
   2. Prevent and control the adverse effects of stormwater; prevent and control soil erosion; prevent and control water pollution; protect spawning grounds, fish and aquatic life; control building sites,
placement of structures and land uses; preserve ground cover and scenic beauty; and promote sound economic growth.

3. Control exceedance of the safe capacity of existing drainage facilities and receiving water bodies; prevent undue channel erosion; control increases in the scouring and transportation of particulate matter; and prevent conditions that endanger downstream property.

36.03 INTENT

It is the intent of the Common Council that this Chapter will reduce post-construction stormwater discharges and associated pollutants reaching waters of the State. This Chapter may be applied on a site-by-site basis. The Common Council recognizes, however, that the preferred method of achieving the stormwater performance standards set forth in this Chapter is through the preparation and implementation of comprehensive, systems-level stormwater management plans that cover hydrologic units, such as watersheds, on a municipal and regional scale. Such plans may prescribe regional stormwater devices, practices or systems, any of which may be designed to treat runoff from more than one site prior to discharge to waters of the State. Where such plans are in conformance with the performance standards developed under Section 281.16 of the Wisconsin Statutes, for regional stormwater management measures and have been approved by the Common Council, it is the intent of this Chapter that the approved plan be used to identify post-construction management measures acceptable for the community.

36.04 APPLICABILITY OF CODE

A. Application. This Chapter applies after final stabilization to a site of land-disturbing construction activity on a post-construction site that was subject to one (1) or more acres of land-disturbing construction activity. This Chapter also applies to post-construction sites of any size that, in the opinion of the Director of Public Works, or designee, are likely to result in runoff that exceeds the safe capacity of the existing drainage facilities or receiving body of water, that causes undue channel erosion, that increases water pollution by scouring or the transportation of particulate matter, or that endangers property or public safety.

B. Exemption. Subsection 36.04 A. notwithstanding, a site that meets any of the following criteria is exempt from the requirements of this Chapter:

1. Nonpoint discharges from agricultural facilities and practices.
2. Nonpoint discharges from silviculture activities.
3. Routine maintenance for project sites under five (5) acres of land disturbance if performed to maintain the original line and grade, hydraulic capacity or original purpose of the facility.
4. Underground utility construction, such as water, sewer and fiber optic lines. This exemption does not apply to the construction of any aboveground structures associated with utility construction.
5. Activities conducted by a State agency, as defined under Section 277.02(1) of the Wisconsin Statutes, but also including the office of District Attorney, which is subject to the State plan promulgated or a memorandum of understanding entered into under Section 281.33 of the Wisconsin Statutes.

2. Design guidance and technical standard identified in the City of Kenosha Stormwater Management Criteria as developed and revised by the Director of Public Works, or his/her designee, and on file in the office of the City Engineer.

3. In this Chapter, the following year and location have been selected as average annual rainfall: Milwaukee, 1969 (March 28 - December 6).
B. Where technical standards have not been identified or developed in Section 36.06 A., other technical standards may be used provided that the methods have been approved by the Director of Public Works or his/her designee.

C. The Director of Public Works, or his/her designee, shall approve final design criteria, standards and specifications for BMP requirements in the event of conflicts between technical sources in Section 36.06 A.

36.07 PERFORMANCE STANDARDS

A. Responsible Party. The Responsible Party shall implement a Post-Construction Stormwater Management Plan that incorporates the requirements of this Section.

B. Plan. A written Stormwater Management Plan in accordance with Section 36.09 shall be developed and implemented for each post-construction site.

C. Requirements. The plan required under Subsection 36.07 B. shall include the following:

1. Total Suspended Solids. BMPs shall be designed, installed and maintained to control total suspended solids carried in runoff from the post-construction site as follows:
   a. New and Infill Development. For new and infill development, by design, reduce to the maximum extent practicable, the total suspended solids load by eighty (80%) percent, based on the average annual rainfall, as compared to no runoff management controls. No person shall be required to exceed an eighty (80%) percent total suspended solids reduction to meet the requirements of this subdivision.
   b. Redevelopment. For redevelopment, by design, reduce to the maximum extent practicable, the total suspended solids load by forty (40%) percent, based on the average annual rainfall, as compared to no runoff management controls. No person shall be required to exceed a forty (40%) percent total suspended solids reduction to meet the requirements of this subsection.
   c. Reduction of Total Suspended Solids Load. Notwithstanding Subsections a. and b., if the design cannot achieve the applicable total suspended solids reduction specified, the Stormwater Management Plan shall include a written and site-specific explanation why that level of reduction is not attained and the total suspended solids load shall be reduced to the maximum extent practicable.

2. Peak Discharge.
   a. By design, BMPs shall be employed to maintain or reduce the peak runoff discharge rates as compared to pre-development conditions of the two (2) year, twenty-four (24) hour design storm applicable to the post-construction site. For pre-development conditions, the runoff curve numbers in Table 1 shall be used.

   \[\begin{array}{|c|c|c|c|c|}
   \hline
   \text{Hydro-logic} & \text{A} & \text{B} & \text{C} & \text{D} \\
   \text{Soil Group} & \text{Runoff Curve} & 56 & 70 & 71 & 71 \\
   \text{Number} & \hline
   \end{array}\]

   b. By design, BMP’s shall be designed and employed to reduce the peak discharge rates of the post-construction conditions for any storm, in areas where there is inadequate storm sewer or drainageway capacity. The control of peak discharge shall be required for all areas draining to navigable streams or to storm sewer systems that do not have at least capacity for the five (5) year rational method storm. Any
site with inadequate capacity downstream shall have the peak discharge reduced to a proportional share of the available downstream capacity based on the ratio of the development's area to the total drainage area. The available downstream capacity shall be set by the capacity of storm sewer pipes when flowing full, the overflow level for ditches and the top of the upstream end of the pipe for any culverts. None of these criteria shall preempt more stringent release rates.

3. Infiltration. BMPs shall be designed, installed, and maintained to infiltrate runoff to the maximum extent practicable in accordance with the following, except as provided in Subparagraphs e. through h.

a. Residential Developments. For residential developments, one of the following shall be met:

(1) Infiltrate sufficient runoff volume so that the post-development infiltration volume shall be at least ninety (90%) percent of the pre-development infiltration volume, based on an average annual rainfall. However, when designing appropriate infiltration systems to meet this requirement, no more than one (1%) percent of the project site is required as an effective infiltration area.

(2) Infiltrate twenty-five (25%) percent of the post-development runoff from the 2 year, twenty-four (24) hour design storm with a Type II Distribution. Separate curve numbers for pervious and impervious surfaces shall be used to calculate runoff volumes and not composite curve numbers as defined in TR-55. When designing appropriate infiltration systems to meet this requirement, no more than one (1%) percent of the project site is required as an effective infiltration area.

b. Non-Residential Development. For nonresidential development, including commercial, industrial and institutional development, one of the following shall be met:

(1) Infiltrate sufficient runoff volume so that the post-development infiltration volume shall be at least sixty (60%) percent of the pre-development infiltration volume, based on an average annual rainfall. When designing appropriate infiltration systems to meet this requirement, no more than two (2%) percent of the project site is required as an effective infiltration area.

(2) Infiltrate ten (10%) percent of the runoff from the 2 year, twenty-four (24) hour design storm with a Type-II Distribution. Separate curve numbers for pervious and impervious surfaces shall be used to calculate runoff volumes, and not composite curve numbers as defined in TR-55. When designing appropriate infiltration systems to meet this requirement, no more than two (2%) percent of the project site is required as an effective infiltration area.

c. Pretreatment. Before infiltrating runoff, pretreatment shall be required for parking lot runoff and for runoff from new road construction in commercial, industrial and institutional areas that will enter an infiltration system. The pretreatment shall be designed to protect the infiltration system from clogging prior to scheduled maintenance and to protect groundwater quality in accordance with Subparagraph h. Pretreatment options may include, but are not limited to, oil/grease separation, sedimentation, biofiltration, filtration, swales or filter strips.

d. Exclusions. The runoff from the following areas are prohibited from meeting the requirements of this Section:

(1) Areas associated with Tier 1 Industrial Facilities identified in Section NR 216.21(2)(a), Wisconsin Administrative Code, including storage, loading, rooftop and parking.

(2) Storage and loading areas of Tier 2 Industrial Facilities identified in Section NR 216.21(2)(b), Wisconsin Administrative Code.

(4) Areas within one thousand (1,000') feet upgradient, or within one hundred (100') feet downgradient of Karst features.

(5) Areas with less than three (3') feet separation distance from the bottom of the infiltration system to the elevation of seasonal high groundwater or the top of bedrock, except this subsection does not prohibit infiltration of roof runoff.

(6) Areas with runoff from industrial, commercial and institutional parking lots and roads and residential arterial roads with less than five (5') feet separation distance from the bottom of the infiltration system to the elevation of seasonal high groundwater or the top of bedrock.

(7) Areas within four hundred (400') feet of a community water system well as specified in Section XXXVI - 8
Areas where contaminants of concern, as defined in Section NR 720.03(2), Wisconsin Administrative Code, are present in the soil through which infiltration will occur.

Any area where the soil does not exhibit one of the following soil characteristics between the bottom of the infiltration system and the seasonal high groundwater and top of bedrock: at least a three (3) foot soil layer with twenty (20%) percent fines or greater; or at least a five (5) foot soil layer with ten (10%) percent fines or greater. This does not apply where the soil medium within the infiltration system provides an equivalent level of protection. This Subsection does not prohibit infiltration of roof runoff.

e. Exemptions. The following are not required to meet the requirements of this Section:

(1) Areas where the infiltration rate of the soil is less than 0.6 inches/hour measured at the site.

(2) Parking areas and access roads less than five thousand (5,000) square feet for commercial and industrial development.

(4) In-fill development areas less than five (5) acres.

(5) Infiltration areas during periods when the soil on the site is frozen.

(6) Roads in commercial, industrial and institutional land uses, and arterial residential roads.

g. Compliance with Preventive Action Limit.

(1) Infiltration systems designed in accordance with this Section shall, to the extent technically and economically feasible, minimize the level of pollutants infiltrating to groundwater and shall maintain compliance with the preventive action limit at a point of standards application in accordance with Chapter NR 140, Wisconsin Administrative Code. If site-specific information indicates that compliance with a preventive action limit is not achievable, the infiltration BMP may not be installed or shall be modified to prevent infiltration to the maximum extent practicable.

(2) Notwithstanding Subsection (1) above, the discharge from BMPs shall remain below the enforcement standard at the point of standards application.

i. Design of Infiltration BMPs. Design of infiltration BMPs shall comply with the technical standards developed by the Wisconsin Department of Natural Resources under Subchapter V of Section NR 151, Wisconsin Administrative Code.

j. Evaluation of Infiltration BMP Performance. The performance of infiltration BMPs shall be evaluated using the WinSLAMM, Version 9.2.5. computer model available from the Wisconsin Department of Natural Resources.

4. Protective Areas.

a. Post-Construction Sites. This Paragraph 36.07 C.4. applies to post-construction sites located within a protective area, except those areas exempted pursuant to Subparagraph c. "Protective Area" does not include any area of land adjacent to any stream enclosed within a pipe or culvert, such that runoff cannot enter the enclosure at this location.

b. Requirements. The following requirements shall be met:

(1) Impervious surfaces shall be kept out of the protective area to the maximum extent practicable. The Stormwater Management Plan shall contain a written site-specific explanation for any parts of the protective area that are disturbed during construction.

(2) Where land-disturbing construction activity occurs within a protective area, and where no impervious surface is present, adequate sod or self-sustaining vegetative cover of seventy (70%) percent or greater shall be established and maintained. The adequate sod or self-sustaining vegetative cover shall be sufficient to provide for bank stability, maintenance of fish habitat and filtering of pollutants from upslope overland flow areas under sheet flow conditions. Non-vegetative materials, such as rock riprap, may be employed on the bank as necessary to prevent erosion, such as on steep slopes or where high
velocity flows occur.

(3) Best management practices, such as filter strips, swales or wet detention basins, that are designed to control pollutants from non-point sources may be located in the protective area.

c. Nonapplicable Areas. This Paragraph does not apply to:

(1) Structures that cross or access surface waters, such as boat landings, bridges and culverts.

(2) Structures constructed in accordance with Section 59.692(1v) of the Wisconsin Statutes.

(3) Post-construction sites from which runoff does not enter the surface water, except to the extent that vegetative groundcover is necessary to maintain bank stability.

5. Fueling and Vehicle Maintenance Areas. Fueling and vehicle maintenance areas shall, to the maximum extent practicable, have BMPs designed, installed and maintained to reduce petroleum within runoff, such that the runoff that enters waters of the State contains no visible petroleum sheen.

6. Swale Treatment For Transportation Facilities.

a. Applicability. Except as provided in Subparagraph b., transportation facilities that use swales for runoff conveyance and pollutant removal meet all of the requirements of this Section, if the swales are designed to the maximum extent practicable to do all of the following:

(1) Be Vegetated. Where appropriate, however, nonvegetative measures may be employed to prevent erosion or provide for runoff treatment, such as rock riprap stabilization or check dams.

(2) Carry runoff through a swale for two hundred (200') feet or more in length that is designed with a flow velocity no greater than 1.5 feet per second for the peak flow generated using either a two (2) year, twenty-four (24) hour design storm or a two (2) year storm with a duration equal to the time of concentration as appropriate. If a swale of two hundred (200') feet in length cannot be designed with a flow velocity of 1.5 feet per second or less, then the flow velocity shall be reduced to the maximum extent practicable.

b. Exemptions. The Director of Public Works, or his/her designee, may, consistent with water quality standards, require other provisions of this Section be met on a transportation facility with an average daily travel of vehicles greater than two thousand five hundred (2,500) and where the initial surface water of the State that the runoff directly enters is any of the following:

(1) An outstanding resource water.

(2) An exceptional resource water.

(3) Waters listed in Section 303(d) of the Federal Clean Water Act that are identified as impaired in whole or in part, due to non-point source impacts.

(4) Waters where targeted performance standards are developed under Section NR 151.004, Wisconsin Administrative Code, to meet water quality standards.

D. General Considerations For On-Site and Off-Site Storm Water Management Measures. The following considerations shall be observed in managing runoff:

1. Natural Topography and Land Cover Features. Natural topography and land cover features such as natural swales, natural depressions, native soil infiltrating capacity, and natural groundwater recharge areas shall be preserved and used, to the extent possible, to meet the requirements of this Section.

2. Emergency Overland Flow. Emergency overland flow for all Stormwater Management Facilities shall be provided to prevent exceeding the safe capacity of downstream drainage facilities and prevent endangerment of downstream property or public safety. Emergency overland flow must be in compliance with the Kenosha Stormwater Management Criteria.

E. Location and Regional Treatment Option.

1. On-Site/Off-Site Locations. The BMPs may be located on-site or off-site as part of a regional stormwater device, practice or system.

2. Post-Construction Runoff. Post-construction runoff within a non-navigable surface water that flows into a BMP, such as a wet detention pond, is not required to meet the performance standards of this
Chapter. Post-construction BMPs may be located in non-navigable surface waters.

3. **New Development Post-Construction Runoff.** Except as allowed under Subparagraph 4., post-construction runoff from new development shall meet the post-construction performance standards prior to entering navigable surface water.

4. **Exceptions.** Post-construction runoff from any development within navigable surface water that flows into a BMP is not required to meet the performance standards of this Chapter if:
   a. The BMP was constructed prior to the effective date of this Chapter and the BMP either received a permit issued under Chapter 30 of the Wisconsin Statutes, or the BMP did not require a Chapter 30 of the Wisconsin Statutes, permit; and,
   b. The BMP is designed to provide runoff treatment from future upland development.

5. **Runoff From Existing Development, Redevelopment and In-Fill Areas.** Runoff from existing development, redevelopment and in-fill areas shall meet the post-construction performance standards in accordance with this Section.
   a. To the maximum extent practicable, BMPs shall be located to treat runoff prior to discharge to navigable surface waters.
   b. Post-construction BMPs for such runoff may be located in navigable surface water if allowable under all other applicable Federal, State and local regulations, such as Section NR 10, Wisconsin Administrative Code and Chapter 30 of the Wisconsin Statutes.

6. **Runoff From a BMP.** The discharge of runoff from a BMP, such as a wet detention pond, or after a series of such BMPs is subject to this Chapter.

7. **Off-Site Management Measure Approval.** The Director of Public Works, or his/her designee, may approve off-site management measures provided that all of the following conditions are met:
   a. The Director of Public Works, or his/her designee, has determined that the post-construction runoff is covered by a Stormwater Management System Plan that contains management requirements consistent with the purpose and intent of this Chapter.
   b. The off-site facility meets all of the following conditions:
      (1) The facility is in place.
      (2) The facility is designed and adequately sized to provide a level of stormwater control equal to or greater than that which would be afforded by on-site practices meeting the performance standards of this Chapter.
      (3) The facility has legally obligated entity responsible for its long term operation and maintenance.

8. **Fee For Post-Construction Runoff.** Where a regional treatment option exists such that the Director of Public Works, or his/her designee, exempts the applicant from all or part of the minimum on-site stormwater management requirements, the applicant shall be required to pay a fee in an amount determined in negotiation with the Director of Public Works, or his/her designee. In determining the fee for post-construction runoff, the Director of Public Works, or his/her designee, shall consider an equitable distribution of the cost for land, engineering design, construction, and maintenance of the regional treatment option.

F. **Additional Requirements to Protect Sensitive Resources.** The Director of Public Works, or his/her designee, may establish stormwater management requirements more stringent than those set forth in this Section if the Director of Public Works, or his/her designee, determines that an added level of protection is needed to protect sensitive resources.

9. The responsible party shall permit property access to the Director of Public Works, or his/her designee, for the purpose of inspecting the property for compliance with the approved Stormwater Management Plan and this permit.

10. Where site development or redevelopment involves changes in direction, increases in peak rate and/or total volume of runoff from a site, the Director of Public Works, or his/her designee, may require the responsible party to make appropriate legal arrangements with affected property owners concerning the prevention of endangerment to property or public safety.

11. The responsible party is subject to the enforcement actions and penalties detailed in Section 36.13, if the responsible party fails to comply with the terms of this permit.

E. Permit Conditions. Permits issued under this Section may include conditions established by the Director of Public Works, or his/her designee, in addition to the requirements needed to meet the performance standards in Section 36.07, or a financial guarantee as provided for in Section 36.11.

3. To establish methods to comply with requirements of the National Pollutant Discharge Elimination System (NPDES) permit process;
4. To protect spawning grounds, and fish and aquatic life;
5. To preserve scenic beauty;
6. To promote sound economic growth by minimizing the amount of pollutants illicitly discharged to waters of the State in the City of Kenosha; and,

D. Violation. A person is considered to be in violation of this Ordinance if the person connects a line conveying sewage to the MS4, or allows such a connection to continue.

37.07 SUSPENSION OF ILLICIT DISCHARGES

A. Suspension of MS4 Discharge Access. The City may, without prior notice, suspend MS4
discharge access to a person when such suspension is necessary to stop an actual or threatened discharge that presents or may present imminent and substantial danger to the environment, to the health or welfare of persons, to the MS4, or to waters of the State. If the violator fails to comply with a suspension order issued in an emergency, the City may take such steps as deemed necessary to prevent or minimize damage to the MS4 or waters of the State, or to minimize danger to persons.

B. Termination of MS4 Discharge Access. Any person discharging to the MS4 in violation of this Ordinance may have their MS4 access terminated if such termination would abate or reduce an illicit discharge. The Director of Public Works will notify a violator of the proposed termination of its MS4 access. The violator may petition the Director of Public Works for a reconsideration and hearing.

C. Reinstatement of MS4 Access Without Approval. A person commits an offense if the person reinstates MS4 access to premises terminated pursuant to this Section, without the prior approval of the Director of Public Works.

37.08 MONITORING

A. Applicability. This Section applies to all facilities that have stormwater discharges associated with industrial activity, including construction activity.

B. Access To Facilities.

1. The Director of Public Works, or his/her designee, shall be permitted to enter and inspect facilities subject to regulation under this Ordinance as often as may be necessary to determine compliance with this Ordinance. If a discharger has security measures in force that require proper identification and clearance before entry into its premises, the discharger shall make the necessary arrangements to allow access to the Director of Public Works or his/her designee.

2. Facility operators shall allow the Director of Public Works, or his/her designee, ready access to all parts of the premises for the purposes of inspection, sampling, examination and copying of records that must be kept under the conditions of a WPDES Permit to discharge stormwater, and the performance of any additional duties as defined by State and Federal law.

3. The City shall have the right to set up on any permitted facility such devices as are necessary in the opinion of the Director of Public Works to conduct monitoring and/or sampling of the facility’s stormwater discharge.

4. The Director of Public Works has the right to require the discharger to install monitoring equipment as necessary. The facility’s sampling and monitoring equipment shall be maintained at all times in a safe and proper operating condition by the discharger, at its own expense. All devices used to measure stormwater flow and quality shall be calibrated to ensure their accuracy.

5. Any temporary or permanent obstruction to safe and easy access to the facility to be inspected and/or sampled shall be promptly removed by the operator at the written or oral request of the Director of Public Works and shall not be replaced. The costs of clearing such access shall be borne by the operator.

6. Unreasonable delays in allowing the Director of Public Works, or his/her designee, to a permitted facility is a violation of a Stormwater Discharge Permit and of this Ordinance. A person who is the operator of a facility with a WPDES Permit to discharge stormwater associated with industrial activity commits an offense if the person denies the Director of Public Works, or his/her designee, reasonable access to the permitted facility for the purpose of conducting any activity authorized or required by this Ordinance.

7. If the Director of Public Works, or his/her designee, has been refused access to any part of the premises from which stormwater is discharged, and he/she is able to demonstrate probable cause to believe that there may be a violation of this Ordinance, or that there is a need to inspect and/or sample as part of a routine inspection and sampling program designed to verify compliance with this Ordinance, or any order issued hereunder, or to protect the overall public health, safety, and welfare of the community, then the Director of Public Works may seek issuance of a search warrant from any court of competent
jurisdiction.

37.09 PREVENTION WITH BMPS

A. BMP Identification Requirements. The City will adopt requirements identifying BMPs for any activity, operation, or facility that may cause or contribute to pollution or contamination of stormwater, the MS4, or waters of the State.

B. Protection From Accidental Discharge. The owner or operator of a commercial or industrial establishment shall provide, at their own expense, reasonable protection from accidental discharge of prohibited materials or other wastes into the municipal storm drain system or watercourses through the use of these structural and nonstructural BMPs. The Director of Public Works may require any person responsible for a property or premise that is, or may be the source of an illicit discharge to implement, at said person’s expense, additional structural and nonstructural BMPs to prevent the further discharge of pollutants to the MS4.

C. Compliance. Compliance with all terms and conditions of a valid WPDES Permit authorizing the discharge of stormwater associated with industrial activity, to the maximum extent practicable, shall be deemed compliance with the provisions of this Section. These BMPs shall be part of a SWPPP as necessary for compliance with requirements of the WPDES Permit.

37.10 NOTIFICATION OF SPILLS

A. Notification of Release of Illegal Discharges or Pollutants Into Stormwater. Notwithstanding other requirements of law, as soon as any person responsible for a facility or operation, or responsible for emergency response for a facility or operation has information of any known or suspected release of materials that are resulting or may result in illegal discharges or pollutants discharging into stormwater, the MS4 or waters of the State, said person shall take all necessary steps to ensure the discovery, containment, and cleanup of such release.

In the event of such a release of hazardous materials, said person shall immediately notify emergency response agencies of the occurrence via emergency dispatch services.

In the event of a release of nonhazardous materials, said person shall notify the Director of Public Works in person or by telephone or facsimile no later than the next business day.

B. Written Notice Required. Notifications in person or by telephone shall be confirmed by written notice addressed and mailed to the Director of Public Works within three (3) business days of the telephone notice.

C. Written Record Required. If the discharge of prohibited materials emanates from a commercial or industrial establishment, the owner or operator of such establishment shall also retain an onsite written record of the discharge and the actions taken to prevent its recurrence. Such records shall be retained for at least three (3) years.

37.11 ENFORCEMENT

A. Notice of Violation. Whenever the City finds that a person has violated a prohibition or failed to meet a requirement of this Ordinance, the Director of Public Works may order compliance by written notice of violation to the responsible person.
**B. Notice of Remediation/Restoration.** If abatement of a continuing violation and/or restoration of an affected property is required, notice shall be given to the Responsible Person, which notice shall set forth a deadline within which such remediation or restoration must be completed. Said notice shall further advise that, should the violator fail to remedy or restore within the established deadline, the work will be done by a governmental agency or a contractor designated by the Director of Public Works, and the expense thereof shall be charged to the violator.

**C. Abatement/Remediation At Violator’s Expense.** In addition to the enforcement processes and penalties provided, any condition caused or permitted to exist in violation of any of the provisions of this Ordinance is a threat to the public health, safety and welfare, and is declared and deemed a nuisance, and may be summarily abated or restored at the violator’s expense, and/or a civil action to abate, enjoin, or otherwise to compel the cessation of such nuisance, may be taken. It is not necessary to prosecute for forfeiture, or issue a notice or order pursuant to this Chapter before instituting a civil action.

**D. Penalty.** Any person that has violated or continues to violate a provision of this Chapter shall, upon conviction, be subject to a forfeiture of not more than One Thousand ($1,000.00) Dollars, in addition to all applicable costs, fees, surcharges, and assessments. Each day that such violation continues shall be considered a separate offense. In addition to other available alternative penalties, failure to pay said forfeiture and all applicable costs, fees, surcharges, and assessments shall subject the violator to a period in the County Jail of not more than ninety (90) days per offense. It is not necessary for notice of violation to be given prior to the issuance of a citation for violation of this Chapter.

**E. Cost Recovery.** The City may recover all attorney fees, court costs and other expenses associated with enforcement of this Ordinance, including sampling and monitoring expenses.

**F. Remedies Not Exclusive.** The remedies listed in this Section are not exclusive of each other or of any other remedies available under any applicable Federal, State or local law, and it is within the discretion of the City to seek cumulative remedies.

### 37.12 APPEAL

**A. Notice of Appeal.** Any person receiving a Notice of Violation may appeal the determination of the Director of Public Works to the City’s Stormwater Utility Committee. The notice of appeal must be delivered to the Director of Public Works within ten (10) working days from the date of the Notice of Violation, who as soon as practicable, will forward the notice of appeal to the Stormwater Utility Committee. Hearing on the appeal shall take place within thirty (30) working days from the date of receipt of the notice of appeal.

**B. Abatement.** If the violation has not been corrected pursuant to the requirements set forth in the Notice of Violation; or, in the event of an appeal, within ten (10) working days of the Stormwater Utility Committee’s decision to uphold the original decision, then representatives of the Director of Public Works shall enter upon the subject private property and are authorized to take any and all measures necessary to abate the violation and/or restore the property. It shall be unlawful for any person, owner, agent or person in possession of any premises to refuse to allow the Director of Public Works, or his/her designee, or designated contractor, to enter upon the premises for the purposes set forth above.

**C. Costs of Abatement/Special Assessments.** Within sixty (60) working days after abatement of the violation, the Director of Public Works will notify the owner of the property of the cost of abatement, including administrative costs. The property owner may file a written protest objecting to the amount of the assessment within ten (10) working days. If the amount due is not paid within a timely manner as determined by the decision of the Director of Public Works or by the expiration of the time in which to file an appeal, and the costs of abatement or restoration may be directly associated to a particular parcel for
which the responsible party is the violator, the costs shall become a special assessment against the property and constitute a lien on the property for the amount of the assessment.

D. Alternative Compensatory Actions. In lieu of enforcement proceedings, penalties, and remedies authorized by this Ordinance, the Director of Public Works may impose upon a violator alternative compensatory actions, such as storm drain stenciling, attendance at compliance workshops, watercourse cleanup, etc.

37.13 SEVERABILITY

If a court of competent jurisdiction judges any section, clause, provision or portion of this Ordinance unconstitutional or invalid, the remainder of the Ordinance shall remain in force and not be affected by such judgment.
38.01 Preservation of Historical Artifacts.

A. Purpose. The purpose of this section is to promote the general welfare by providing for the identification, protection, enhancement, perpetuation, and use of artifacts that reflect special aspects of the City’s historical, architectural, cultural, or aesthetic heritage for the following reasons:

1. To encourage public knowledge, understanding, and appreciation of the City’s past;
2. To foster civic pride in the beauty and character of the City and the accomplishments of its past;
3. To preserve the visual character of the City by preserving artifacts that reflect its history, and
4. To preserve positive, tangible aspects that are unique to the City.

B. Definitions.

1. Commission for the purposes of this section means the Historic Preservation Commission.
2. Artifacts for the purposes of this section are manmade objects of cultural or historical significance that are located or have been displayed within the City.
3. Object. Means an item that is:
   a. by nature of design moveable;
   b. a structure that was not designed to be habitable; or

4. Historical artifact means an artifact that is:
   a. A local historical artifact that is at least 50 years old; or
   b. Associated with a property that meets the criteria for listing on the National Register of Historic Places, State Register of Historic Places or as a city landmark.
5. Inventory of historical artifacts is the official list of historical artifacts subject to the terms of this section. The inventory of historical artifacts shall be held and maintained by the director of the Department of Community Development and Inspections.
6. Local historical artifact is an object that:
   a. Exemplifies or reflects the cultural, archaeological, political, economic, social, or religious history;
   b. Is identified with personages, events, or periods of history which personages, events, or periods are significant to the community;
   c. Embodies distinguishing characteristics of architecture, an architect, architectural materials, craftsmanship, or works of nature;
   d. In its inherent historical nature provides the citizenry with educational or aesthetic enrichment; or
   e. Contributes to the character or understanding of an historic district, property, or structure.

C. Procedures for listing or removal from listing. Official listing on the inventory of historical artifacts, or removal from listing, shall be made by recommendation of the Commission and confirmation by the Common Council.

1. The Commission shall hold a public hearing before recommending that an artifact be listed, or removed from listing, on the inventory of historical artifacts. At least ten days prior to the hearing, the Commission shall in good faith provide written notice to the following:
   a. The Director of the Kenosha Public Museum
   b. The Director of the Department of Community Development and Inspections.
c. The Director of Public Works.
d. The General Manager of the Water Utility.
e. The Fire Chief

3. Within 30 days after the close of the public hearing, the Commission shall recommend or decline to recommend to the Common Council the listing, or removal from listing, of the artifact on the inventory of historical artifacts. At least ten days prior to the final recommendation, the Commission shall in good faith provide written notice to those listed in C.1 a. through C.1.h. above.

4. The Common Council shall act upon the recommendation of the Commission. The Common Council may not place the artifact on the inventory of historical artifacts if prior to the Common Council's determination, an objection to the listing is made by the owner of the artifact.

D. Preservation.

1. No person or entity, including but not limited to, any department or agency of the City or the Redevelopment Authority of the City of Kenosha, may permit the transfer, relocation, demolition, obliteration, or alteration of an historical artifact listed on the inventory of historical artifacts without first obtaining the permission of the Commission. If any activity associated with the historical artifact has the potential to damage or cause the loss of such historical artifact, the person responsible for such activity must first present a plan for the protection of such historical artifact to the Commission. The project may not commence or continue until and unless the historical artifact protection plan is approved. The person responsible for the activity must thereafter provide documentation to the Commission, the Director of Public Works, the Director of the Department of Community Development and Inspections, the General Manager of the Water Utility, the Police Chief, or the Fire Chief under whose control and custody the listed historical artifact falls, that the plan was properly executed.

2. If approval under paragraph D.1.is denied, the applicant may, in writing to the City Clerk within ten days of denial, appeal such decision to the Common Council. The City Clerk shall cause the matter to be placed on the agenda of the meeting of the Common Council next following the receipt of such appeal, consistent with the 24-hour notice provision of the Wisconsin Open Meetings Law. A representative of the Commission shall appear at such meeting to explain the reasons for denial. Approval or denial by the Common Council is final.

E. Documentation. If the Commission finds that the preservation of an historical artifact is not practicable, then the historical artifact shall be documented by photographs, mapping, written description, or such other means or matter deemed most appropriate by the Commission.

F. Stop Work Order. If any member of the Commission learns or discovers that any person or entity is, may be, or is about to be engaged in the transfer, relocation, demolition, or alteration of a historical artifact listed on the inventory of historical artifacts without first obtaining the permission of the Commission, such Commission member shall notify the Chair of the Commission. The Commission Chair shall call a special meeting, to be held within three days (Saturdays, Sundays, and holidays excluded for calculation purposes, but such meeting could be held on a Saturday or Sunday) consistent with the Wisconsin Open Meetings Law, by providing telephonic or written notice to each member of the Commission at his/her usual place of abode at least six hours before the time set for the meeting. No business shall be transacted or action taken at any special meeting other than the prospective stop work order stated in the notice for the meeting. If the Commission issues a stop work order, such order shall in place remain until confirmed, modified, or overruled by the Common Council at a regularly scheduled meeting.
G. Cooperation with Other Public Entities. The Historic Preservation Commission shall work with other public entities, including, but not limited to, the Kenosha Unified School District, Gateway Technical College, County of Kenosha, and State of Wisconsin to extend the protection of this section to historical objects that they own.

H. Penalties. It shall be a violation of this Section for any person, party, firm or corporation, or limited liability company or partnership to violate the provisions of Paragraph D.1. or Subsection F. Upon conviction, except as otherwise provided, a violator shall be subject to forfeiture of not more than One Thousand ($1,000) Dollars for each violation, plus the costs of prosecution.
